## About this Report

### Reporting Approach

We are taking incremental steps to usher in the next wave of efficiency and growth through 'Integrated Reporting'. We seek to disclose the material impact of our business operations across both financial and non-financial metrics to our stakeholders, helping them make informed decisions. The Report provides insights into our key strategies, operating environment, risks, opportunities, governance structure and the approach towards long-term sustainability.

### Reporting Principles

The financial and statutory data presented in this Report is in line with the requirements of the Companies Act, 2013 (and the rules made thereunder); Indian Accounting Standards; the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015; and the Secretarial Standards issued by the Institute of Company Secretaries of India. The narrative section of the Report is guided by the Integrated Reporting <IR> framework outlined by the International Integrated Reporting Council (IIRC).

### Scope and Boundary

This Report includes information that is material to our stakeholders and it presents an overview of the Company's major operations in India and abroad, along with the associated activities that help in short, medium and long term value creation.

### Leadership Accountability

The Company's senior management, under the Managing Director's supervision, have reviewed the Report content. The Board Members of the Company have provided the required governance oversight.

## About Us

Tata Global Beverages was renamed as Tata Consumer Products, following the merger of the Consumer Products business of Tata Chemicals with itself.

Home to iconic brands, such as Tata Tea, Tetley, Eight O' Clock, Himalayan, Tata Salt and Tata Sampann, our portfolio of products represents our interests spanning food and beverage.

With a combined reach of 200 million households in India, we have an unparalleled ability to leverage the Tata brand in consumer products. Our deep understanding of consumers, iconic category-leading brands and vastness of reach are key drivers of our value proposition. Our JV Tata Starbucks owns and operates cafés in India. We also have a JV with PepsiCo in India, NourishCo\*, which markets non-carbonated ready-to-drink beverages that focus on health and enhanced wellness.

With a diverse workforce spread across the world, we have grown through innovation, organic expansion, multiple strategic alliances and bold acquisitions.

\*We are in the process of acquiring the 50% stake of PepsiCo in NourishCo Beverages, which is in line with our ambition to create a larger portfolio in the food and beverage industry in India. On the completion of this acquisition, NourishCo Beverages will become a fully-owned subsidiary of Tata Consumer Products Limited.

# UNLOCKING NEW OPPORTUNITIES

The new name of the Company, 'Tata Consumer Products', signifies its ambition to become a leading force in the consumer products category and marks a new strategic direction for the Company. Its product portfolio currently spans a mix of iconic and emerging brands in tea, coffee, water, salt, pulses, spices and packaged foods.

I am pleased to write to you on the performance of Tata Consumer Products Limited for the financial year 2019-20.

The last few months have seen unprecedented changes in the way we live and work, due to the COVID-19 pandemic. While this is a challenging time for everyone, I believe it is also a learning opportunity and we will emerge stronger from this crisis.

The last year has been an eventful one for the Company. The merger of Tata Chemicals' Consumer Products business with the Company has given Tata Consumer a much wider scope and exciting opportunities for growth in the new decade.

The new name of the Company, 'Tata Consumer Products', signifies its ambition to become a leading force in the consumer products category and marks a new strategic direction for the Company. Its product portfolio currently spans a mix of iconic and emerging brands in tea, coffee, water, salt, pulses, spices and packaged foods. This gives us broader exposure to the large and fast growing FMCG market in India as well as the ability to explore options in the international markets where we have an existing strong base.

The integration of the Company's Foods and Beverages businesses in India is well underway. Unlocking the synergies from this process, and using combined scale to achieve rapid growth, will be critical for our future. We expect these revenue and cost synergies to add significant shareholder value. The combined consumer business will also benefit from a reach to over 200 million households in India, a broader portfolio to deepen distribution, enhanced innovation capabilities and a strong product pipeline.

During the COVID-19 pandemic, Tata Consumer has adapted by innovating new delivery models to consumers, launching brand campaigns that are relevant and meaningful in the current context and closely monitoring changes in consumer buying behavior. We have contributed to the community in various ways- financial assistance as well as making our products available to vulnerable sections of the population and frontline workers in essential services. At Tata Consumer, the health and safety of our employees and stakeholders is of prime importance to us. We are doing all we can to provide a safe working environment, with strong processes and protocols in place. While the

road ahead is not an easy one, I believe we are well placed to deliver value to our consumers and other stakeholders.

I would like to thank Mr. Ajoy Misra for his contributions as the outgoing Managing Director & CEO of the Company and welcome Mr. Sunil D'Souza, who has taken charge as Managing Director & CEO in April 2020.

I would also like to take this opportunity to welcome the shareholders of Tata Chemicals, who are now the shareholders of Tata Consumer Products as well. On behalf of the Board, I would like to express my gratitude to all our employees for their commitment especially over the last few months and to our shareholders for their support and faith in the Company.

Warm regards,  
**N. Chandrasekaran**

## Q&A with the Managing Director & CEO

# IN CONVERSATION WITH SUNIL D'SOUZA

Sunil took over as MD & CEO of Tata Consumer Products Limited on April 2020. He has nearly three decades of rich experience in the consumer goods industry as well as in-depth understanding of the food and beverage world.

As Tata Consumer begins its journey to become a leading and differentiated consumer products company, Sunil sets out how we plan to deliver on our strategy and create better value.

### **You have assumed charge at a very interesting juncture in the Company's growth story. What have been your immediate takeaways?**

I joined Tata Consumer with the knowledge that I was joining a highly respected, values-driven Group and a business that is known for innovation, customer centricity and agility.

This has been a big year of change for the Company, both internally and externally, and I have spent the last few months learning as much as I can about the business. In talking to colleagues at all levels and other key industry stakeholders – albeit virtually – I have been struck by several things.

Firstly, that in Tata Consumer's arsenal, we house some of the most loved and iconic, global and regional brands. We have deep penetration in our international markets of the US, UK and Canada. In India, we have a combined reach of almost 200 million households and wide distribution network of 2.5 million retail outlets. We offer consumers a distinctive

range of food and beverage options through well-established channels. Our consistent pace of innovation and the depth of our consumer insights keep us ahead in a fast-moving, competitive environment. I have also been impressed by the enthusiasm and commitment of our colleagues and their relentless focus on servicing consumers and communities, especially in the current environment.

### **How is the Company unlocking synergies and strengthening its value proposition?**

Tata Consumer is the flag-bearer for the Tata group's aspirations in the FMCG space. The combination of the Consumer Products business of Tata Chemicals and the Beverages business of Tata Global Beverages allows us to participate in opportunities spread across all three segments of the food and beverage consumer basket – in-the-kitchen, on-the-table and on-the-go.

We are integrating the businesses effectively and unlocking synergies in terms of growth and efficiency. Growth drivers include multiplying

distribution, focused and faster innovation and stronger cashflows to invest in growth. Efficiency drivers include superior terms of trade with channel partners, supply chain opportunities and scale efficiencies in areas such as marketing and packaging. Apart from this, we also have access to Tata Chemicals' state-of-the-art innovation centre in Pune, which will fast track new product development for us.

Driving conversion from unbranded to branded products is built into the DNA of this organisation, across food and beverage. We have a proven track record of creating category-defining brands, the likes of Tata Tea and Tata Salt. While there is still a large headroom for growth in our core categories, we see similar opportunities in the staples and packaged foods space too, where Tata Sampann is a mega brand in the making. I think carving a strong brand through sharp consumer insights, products that offer value and brand communication is key to achieving this.

Tata Consumer is the flag-bearer for the Tata group's aspirations in the FMCG space. The combination of the Foods business of Tata Chemicals and the Beverages business of Tata Global Beverages allows us to participate in opportunities spread across all three segments of the food and beverage consumer basket – in-the-kitchen, on-the-table and on-the-go.

## Q&A with the Managing Director & CEO

### How has the performance of Tata Consumer been in the last year and what has been the progress of the business?

The Company has recorded healthy growth during the year, with most of our businesses performing well. Consolidated revenue for the year grew by 33% and consolidated EBITDA by 56%. On a like-to-like basis (excluding the India Foods business) our topline growth was 4% and our EBITDA grew by 12%. We are a cash positive company and have net cash of ~Rs. 1,300 Crores on our balance sheet.

Each of our businesses is well aligned to the overarching strategic objectives of the Company. We are improving our regional play, encouraged by country-specific revenue growth strategies, organic and inorganic opportunities, impactful marketing campaigns and promising innovation. Over the last few months, we have moved quickly across geographies, to adapt to changes in consumer trends and buying behaviour through our delivery channels and brand communication.

All our international businesses have shown great resolve during this period. We have witnessed volume growth in all markets and significant

increase in our profitability due to the various initiatives that we have taken in the last two to three years.

We see digital transformation as a key driver for growth and we are strengthening our capability in this area, including a digital platform for commodity buying, enabling the entire supply chain from demand planning to procurement and embedding digital technology and decision-making at the frontline of the sales organisation.

As I said earlier, a key milestone for the year was the merger of Tata Chemicals' Consumer Products business, with the Beverages business and the integration of the businesses is well underway. Also, in India, we acquired the branded business of Dhunseri Tea Industries to strengthen our market presence in Rajasthan.

In addition, we are focusing on strengthening our ready-to-drink beverages portfolio. We are in the process of acquiring PepsiCo's stake in NourishCo Beverages Limited, a 50:50 JV between the two companies. We will look to scale up NourishCo's capabilities and footprint further and build a differentiated portfolio in this segment.

Tata Starbucks, a 50:50 JV between Tata Consumer and Starbucks has been performing well, with 39 new stores opened during the year. There is now a total of 185 stores across 11 cities in India. Our growth in Tata Starbucks was however impacted a bit in Q4, due to the onset of COVID-19, which led to the closure of all our stores for more than two weeks in the month of March. Some of our stores have now opened for

delivery and takeaways and will progressively normalise over the next few months.

### Your reflections on the Company's commitment to sustainability.

We have a strong track record of managing our business responsibly and sustainably. We are proud of our continued leadership position in the most recognised sustainability benchmarks, such as CDP that is concerned with disclosure of a company's environmental impact. Beyond what we are trying to achieve with emissions, water use, plastics use and waste management, we aim to support one million community members across our value chain. Our initiatives span sustainable agricultural practices, women and children empowerment, affordable healthcare and rural

**Each of our businesses is well aligned to the overarching strategic objectives of the Company.**

development. We recognise that, ultimately, our success is linked to our ability to create sustainable value for our stakeholders, from customers and investors to the communities in which we operate.

We are committed to sustainably sourcing all our teas and we encourage our supply chain partners to follow sustainable agricultural practices in the certification of Rainforest Alliance (international markets) and trustea (India). We have also framed Extended Producer Responsibility (EPR) for collection and reprocessing of plastic packaging waste on a brand neutral basis across key markets. In FY 2019-20, the India Beverages business achieved 70% and the India Foods business achieved 98% collection of plastic packaging waste. The target is to secure 100% collection and disposal of plastic packaging by 31<sup>st</sup> December 2020 in India.

### How is the Company adapting to the pandemic and preparing for its long-term ramifications?

Our planning for scenarios beyond the current situation is well underway and we should be well prepared as the future unfolds. Now more than ever, we are collaborating, sharing learnings and supporting each other, right from the senior leadership at the Corporate Office, to the teams at the frontline and every facility.

On the ground, we are innovating with new marketplace models. We have tied up with delivery providers and e-commerce partners to enable direct delivery to consumers. We are also accelerating our digital agenda to take advantage of the new world

realities. There have been significant changes in consumer beliefs, habits and buying patterns during the pandemic and the recent lockdowns.

### The key is to keep close to the consumer and quickly adapt to the changes to make sure we stay in the relevant basket.

As the consumer emerges from this and adapts to a new normal, some of the changes will stick. The key is to keep close to the consumer and quickly adapt to the changes to make sure we stay in the relevant basket. During the recent events, we are also proud to have played our part in helping the communities around us. We are supporting many programmes to aid frontline workers and the elderly in the US, Canada, the UK and India.

We supported GroceryAid in the UK with a special donation during these challenging times. It is a wonderful charity doing invaluable work to provide practical, emotional and financial help to people who work, or have worked, within the grocery industry either for a retailer, wholesaler or manufacturer. We are also proud to support the Government of India's Suraksha Store initiative to tackle the crisis, by ensuring safe hygiene practices at over 13,700 stores across six districts in Delhi and over 12,800 stores across 10 districts in Haryana.

### How do you see the road ahead for Tata Consumer?

The economic environment in the near term will be rough with multiple headwinds around the world.

However, we believe that given our heritage, our brands, our portfolio, our strong balance sheet, our people and our connect with communities, we are better placed than most to withstand this crisis, and if anything, I am confident that we will emerge stronger at the end of this.

With the Foods and Beverages businesses coming together to form Tata Consumer, we now have a platform to build on for the future. We will continue strengthening our brands, expanding our portfolio, sharpening our capabilities, building our talent, improving the way we service our customers and working collaboratively with our partners and communities to create shared value over the longer term.

## Market Context

# RESPONDING TO EVOLVING TRENDS

Understanding the market trends that shape our industry and our brands is critical to delivering impact that is at the heart of our mission For Better.

### CONSUMERS INCREASINGLY WANT PRODUCTS AND SERVICES THAT ARE...

#### Healthy, seasonal and nutritional

Consumers are becoming more health-conscious, proactively focusing on a balanced nutrition and an active lifestyle.

Fresh, seasonal ingredients; unprocessed, natural and organic foods; foods with favourable nutritional profiles; and plant-based alternatives dominate preferences today.

Households are rediscovering the hidden powers in their kitchen, namely spice mixes that can bring excitement to any dish and provide a boost to health.

#### Customised, unique and local yet global

Today's palettes are far more flexible and adventurous.

Consumers are keen on experimenting with drinking and snacking options that feature

a variety of flavours. There is a growing interest in ethnic mashups, where flavours and techniques are fused to create signature options.

#### Convenience led, experience driven and personal

Households are gradually becoming smaller and everyday lives are busier than before. As a result, convenience continues to be a key motivator in choosing away-from-home socialising occasions.

Cold refreshments that are consumed away from home are steadily gaining popularity, and not just in the summer months. Herbal flavours and tea based ready-to-drink non-carbonated options that cannot be replicated at home, rank high on satisfying beverage cravings.

At the same time, quality at-home food and drink options are likely to witness greater traction in the near term.

#### Good for the planet and ethically sourced

As social consciousness grows, today's customers want to know the stories behind where their food and drink come from.

Qualities like local, organic, sustainable sourcing, corporate performance, diversity and environmental impact, among others, are all important to consumer choices in varying degrees.

#### Social media friendly and sensory thrillers

Technology and smartphones are changing the way consumers interact with brands and the way companies are looking at supply chains.

Over the years, Instagram and other photo-sharing apps have revolutionised the consumer-facing industry. Social media is shaping category and brand perceptions, and micro-influencers are gaining credibility in promoting products and services.

## OUR RESPONSE

### Portfolio focus

- The quality of our offering continues to be a strong differentiator and we are reimagining our array of well-loved brands to rejuvenate the base business.
- We are introducing our core brands in new markets and re-introducing some old favourites. With every initiative, we are focused on growing the value of the category.

### Product innovation

- We continued to launch new products in the year, expanding our portfolio to satisfy a broader range of consumer needs.
- In established categories, new recipes and new variants had immediate impact, while groundwork around building new categories have been laid for long-term success.

### Social hubs for food and beverage

- With more sophisticated, premium products and the implementation of targeted initiatives, we are extracting higher value from out-of-home socialising occasions.
- We are also expanding the availability of chilled on-the-go beverages to drive growth in single serves.

### Sustainability considerations

- We are working with our suppliers, farmers and other stakeholders to achieve positive results for the environment and our communities.
- We are lowering our operating costs by reducing energy and water usage and reducing the PET content and weight of packaging.

### Accelerating digital

- Through edgy marketing, dedicated promotions and social media-centric campaigns, we are pursuing a multi-channel approach to gain mindshare.
- We are utilising data-driven insights to attract consumers for the right occasion and at the right location.

## Market Context

## India's Consumption Story

FOOD AND BEVERAGE –  
A RS. 30 LAKH CRORE  
OPPORTUNITY

India's food and beverage consumption in 2019 is estimated at ~Rs. 30 Lakh Crores. The 'in-the-kitchen' segment, comprising staples, spices and condiments, dairy and others, accounts for ~70% of the food and beverage basket, or ~Rs. 21 Lakh Crores. However, the share of organised players in this segment is less than 10% and remains largely untapped. The other segments, 'on-the-table' (comprising spreads, sauces and others) and 'on-the-go' (comprising snacks, ready-to-eat options and others) have traditionally seen larger play by organised players, but their offerings are skewed towards indulgent snacking products. The industry is also witnessing a shift in consumer preferences, with demand for healthier, better quality and more affordable food and drink options growing across all the three segments.

## What does this mean for Tata Consumer?

We perceive a large and transformational market opportunity ahead of us and we aim to leverage our strengths to become a formidable player across the three segments of in-the-kitchen, on-the-table and on-the-go, offering products that are high in quality, innovative, delightful and made with goodness and care.

### Key value drivers

Portfolio of market leading brands and high growth potential brands

Presence across 200 million households in urban and rural India

Deep understanding of consumers and an omnichannel presence

Innovation-led culture with focus on health and well-being products

Legacy and the trust embodied by the Tata brand

Wide distribution network of ~2.5 million retail outlets across India

With a proven ability to win, Tata Consumer is well positioned to ride the next consumption wave in India.

## What we do

### Listen

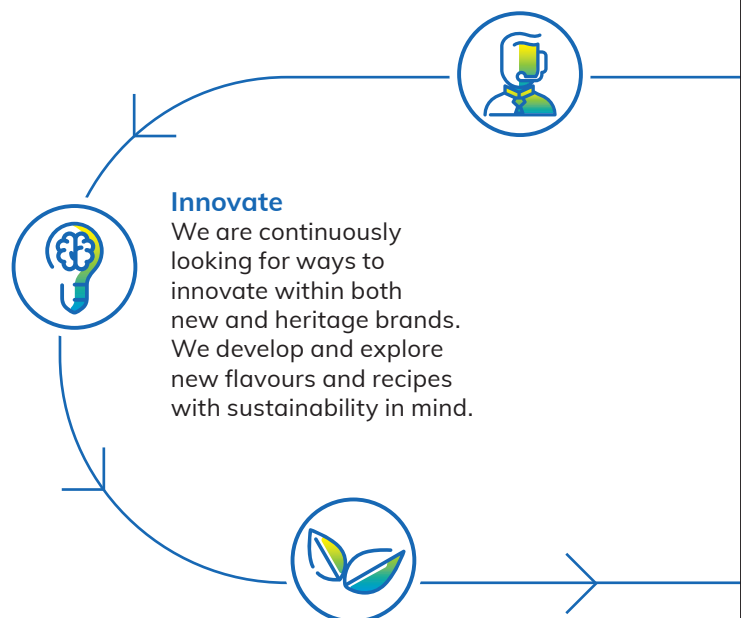

We are attuned to the changing consumer sentiment, through a combination of data-driven insights, social listening with traditional consumer research.

### Innovate

We are continuously looking for ways to innovate within both new and heritage brands. We develop and explore new flavours and recipes with sustainability in mind.

### Source

We carefully source the best materials based on their high quality and impact on the planet.

### Market and sell

We create tailored content to improve brand salience and engage with our consumers through the year. We utilise a multi-channel approach to gain mindshare, with an increasing play in modern trade.

### Distribute

A global network of logistics warehouses ultimately deliver our products to millions of retail sales outlets.

### Manufacture

We turn these materials into products which are packaged and sold every day of the year.

## The value we create for

### Consumers

We provide food and beverage products that meet the needs of consumers worldwide.

### People

We support direct and indirect jobs across our value chain, from sourcing to distribution. We aim to reward people fairly for the work they do and help them become the best they can be at Tata Consumer.

### Society

Our business has an impact either directly through our core operating activities or indirectly through the broader value chain. We also contribute by investing in community programmes to address specific environmental and socio-economic challenges.

### Planet

We are working with others to make the big changes needed to tackle issues like climate change and plastic waste, while reducing our environmental impact.

### Shareholders

Through careful management of all inputs to our business, we create profits that benefit shareholders through dividend payments, and increase the market value of their shares.

## Operational

NATURE	CONTEXT AND POTENTIAL IMPACT	MITIGATION	CHANGES SINCE 2019
<b>Environmental</b> 	Failure to reduce our environmental footprint and to meet stakeholders' expectations, particularly relating to climate change, water availability, packaging waste and sustainable agriculture, can damage our license to operate, erode consumer trust and increase our cost of doing business	Programmes for energy management, water reduction, wastewater treatment, packaging management, waste reduction  Local and international partnerships on common issues  Focus on sustainable procurement	Zero waste to landfill and greater share of renewable power in energy consumption, in our Beverages business  <a href="#">Read more</a> > Page 20
<b>Workplace health and safety</b> 	Many of our operations, by their nature, have the potential for loss of life or workplace injuries to employees, contractors and visitors	We have a continuous safety audit programme to verify implementation of safety management and support a culture of continuous improvement  Best practice safety and occupational health guidance is shared across the businesses	During the year, we registered a Lost Time Injury Frequency Rate (LTIFR) of 0.88, up from 0.58 in the previous fiscal; this is calculated on the basis of one million hours worked
<b>Product safety and integrity</b> 	Poor quality or contamination could result in safety issues, reputational damage, financial losses and product recalls  Growing impact of a social media-led scrutiny and tougher legal environment can further magnify the impact	Establishing a company-wide quality assurance programme, along with product testing and traceability programmes  Engaging with suppliers to comply with clear and stringent norms for raw material safety and quality  Supporting product compliance by seeking relevant external accreditations	We did not have any product recalls
<b>Channel mix</b> 	Continued increase in the concentration of retailers and independent wholesalers on whom we depend to distribute our products can lead to reduced availability of our portfolio in unforeseen circumstances	Work closely with existing channel partners to drive incremental transactions  Capture opportunities associated with existing and new distribution channels	Stronger play in modern trade  We are further strengthening our distribution and sales network using technology to improve our execution skills in the market
<b>Cybersecurity</b> 	Our IT infrastructure has been moved completely to the cloud for greater efficiency in our operations, thus exposing us to the breach of information security through cyber attacks	In parallel to developing our technology systems, we invest in developing the IT capabilities of our people across our businesses  We have installed a comprehensive information security policy, insurance and monitoring systems to safeguard against any unforeseen events	There is an ongoing programme of investment in both technology and people to enhance our cyber-security capabilities  During the year, we have reviewed IT disaster recovery plans across the businesses
<b>Ethics and compliance</b> 	As an international business complying with multiple complex regulations, people with whom we deal must live up to our values and standards and share that responsibility  Unacceptable behaviour like bribery and corruption pose a threat to our ethical competence	The Tata Code of Conduct is designed to ensure suppliers, representatives and all those we deal with, adhere to our values and standards  Drawing assistance for the Company and its subsidiaries from respective legal departments and/or external legal advisors  Developing and implementing internal policies and procedures to ensure compliance	We did not have any compliance concerns

## COVID-19 Response

# LEADING THROUGH THE CRISIS

The COVID-19 pandemic is a crisis unlike any other in modern history and one that is ruled by unfamiliarity and uncertainty.

At Tata Consumer, we have outlined five key principles, spanning a wide range of actions that help us respond effectively.

### PEOPLE FOCUS

- Ensure both physical and mental wellbeing
- Safety first is the foremost across all fronts
- Flexible working options across the globe

### COLLABORATION

- Work with government bodies and hospitals
- Work with stakeholders in our ecosystem
- Work with e-commerce delivery companies

## RESILIENCE

- Going the extra mile to actively meet challenges
- Ensure that our factories operate to serve our customer needs

## INNOVATION

- New and innovative ways of serving and connecting with customers
- Innovative marketplace models

## GIVING BACK TO COMMUNITY

- Supporting essential workers and vulnerable sections of society
- Voluntary contributions

## Tea &amp; Coffee

# FRESH THINKING FRESHER FLAVOURS

Our marquee tea brands, Tata Tea and Tetley enjoyed considerable success this year, extending their reach into new geographies, while developing newer alternatives outside their core portfolio in their existing markets. Tata Tea Premium in India and Tetley in the UK also underwent a restage this year with campaigns crafted to strengthen their market position and drive brand salience. Our category-defining coffee brand, Eight O' Clock Coffee, in the US, is taking further bold steps to strengthen our competitiveness in a challenging marketplace.

## Tata Tea

### INSPIRING REGIONAL PRIDE

Tata Tea Premium understands that India is a sum of many behaviours, cultures and idiosyncrasies. The brand's **deep awareness of regional tastes and preferences, and ability to tailor products** is what sets it apart, making it *Desh Ki Chai* (Tea of the Country) in the truest sense. This year, the brand celebrated the diversity of India, shifting the spotlight from national to local.

We drew from our reservoir of regional insights and used

unconventional, close-to-the-ground media choices to effectively target the major tea-drinking states of Uttar Pradesh, Delhi, Punjab and Haryana. Right from the product packaging down to the method of communication, we crafted a restage campaign that was tailor-made for each state.

We shortlisted the **tea attributes that define the preferences of the consumers in the region and developed blends with a distinct flavour**. We leveraged a 360-degree integrated campaign to unveil the new Tata Tea Premium editions and build excitement around the same.

*Delhi ke liye Rich Assam Chai*  
*Haryana ke liye Kadak Assam Chai*  
*Uttar Pradesh ke liye Dumdaar Chai*  
*Punjab ke liye Badi Daanedaar Chai*

### UNITING TEA LOVERS ACROSS BORDERS

We launched the 'Tata Tea Export Portfolio', comprising two of our iconic Indian brands Tata Tea Gold and Tata Tea Premium, with the hope that they delight the South Asian diaspora living in the UK and Europe just as much as they have done back home.

- **Tata Tea Gold**, preferred for its rich taste and irresistible aroma, is blend of **CTC teas with 15% long leaves**
- **Tata Tea Premium**, preferred for its taste and strength, is a unique **blend of big and small CTC leaves**

## Galloping towards a higher market share in Rajasthan

Our acquisition of the branded tea business of Dhunseri Tea & Industries – encompassing the brands Lal Ghoda and Kala Ghoda – is a landmark step in driving growth in our core tea business in India.

Lal Ghoda and Kala Ghoda are two of the most sought-after brands in Rajasthan, which is counted among the Top-3 tea consuming states in India and one that is largely dominated by local players. We will further expand the reach of these brands within and outside Rajasthan, while drawing synergies from our existing portfolio and translating it into overall growth for the business.

## Tea & Coffee

### Tetley

#### SPARKING CONVERSATIONS OVER A CUPPA

The art of conversation has shaped the evolution of the world. Yet, a hyperactive lifestyle and overt reliance on technology as a medium of communication has dealt a blow to relaxed and cosy tête-à-têtes. **We believe that a cup of tea can be an enabler of one of life's greatest pleasures – the power of great conversation.** We wanted to remind people just how good it feels to sit down with someone for a chat and that our perfect blends are enough to get anyone talking. With this in mind, we launched an extensive rebranding campaign in the UK to encourage consumers to pop the kettle on. **'Now We're Talking'** is a celebration of the light-hearted banter between even the most unlikely of friends, such as a cat and a dog, as they relax and enjoy each other's company over a steaming cup of Tetley.

#### CROSSING SHORES WITH CHAI

##### UK

In a move to disrupt the mainstream tea category and address a gap in the market for an **authentic Indian chai experience**, Tetley launched the 'Ethnic' range of tea bags in the UK. It comprises three all-time favourite flavours: Tetley Masala, Tetley Elaichi (Cardamom) and Tetley Ginger, providing **British Asian consumers a taste of home in their daily cuppa.**

##### USA

Tetley is the #2 player in the mainstream black hot tea category in the US. With discerning consumers increasingly leaning towards premium products, Tetley expanded into an adjacent category this year, to launch a top-of-the-line range of refreshing black teas in the American market, known as **Flavors of India.**

These distinct, **full-bodied blends of Delhi Ginger, Mumbai Masala and Kolkata Cardamom, take some of India's oldest spices and flavours across the ocean to the US.**

#### SMASHING RECORDS AND STEREOTYPES

Supers 2.0 was launched to build on the success of Tetley Super Teas, Canada's first line of teas fortified with vitamins and minerals. The range has now expanded to contain exciting and **on-demand functional ingredients like Turmeric, Dandelion and Matcha** to complement an active and balanced lifestyle. These ingredients are paired with tasty flavours like Apple & Cinnamon and Peach & Ginger.

Achieving a **distribution of 82%** in a country as vast as **Canada** and driving **25% of total category value growth**, the new Tetley Super Teas range emerged as the top performing tea of all new teas launched this year. It was also awarded the **2019 Best New Product Award** by BrandSpark International.

## Evolving a holistic go-to-market approach in India

For the first time, Tata Consumer took the top spot for tea sales in modern trade, a rapidly growing channel in the Indian consumer landscape. High value-for-money and in-store shopping experience are two of the main draws for consumers. The channel offers tremendous potential to cater to the burgeoning demand of young India and to connect with them over our brands.

Modern trade contributes ~15% in value to the Company. Armed with a differentiated strategy and a strong focus on execution, we made consistent strides to emerge as leaders in growth in the reporting year.

### Key priorities

- 1 **ENGAGEMENT**  
Support to the retailers and product innovations for the consumer
- 2 **AVAILABILITY**  
Consistency in availability, accessibility, visibility and marketing hygiene
- 3 **RELATIONSHIPS**  
Participation in brand activations

## Tea & Coffee

### Eight O' Clock Coffee

#### BREWING STRONG AT 160

Eight O' Clock Coffee celebrated its 160<sup>th</sup> anniversary in 2019, a remarkable milestone in the brand's journey to deliver great tasting brews to Americans.

Originally conceptualised by the Great Atlantic and Pacific (A&P) Tea Company, it was one of the signature products when their first store opened in New York City. Through a consumer survey, A&P learned that **8 am and 8 pm were the most popular times to drink coffee and that is how Eight O' Clock Coffee was born.** It went on to be the very heart of the coffee industry, emerging as the **number one coffee brand, a position it held for 30 years.** Eight O' Clock Coffee joined the Tata family in 2006 to strengthen our global portfolio of leading brands.

Today, Eight O' Clock Coffee continues to be manufactured at our **Landover roastery in Maryland, USA.** The staff at Landover is passionate about brewing the perfect cup, and roasts nearly **400 million coffee beans a day!** In a country that runs on coffee, Eight O' Clock Coffee stands out for its rich heritage and consistent innovation.

#### UNEARTHING AMERICA'S BEST KEPT COFFEE SECRETS

In the run up to its 160<sup>th</sup> anniversary, Eight O' Clock Coffee released two new lines: **Barista Blends and Flavors of America.** Both the lines comprise of thoughtfully crafted coffee made with 100% Arabica beans that are uniquely roasted and blended with flavours.

**Barista Blends** gives consumers the chance to **make their home the coffee house**, while our master blenders literally brought to life the **'Flavors of America'** through six star-spangled creations, offering a new, unique way to **discover the different American states** in a refreshing cup of coffee.

#### CARVING A NICHE RETAIL POSITION

Beyond large-scale launches, we are incubating new offering in hand-picked retail outlets and introducing or re-introducing premium mixes for specific regions, to build credibility and drive additional sales in the highly competitive segment of private labels.

Eight O' Clock Coffee collaborated with Walmart to provide an exclusive line of coffee blends, known as Great Value. Four seasonal variants were launched in the second quarter of FY 2019-20: Harvest Blend, Winter Blend, Pumpkin Spice and Peppermint Bark. We also successfully secured a portion (14 SKUs) of Wakefern, the largest retailer-owned cooperative in USA.

## Packaging that delivers

Eight O' Clock Coffee and Good Earth Tea won packaging design awards, while the former also picked up a creative excellence award for its brand campaign.

For 57 years now, Graphic Design USA's Annual Package Design Awards celebrate well-designed graphics and the power of design to tell the brand story and influence consumer choices. What is exciting is that very rarely a company and its creative agency are honoured for two submissions at the same time. Tata Consumer and its design partner, Barnett is one of these rare cases with two entries awarded for design excellence – Eight O' Clock Coffee's Early Riser packaging and Good Earth's Ayurveda packaging.

Eight O' Clock Coffee and Barnett's 'All Hail the Early Risers' campaign was also selected to feature in the prestigious 2020 Hermes Creative Awards Spotlight! The campaign delves into the minds of those who rise early, and those who aspire to. The creative employs snarky headlines paired with striking, black and white imagery of everyday people and everyday situations to convey what a cup of coffee means to the 'morning challenged'.

While we continue to build local relevance with our mainstream staples options across regions, we are expanding our product offerings to include specially formulated alternatives to suit diverse palates.

## Tata Salt

### JOURNEY OF AN UNDISPUTED MARKET LEADER

**1983**

#### Launch of Tata Salt

Pioneering the cause of iodisation

**1983-2003**

#### Evolution of a national brand

Establishing itself as one of India's most trusted brands with successful campaigns like *Desh Ka Namak* (Salt of the Country)

**2007**

#### Introduction of I-Shakti

Taking iodisation to the masses

**2008**

#### Launch of Tata Salt Lite

Addressing low sodium requirement

**2016**

#### Unveiling of Rock Salt

Providing a premium, gourmet experience with health benefits

**2019**

#### Introduction of Herbal Salt

Blending the goodness of herbs with right amount of salt, fortified with wellness benefits

### QUICK FACTS

- India's first packaged iodised salt
- Consistently ranked as the most trusted food brand in India
- Undisputed leadership position with market share of 30% in the branded segment
- Reaches over 1.9 million retailers and 161 million households
- Vacuum evaporated and untouched by hand across the value chain
- Manufacturing capacity at Tata Chemicals in Mithapur increased from 1.0 to 1.2 million tonnes

### GROWING CLOSER TO TODAY'S CONSUMERS

Committed to understanding what triggers anxiety and tension in the lives of Gen Z and millennials, Tata Salt Lite piloted the 'Age of Rage' survey. The results of the survey identified traffic, technology and work as the primary sources of stress.

### STRENGTHENING BRAND EQUITY

To differentiate itself from the competitive foods market and reinforce its brand proposition, Tata Salt has adopted a multi-pronged strategy.

#### Missing I

We helped raise awareness around the **importance of iodine through media response and digital participation**. We spoke to mothers and pregnant women, emphasising the daily consumption of iodine for the mental and physical development of their children. We also moderated an interesting discussion with a panel of health experts, doctors, celebrity mothers and to-be mothers.

#### Shakti Ka Samman

*Shakti Ka Samman* (Respect for Strength) was an outdoor initiative in Patna that underlined the importance of women's health on the occasion of Chhath Puja. We encouraged male devotees to **reciprocate the sacrifices often made by women and pledged for safeguarding their women's health, symbolised by Shakti** (Strength), not only during the festival, but also in everyday life.

**HIS PATH?**

Here is a message from Bapu for you ►

## #BapuReminder

Tata Salt paid tribute to Mahatma Gandhi on his 150<sup>th</sup> birth anniversary, through the #BapuReminder campaign, on MG Road, Mumbai. Using the brand's position of *Desh Ki Sehat, Desh Ka Namak* (Health of the Country, Salt of the Country), we set up an interactive installation that sounded out the rousing Bapu slogan 'Be the change you wish to see' to passers-by and featured thought-provoking messages.

## Salt Therapy

We devised a unique initiative to battle the ill-effects of air pollution in Delhi. Our mobile 'Salt Therapy' (or Halotherapy) had a specially built room, the walls and floors of which were covered with 3-4 tonnes of salt. A session inside the 'Salt Room' lasted about 45 minutes to one hour, where people were required to sit back and relax. The tiny salt molecules in the 'Salt Room' penetrated deep into the lungs and opened up airways for easier breathing. It was a completely natural, non-invasive and drug-free treatment for relieving symptoms caused by congestion, inflammation and allergies of the respiratory system and skin.

### Tata Sampann

#### EXTENDING THE CONSUMER AFFINITY

We forged ahead with category-building initiatives this year, aligned with the brand promise of *Sarvagunn Sampann* (Wholesome Taste and Nutrition).

#### Spices & secrets

Our team of renowned nutritionists spoke to the media extensively during the year, to bring to light the superfoods hidden in our kitchen. This was a definitive move to generate interest around Tata Sampann's range of quality spices, which are sourced from the most authentic places.

**Their full-bodied flavour and nutrition are boosted by their natural oils, which ordinary spices are devoid of.** Their antimicrobial properties help keep diseases at bay and provide a natural way to maintain healthy body weight and keep us warm during the winters.

#### Micro-marketing

We activated a **micro-marketing and trial generation plan** for Delhiites to help combat the harsh winter with Tata Sampann Haldi. We employed full-page print communication and direct sachet sampling of our product, which was supported by a digital campaign that innovatively used real-time pollution and temperature data to bring out superior product proposition of Tata Sampann Haldi.

## #LautAayiDiwali

**Tata Sampann also welcomed one of the most anticipated festivals of the year with the #LautAayiDiwali campaign.**

We activated the campaign with an emotional digital film as an ode to our childhood memories of a perfect Diwali. We also co-created exclusive downloadable easy Diwali recipes with celebrity chef Sanjeev Kapoor, with a chance to meet and greet for winners. Our aim was to make Tata Sampann a mainstay in every Indian kitchen during Diwali.

## Liquid Beverages

# CAPTURING GREATER VALUE IN EVERY BOTTLE

Our liquid beverages portfolio continues to support the everyday wellbeing of consumers across our markets with value added offerings.

## Himalayan

### CLEAR IMPROVEMENTS TRANSLATE TO BETTER PROFITS

With rising competition in the packaged natural mineral water category, optimisation of the Himalayan brand became a business imperative. We set out to challenge every cost line and reduce our consumption of plastic and paper, while continuing to exceed the consumer's expectations from the brand.

As a first step, **we standardised the necks of all Himalayan bottles. Lower preform and cap weight, along with altered bottle dimensions helped cut cost as well as plastic use.**

We also narrowed on a cost-effective shipping mechanism that consumed less paper and de-risked the business by roping in multiple vendors that replaced the single-point distribution network.

### STAYING AHEAD OF THE GAME

The Himalayan brand picked up a very early trend about two years ago, the shift from PET bottles to glass, prominent among premium hotels and restaurants. With conversations around the ban of plastic taking an upswing in 2019, the demand for glass bottles shot up and the brand was well positioned to capitalise on it.

**The development lead times for glass and its complexities are far higher than the common PET bottle, allowing us to race ahead of others easily with the Himalayan glass bottle.** Its sophisticated design, unique shape and mountain illustrations sit very elegantly on a dining table and adds value to the ambience of a room. The ahead-of-the-curve innovation played an important role in expanding our presence in the hospitality channel, allowing us to tap into the new generation of consumers with an eye for aesthetics, superior taste and a sense of adventure.

## Healthy beverages for a healthier India

With hydration becoming a complex category, we have developed our product portfolio to meet the full spectrum of hydration needs, ranging from basic thirst quenching to indulgent refreshment with flavoured waters.

**Tata Gluco Plus** was originally launched in the two southern Indian states of Tamil Nadu and Telangana, and subsequently rolled out to Odisha. During the year, we entered into new co-packing arrangements in West Bengal and NCR, with a focus on gradually enlarging the national reach of the hydration solution.

A new flavour, **Lychee** was also introduced to the existing portfolio and the popular '**Gas Minus Energy Plus**' proposition was brought back in a new TV commercial, building on a successful communication platform of the last few years.

**Tata Water Plus** delivered stellar results in the year, on account of an aggressive distribution strategy, improved brand salience, reformulated messaging and stringent cost control measures.

# PERFECTING THE ART OF DELIGHT

As a consumer-centric company, we are committed to exploring new products and opportunities to excite our patrons. With more sophisticated food and beverage options and the implementation of targeted initiatives, we are well positioned to cater to every consumption occasion.

## Tata Cha

### FOR THE LOVE OF TEA!

We conceptualised Tata Cha as a unique social destination that would embody the spirit of serving chai warmth day after day, cup after cup. Today, we have expanded to **7 stores in Bengaluru**, serving up a delightful array of hot and cold beverages, and comfort meals.

### Menu innovations

- Spicy festive menu
- Buns, which evoked nostalgia, the likes of bun omelette, bun jam and bun bhujia
- Meal recipes curated from different parts of India, such as Panchmel Dal with Masala Rice, Litti Chokha and Kheema Pav

### Pop-up shop

A highlight of the year was **a store Tata Cha put up in less than 36 hours**, at the Tata Sons' #Connect 2020 event, which was attended by the leadership of all Tata Group companies. The experience was very well received; and we ran a packed house throughout the event.

## Tata Cha turns 2 – The Big Cha Week

To mark our 2<sup>nd</sup> anniversary, 'The Big Cha Week' had in-house tea sommeliers conduct tea tasting sessions through the week. The event concluded with a Master Tea Tasting Ceremony at our new Cunningham Road store and was attended by over 100 patrons.

A resounding endorsement of our efforts in the fledgling out-of-home tea retail segment, Tata Cha was recognised as Tea Café of the Year by Restaurant India Congress (South Edition).

## Tata Starbucks

### PUTTING PARTNERS FRONT AND CENTRE

Our relationship with our Partners represents one of the key pillars of our business. Tata Starbucks has evolved greatly as a people-centric organisation.

Some of our key initiatives from the year include:

#### Diversity

We have achieved a **100% pay parity among our employees**. Further, we currently have 29% of our workforce as women and are aiming to push this number to 40% by 2022.

#### Inclusion

We expanded our processes to support the differently-abled partners, by collaborating with **NGO TRRAIN to build a robust internal culture**.

#### Benefits and self-development

- **Parental benefits** to all employees, **irrespective of their gender**, if they are the primary caregivers of the child
- First **Quick-Service Retail** brand to deploy a **5-day work week** for employees to use the additional time for their self-development
- **Financial assistance programme** to employees willing to buy a two-wheeler for an easier commute to work
- **Sabbaticals** to those who wish to spend more time pursuing their passion, caring for their family and/or serving the community

### FORAYING INTO GUJARAT

Every Starbucks store is known for the perfect 'third place' experience. This year, we entered Gujarat, opening **seven stores across three cities: Ahmedabad, Vadodara and Surat**. The interiors of all our stores continue to be reflective of the local art and culture.

### A DEEPER COMMITMENT TO GOING GREEN

As Tata Starbucks grows, so does our commitment to be a positive force in India. Sustainability is embedded in the fabric of our mission, as is evident from the first store opening in 2012, which used paper bags, paper sleeves and paper napkins made of recycled fibre.

#### Key sustainability initiatives

- **100% compostable and recyclable materials** across all our stores in India, eliminating all customer facing single-use plastics
- Introduced **glass serveware for food and beverage** consumed in-store, wooden cutlery and stirrers, compostable bioplastic lids, and straws and splash sticks for takeaway orders
- Launched **reusable hot and cold cups made from polypropylene**, identical to the Starbucks iconic cup – actively encouraging customers to 'Bring Their Own Tumbler' (BYOT), further reducing waste and incentivising customers with a discount

- Association with multiple NGOs listed by Food Safety and Standards Authority of India (FSSAI), under the Extended Producer Responsibility programme, ensures the **recycling of 100% waste generated across our stores**
- Coffee and Farmers Equity (C.A.F.E.) practice ensures that we **source sustainably grown and processed coffee** by evaluating the economic, social and environmental aspects of coffee production
- Achieved a Leader in Energy and Environmental Design (LEED) certification from Starbucks Seattle, for two of our stores – **Select Saket, Delhi and Vittal Mallya Road, Bengaluru**

### REAFFIRMING COFFEE AUTHORITY

#### #Starbucks150

In November 2019, we celebrated surpassing the big milestone of 150 stores in India with all our customers, by offering all short/tall beverages for Rs. 150 for a day across all stores in the country.

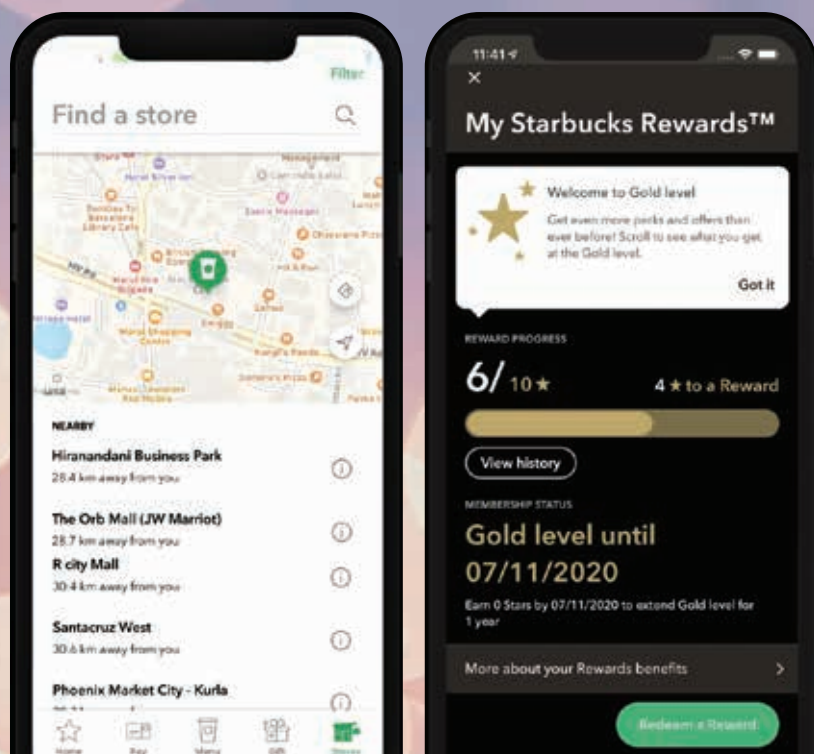

#### Barista Pride

In January 2020, we offered customers 174 unique handcrafted beverages developed by our partners in 174 stores. Our baristas conceptualised and created an innovative beverage unique to their store.

## Shaping coffee-forward experiences

Supporting our constant endeavour to elevate the experience for evolved coffee enthusiasts, we launched two popular international coffee innovations, Cortado and Blonde Espresso Roast (a secondary bean choice).

We celebrated five glorious years of our renowned 'My Starbucks Rewards' programme in August 2019. With a loyalty base of 7,90,000+ (as of March 2020), our customers continue to be our biggest brand evangelists.

## Process Advancements

# TRANSFORMING WITH AGILITY

We are proactively responding to the need for the business to realign systems and processes to be more agile and increase our effectiveness. We are strengthening our operational infrastructure and risk mitigation, while focusing on greater everyday efficiency and building capabilities for future growth.

### ACCELERATING DIGITAL

The scale and complexity of our business has led to scaling up digital capability. In order to optimise costs and scale up for growth, cloud adoption emerged as a business imperative for us.

Today, all our enterprise systems are on a secure, risk-managed, cloud-based digital platform. The shift from legacy architecture to cloud has translated into immediate gains for us, in terms of stability, flexibility, agility and scalability. This has made way for incubating new skills and capabilities, while rationalising costs.

### BOLSTERING CYBERSECURITY

A vital element of our migration exercise was our security landscape. Three-tier approach towards better security.

- Implement strong operational safeguards
- Establish and solidify a managed Security Operations Centre (SOC) that provides protective monitoring and speedy response and recovery
- Set out a Security Assessment Framework for Enterprise (SAFE) that provides an enterprise-wide cyber risk quantification (CRQ) platform

### TOWARDS BETTER SUPPLY CHAIN MANAGEMENT

As we scale our growth plans across each of our businesses, we are deploying world-class Distributor Management System (DMS) and Sales Force Automation (SFA) tools to ensure real-time visibility of sales,

track secondary sales dashboards, analyse sales data and make strategic decisions.

### ENABLING DATA-DRIVEN DECISION MAKING

The initiatives of the Internal Audit function across people, processes, technology and the organisation at large, has enabled informed business decisions, enhanced process and controls, strengthened compliance and delivered significant business value.

Our innovative enterprise-wide business analytics platform, **Tgo, provides us with insights on internal controls, cost-saving opportunities and statutory non-compliances. It operates in real-time, encompassing 80+ analytics and eight business domains** and facilitating more data-driven decisions. We are now in the process of extending this platform to the Foods and International businesses.

Tgo has been recognised on various internal and external forums and is awaiting copyright and trademark.

## 1,400

## Cyber Risk Quantification Champion of the Year

The Data Security Council of India (DSCI) recognised us as the Cyber Risk Quantification Champion of the Year at the Annual Information Security Summit 2019, for demonstrating the largest improvement in a year for the Asia-Pacific (APAC) region.

## Sharpening risk oversight

A dedicated risk team maintains oversight of our global risk road map and aligns it with business mission and strategy. The team has conducted extensive workshops across geographies to raise risk awareness, identify key regional and global risks, develop risk registers and document clear mitigation plans for mid- to long-term strategic and operational risks. These initiatives have injected more rigour to the reporting process of the Risk Management Committee. We are now in the process of extending this practice to the Foods business and other associate companies.

Tata Consumer was declared the Winner in the category of Best Risk Management Framework & Systems – FMCG, at The India Risk Management Awards 2020, organised by CNBC TV-18 and ICICI Lombard. Our efforts also gained recognition at the 3<sup>rd</sup> CRO Leadership Summit and Awards 2020.

## Sustainability FOR PEOPLE AND THE PLANET

Over the years, our community engagement has evolved from standalone philanthropic initiatives to long-term programmes closely linked to business priorities and material issues.

Our aim is to support sustainable livelihood and development programmes for one million people within our supply chain and communities.

## RIISING TO THE CLIMATE CHALLENGE

We are one of the six Indian companies to be recognised as **'Climate Change Rising Stars'** on the CDP (formerly the Carbon Disclosure Project) India 2019 A- list. The list incorporates strategies, disclosures, performance and action in the areas of carbon emission, to create a comprehensive benchmark that identifies a company's commitment to mitigate risks arising from climate change. CDP ratings have implications for Tata Consumer on the Bombay Stock Exchange Carbonex Index and Bloomberg terminals.

## SOURCING WITH PURPOSE

We are committed to **100% sustainable sourcing of all our global tea brands by 2020**. We are the co-founder and an active member of the Rainforest Alliance (RFA) and trustea. We promote sustainable agricultural practices across our supply chain and support our stakeholders in gaining certifications from both RFA and trustea.

Two recent independent studies found that **RFA certification was linked with higher household**

**incomes and lower rates of poverty for coffee-farming households**, compared to non-certified farms.

Through **trustea** in India, we are working with 49,000 smallholder tea growers, 460 tea estates, 0.3 million female workers and 0.25 million male workers, to address pertinent concerns, ranging from bettering working conditions, strengthening health and safety practices and promoting environment-friendly practices.

## Sustainability

### LEAVING A MARK. NOT A FOOTPRINT.

#### Sustainable packaging

With increased awareness among all stakeholders, sustainable packaging technologies and the trend towards recyclable and biodegradable packaging is gaining momentum. As a responsible organisation, we are working towards the development of **recyclable packaging to eliminate the use of multi-laminate packaging** for Tata Salt. We sold 21% of our Tata Salt products in recyclable packaging during the year, and plan to increase this figure substantially in FY 2020-21.

**21%**

of Tata Salt products sold in recyclable packaging in FY 2019-20

#### UK Plastics Pact

As part of the UK Plastics Pact, we are working with different agencies to generate structural designs for recyclable/compostable/reusable packaging. We have successfully completed trials for biodegradable fibre mesh, recyclable pouch and envelopes for cold infusions and are evaluating feasibility and timing of market launch. Our on-the-go cup will also be transitioned to recyclable alternatives.

#### Extended Producer Responsibility (EPR)

In India, large-scale plant trials and transit trials were conducted for recyclable laminates on various SKUs and we are exploring feasibility for market launch. Further, under the guidance of the Plastic Waste Management Rules India, we have framed an ERP Plan for collection and reprocessing of plastic packaging waste on a brand neutral basis across key markets. The target is to secure **100% collection and disposal of plastic packaging by 2020 in India.**

#### Tata Volunteering Week

As part of the Tata Volunteering Week (TVW) campaign in September 2019, our Chairman Mr. N. Chandrasekaran encouraged Tata employees to take up the Government of India's 2019 *Swachhata Hi Seva* (Service for Cleanliness) initiative. People across our subsidiaries and associate companies, along with our offices and factories, came out in large numbers to volunteer for this cause.

## EMPOWERING COMMUNITIES THROUGH SUSTAINABLE LIVELIHOODS

### Aranya Natural

Aranya Natural celebrated the 25<sup>th</sup> year of its journey with an international conference on 'Natural Dyes' in Munnar in February 2020.

Aranya Natural, a unit of Srishti Trust, is supported by Tata Consumer and works with designers to create natural dyed fabrics. This milestone of 25 years offered an **opportunity to showcase to the world that natural dyes are the way forward towards a sustainable future for fashion.**

### Improving Lives

The United Nations Children Fund and Ethical Tea Partnership's 'Improving Lives' programme aims to **tackle the systemic issues affecting women and children in 200+ tea estates in Assam**, spanning over one-fourth of formal tea estates in the region. More than 30,000 adolescent girls have been positively impacted through Adolescent Girls' Groups and life skills training. The quality of education, health and nutrition provided in these tea estates has improved through training and upskilling of all relevant stakeholders.

### DIVIDEND

Your Directors are pleased to recommend for the approval of the shareholders a dividend of Rs. 2.70 per equity share of the Company of Re. 1 each (270%) for the year ended March 31, 2020.

The Board recommended dividend based on the parameters laid down in the Dividend Distribution Policy.

Pursuant to Regulation 43A of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations"), the dividend distribution policy duly approved by the Board has been put up on the website of the Company and can be accessed at the link: <http://www.tataconsumer.com/docs/default-source/default-document-library/tgbl-dividend-policy342ebc881a2368caa65dff02001c5be1.pdf?sfvrsn=0>.

The dividend on Equity Shares fully paid is subject to the approval of the Shareholders at the Annual General Meeting ("AGM") scheduled to be held on Monday, July 6, 2020. The dividend once approved by the Shareholders will be paid on or after July 8, 2020.

If approved, the dividend would result in a cash outflow of Rs. 248.82 Crore. The total dividend pay-out works out to 47.5% (Previous Year: 45.5%) of the Company's standalone net profit.

The Register of Members and Share Transfer Books of the Company will remain closed from **June 22, 2020 to June 29, 2020 (both days inclusive)** for the purpose of payment of the dividend for the Financial Year ended March 31, 2020 and the AGM. Pursuant to the Finance Act, 2020, dividend income will be taxable in the hands of the Shareholders w.e.f. April 1, 2020 and the Company is required to deduct tax at source ("TDS") from dividend paid to the Members

at prescribed rates as per the Income Tax Act, 1961.

## TRANSFER TO RESERVES

The Board of Directors have decided to retain the entire amount of profit for FY 2019-20 in the profit and loss account.

## COMPANY'S PERFORMANCE

During the year under review, the Company has completed the acquisition of the Consumer Products Business (India Foods business) from Tata Chemicals Limited ("TCL"). Further details relating to this acquisition are given in a subsequent section of this Board report. The Company also acquired the branded business of Dhunseri Tea and Industries Limited which includes the leading local brands in Rajasthan, India – 'Lal Ghora' and 'Kala Ghora'.

The Consolidated and Standalone numbers, accordingly, includes the impact of these acquisitions.

## CONSOLIDATED PERFORMANCE

The Consolidated Revenues at Rs. 9,637 Crore reflect an increase of 33% mainly due to the inclusion of India Foods business. On a like to like basis, Revenue from operations from the beverages business at Rs. 7,573 Crore recorded a growth of 4% mainly due to improvement in branded business and in the Non-Branded business mainly due to commencement of instant coffee sales from Vietnam. Profit before exceptional items at Rs. 1,084 Crore includes the impact of acquisition of the Foods business and improved performance of the branded beverage business arising from gross margin improvements and good control of spends partially offset by higher spends behind brands. The non-Branded business has performed marginally behind previous year, mainly due to underperformance in Coffee plantations partially offset by improvement in pepper plantation and commencement of operations in Vietnam.

The Consolidated Profit after tax at Rs. 535 Crore recorded a growth after absorbing the impact of exceptional items. The Group Net Profit for the year remained flat while Group Net Profits net of minority interest at Rs. 460 Crore recorded a growth of 13% as compared to the previous year. Exceptional items for the year primarily relate to costs arising out of the acquisition of the food business and non-cash impairment loss on goodwill relating to the branded businesses in Australia and tea business in the

US. The accounting impairment has been recognised due to a combination of factors like COVID - 19 related impact on specific out of home business segments, changes in discount rates due to market conditions and revision in business plan sensitivities.

## STANDALONE PERFORMANCE

The Standalone Revenues at Rs. 5,690 Crore reflect an increase of 66% mainly due to the inclusion of India Foods business. On a like to like basis, the Revenue from the Beverages business at Rs. 3,626 Crore recorded a growth of 6% during the year under review. The growth is mainly attributable to volume and value growth across all major brands in its portfolio coupled with the benefit of completion of acquisition of the local branded business in Rajasthan. However, it is to be noted that the performance in India during March 2020 was impacted by the lockdown declared on account of COVID - 19 pandemic. Profit before exceptional items at Rs. 781 Crore was favorably impacted by the acquisition of the India Foods business and improved performances in branded beverages business arising from gross margin improvements partially offset by higher spends behind brands. Profit after tax at Rs. 524 Crore after absorbing impact of exceptional items reflects a growth of 27%.

## IMPACT OF COVID-19 ON THE PERFORMANCE

Commencing from the second half of March 2020, COVID-19 pandemic had an impact on the Indian and International business environment. The Company along with its subsidiaries and affiliates continued to manufacture and supply essential food and beverage items in the relevant markets. The demand for the Group's products for in-home consumption continues with some short term stocking up. However, extended lock down conditions have caused some adverse impact on sales due to disruptions in market openings and supply chain with impact being more pronounced in out-of-home sectors. Impact on future operations would to a large extent depend on how the pandemic develops and the resultant impact on businesses.

## SCHEME OF ARRANGEMENT FOR THE DE-MERGER OF CONSUMER PRODUCTS BUSINESS OF TATA CHEMICALS LIMITED INTO THE COMPANY

Pursuant to the Scheme of Arrangement amongst Tata Chemicals Limited ("TCL") and the Company and their respective shareholders and creditors ("Scheme") under Sections 230 to 232 and other applicable provisions of

## Boards Report (continued)

the Companies Act, 2013 (“ACT”) duly sanctioned by the Hon’ble National Company Law Tribunal, Kolkata and Mumbai Bench vide Orders dated January 8, 2020 and January 10, 2020 respectively, TCL demerged its Consumer Products Business and the same is vested with the Company with effect from Appointed Date i.e. April 1, 2019. The Scheme came into effect on February 7, 2020, i.e. the day on which both the Orders were filed with the respective Registrar of Companies, and pursuant thereto the entire Consumer Products Business and all the assets and liabilities, duties and obligations as mentioned under the Scheme have been transferred to and vested in the Company with effect from April 1, 2019.

## PERFORMANCE HIGHLIGHTS OF KEY OPERATING SUBSIDIARIES, ASSOCIATES AND JOINT VENTURES

### Subsidiaries

**Tata Consumer Products UK Group Ltd, UK (TCPG)**, substantially reflects the financial performance of the Tetley business and a few other international brands. Revenue from operations, in underlying terms and excluding the impact of the Czech Business exit, was flat as compared to the prior year. While decline in everyday black tea category and higher competitive intensity in some markets continue, sales increases were experienced in other markets. In developed markets where TCPG operates, everyday black tea category is in decline with growth in non-black tea categories and our focus is to increase our presence in these growing categories.

UK and Canada, which are large markets for TCPG, recorded a good growth in volumes whereas adverse performances were experienced in markets like US, Australia and Europe (excluding UK). Most of the countries reflected good retail sales in the last month of the fiscal due to short term stocking up resulting from COVID-19 pandemic. However, our Food service and Out-of-Home businesses mainly in US and Australia have been impacted due to the lockdown. Profit before tax and exceptional items reflects a robust increase mainly due to gross margin expansion, lower promotional spends and good control over spends offset partially by higher investment behind brands. Exceptional items include restructuring costs and non-cash impairment loss on goodwill relating to the branded businesses in Australia and tea business in the US. The accounting impairment arose due to a combination of factors like COVID-19 related impact on specific out-of-home business segments, changes to discount rates due to market conditions and revision in business plan sensitivities.

Further, during the year, TCPG has increased its shareholding in Kahutara Holdings Limited from 65% to 100% at a nominal value to rationalize the holding structure earlier created for the Russian business, from which we exited a couple of years back.

**Tata Coffee Limited** reported marginally improved revenue from operations. The improvement in turnover is

## Boards Report (continued)

mainly due to improved volume in coffee plantations and instant coffee. The profit before tax was impacted due to underperformance primarily in coffee plantations, impact of lockdown associated with COVID-19 pandemic and lower realization in Coffee extraction business which were partially offset by increased profitability from pepper crop. Profit after tax, however, is marginally higher as compared to previous year mainly due to reduction of tax rates in India.

**Tata Coffee Vietnam Company Limited**, 100% subsidiary of Tata Coffee Limited, which has a state-of-the-art freeze-dried instant coffee plant with an annual capacity of 5000MT, has started commercial operations in May'2019. The company has successfully stabilized its operations and has continuously improved its capacity utilization quarter on quarter, throughout the year. Freeze Dried coffee is a growing segment worldwide in the premium Instant Coffee Segment. The business generated revenue of Rs. 126 Crore during the year FY 2019-20.

**Eight O'Clock Coffee Limited (EOC), US** – Revenue growth was flat as compared to prior year mainly due to improvements in private label sales offset by underperformance in K-Cup sales. However, profits before tax and profit after tax is higher as compared to the previous year mainly due to gross margin expansion coupled with lower weight of promotions and lower advertisement expenditure.

**Tata Tea Extractions Inc. US**, had a stable performance as compared to the previous year notwithstanding the impact of the COVID 19 pandemic. For the year ended March 31, 2020, sales and operating profits are in line with the previous year. However, Profit After Tax was marginally impacted because of lower dividend income received during the year.

### Associates

**Amalgamated Plantations Private Limited ("APPL"), India** - Revenue for the year is higher by 3% aided by higher orthodox tea sales (volumes and realisation) whereas CTC recorded lower sales. The operating loss in APPL has reduced due to better sales realisations achieved. The company has reported a loss due to the high debt levels and resultant finance costs. Various restructuring options are being evaluated.

**Kanan Devan Hills Plantations Company Private Limited ("KDHP"), India** - Revenue from operations is flat against previous year, mainly due to lower volumes offset by

improved realization. However, Profit before tax has reduced as compared to the previous year primarily due to higher employee costs. The crop production for the year was impacted by extensive frost damage followed by drought conditions earlier during the year.

**Tata Starbucks Private Limited** – our joint venture with Starbucks Corporation, reflected a growth of 21% for the year due to sales growth in stores coupled with store expansion. The sales growth was however subdued on account of the COVID-19 pandemic which resulted in store close-down across cities. During the year, Tata Starbucks has added 39 stores taking the overall count to 185 stores as at March 31, 2020. Tata Starbucks is now present in 11 cities across India. The business achieved high store growth across formats – airports, highways and smaller footprint stores. Profitability was adversely impacted by reversal of deferred tax assets due to tax rate changes, implementation of the new accounting standard for leases and also to some extent by the impact of lockdown associated with COVID-19 pandemic, whereas previous year had a benefit arising from recognition of deferred tax assets.

After the year end, post the relaxation in the lockdown conditions, more than 30 stores in Mumbai, Delhi, NCR, Bengaluru, Chennai, Pune, Kolkata and Surat have opened for delivery and takeaway.

**NourishCo Beverages Limited**, our 50:50 Joint Venture with Pepsico in India, reported a lower revenue as compared to the previous year mainly due to the COVID-19 related disruptions and rationalization of product range. However, profitability has been maintained at previous years' levels due to good cost management. The Company has initiated the process for exiting the Joint-Venture arrangement and for the buy-out of the other JV partner stake in this company.

### Companies which have become or ceased to be Subsidiaries, Associates and Joint Ventures

During the FY 2019-20, Coffee Trade LLC, the Company's step-down subsidiary, which was incorporated as part of restructuring of operations in Russia, was under liquidation consequent to completion of the restructuring. Tata Consumer Products Overseas Holdings Limited, UK the Company's subsidiary disposed of 100% of the equity shareholding in Tata Global Beverages Czech Republic a.s. No other company became or ceased to be a subsidiary, joint venture or associate during FY 2019-20.

The names of the following subsidiaries were changed during the year 2019-20 and till date of this report:

- a) Tata Consumer Products UK Group Limited from Tata Global Beverages Group Limited.
- b) Tata Consumer Products GB Limited from Tata Global Beverages GB Limited.
- c) Tata Consumer Products Capital Limited from Tata Global Beverages Capital Limited.
- d) Tata Consumer Products Overseas Holdings Limited from Tata Global Beverages Overseas Holdings Limited.
- e) Tata Consumer Products US Holdings Inc from Tata Global Beverages US Holdings Inc.
- f) Tata Consumer Products Canada Inc from Tata Global Beverages Canada Inc.
- g) Tata Consumer Products Australia Pty. Limited from Tata Global Beverages Australia Pty. Limited.

For further analysis on the consolidated performance, attention is invited to the section on Management Discussion and Analysis, notes to the consolidated financial statements and Form AOC 1.

## **MATERIAL CHANGES AND COMMITMENT AFFECTING THE FINANCIAL POSITION**

### BOARD OF DIRECTORS AND MEETINGS

The members of the Company's Board of Directors are eminent persons of proven competence and integrity. Besides experience, strong financial acumen, strategic astuteness and leadership qualities, they have a significant degree of commitment towards the Company and devote adequate time to the meetings and preparation. In terms of requirement of Listing Regulations, the Board has identified core skills, expertise and competencies of the Directors in the context of the Company's businesses for effective functioning, which are detailed in the Corporate Governance Report.

The Board meets at regular intervals to discuss and decide on Company / business policy and strategy apart from other Board business. The Board exhibits strong operational oversight with regular presentations in quarterly meetings. The Board / Committee meetings are pre-scheduled and a tentative annual calendar of the Board and Committee meetings is circulated to the Directors well in advance to help them plan their schedule and ensure meaningful participation in the meetings. Only in case of special and urgent business, if the need arises, the Board's/Committee's approval is taken by passing resolutions through circulation or by calling Board/Board Committee meetings at short notice, as permitted by law.

The Company has complied with Secretarial Standards issued by the Institute of Company Secretaries of India on Board meetings and Annual General Meetings.

The agenda for the Board and Committee meetings includes detailed notes on the items to be discussed to enable the Directors to take an informed decision.

The Board of Directors had held 7 (seven) meetings during FY 2019-20. For further details, please refer to the Corporate Governance Report, which forms part of this Annual Report. The intervening gap between the meetings was within the period prescribed under the Act and the Listing Regulations.

## INDEPENDENT DIRECTORS' DECLARATION

The Independent Directors have submitted a declaration that they meet the criteria of independence and that they are not aware of any circumstance or situation, which exist or may be reasonably anticipated, that could impair or impact their ability to discharge their duties with an objective independent judgment and without any external influence, pursuant to Regulation 25 of the Listing Regulations.

Further, declaration on compliance with Rule 6(3) of the Companies (Appointment and Qualification of Directors) Rules, 2014, as amended by Ministry of Corporate Affairs ("MCA") Notification dated October 22, 2019, regarding the requirement relating to enrollment in the Data Bank created by MCA for Independent Directors, has been received from all the Independent Directors.

Pursuant to the provisions of Section 149 of the Act, the independent directors have submitted declarations that each of them meet the criteria of independence as provided in Section 149(6) of the Act along with Rules framed thereunder and Regulation 16(1)(b) of Listing Regulations. In terms of Regulation 25(8) of the Listing Regulations, the Independent Directors have confirmed that they are not aware of any circumstance or situation which exists or may be reasonably anticipated that could impair or impact their ability to discharge their duties.

Based on the confirmation / disclosures received from the Directors, the following Non-Executive Directors are Independent as on March 31, 2020:

- 1) Mr. Bharat Puri
- 2) Mrs. Shikha Sharma
- 3) Mr. S. Santhanakrishnan
- 4) Mr. Siraj Azmat Chaudhry

## COMMITTEES OF THE BOARD

- 7) Scheme Implementation Committee

During FY 2019-20, Ethics & Compliance Committee and Committee for Special Projects were merged with Audit Committee whereas M&A and Divestiture Committee was merged with the Board. The Scheme Implementation Committee, being a Special Committee formed for implementation of the Scheme of Arrangement with Tata Chemicals Limited, has been dissolved after the allotment of shares pursuant to the Scheme in March 2020.

Details of all the Committees along with their main terms, composition and meetings held during the year under review are provided in the Report on Corporate Governance, a part of this Annual Report.

## SELECTION AND PROCEDURE FOR NOMINATION AND APPOINTMENT OF DIRECTORS

The Company has a Nomination and Remuneration Committee ("NRC") which is responsible for developing competency requirements for the Board, based on the industry and strategy of the Company. The Board composition analysis reflects an in-depth understanding of the Company, including its strategies, environment, operations, financial condition and compliance requirements.

The NRC makes recommendations to the Board in regard to appointment /re-appointment of Directors and Key Managerial Personnel ("KMP"). The role of the NRC encompasses conducting a gap analysis to refresh the Board on a periodic basis, including each time a Director's appointment or re-appointment is required. NRC is also responsible for reviewing the profiles of potential candidates vis-à-vis the required competencies, undertake a reference and due diligence and meeting of potential candidates prior to making recommendations of their nomination to the Board. The appointee is also briefed about the specific requirements for the position including expert knowledge expected at the time of appointment. The Nomination & Remuneration policy of the Company is available at: <https://www.tataconsumer.com/investors/policies?reload>.

## Boards Report (continued)

The Company's governance guidelines on Board effectiveness cover aspects relating to composition and role of the Board, Chairman and Directors, Board diversity, term of Directors, retirement age and Committees of the Board. The guidelines also cover key aspects relating to nomination, appointment, induction and development of Directors, Directors remuneration, oversight on subsidiary performances, code of conduct, Board effectiveness reviews and various mandates of Board committees. As per the Governance Guidelines adopted by the Board, the retirement age for Managing/Executive Directors is 65 years, Non-Executive (Non-Independent) Directors is 70 years and Non-Executive, Independent Directors is 75 years.

### CRITERIA FOR DETERMINING QUALIFICATIONS, POSITIVE ATTRIBUTES AND INDEPENDENCE OF A DIRECTOR

In terms of the provisions of Section 178(3) of the Companies Act, 2013 and Regulation 19 of the Listing Regulations, the NRC has formulated the criteria for determining qualifications, positive attributes and independence of Directors, the key features of which are as follows:

- **Qualifications** – The Board nomination process encourages diversity of thought, experience, knowledge, age and gender. It also ensures that the Board has an appropriate blend of functional and industry expertise.
- **Positive Attributes** – Apart from the duties of Directors as prescribed in the Act, the Directors are expected to demonstrate high standards of ethical behavior, communication skills and independent judgment. The Directors are also expected to abide by the respective Code of Conduct as applicable to them.
- **Independence** – A Director will be considered independent if he / she meets the criteria laid down in Section 149(6) of the Act, the Rules framed thereunder and Regulation 16(1)(b) of the Listing Regulations.

### ANNUAL EVALUATION OF THE BOARD, ITS COMMITTEES AND INDIVIDUAL DIRECTORS

The Board of Directors has carried out an annual evaluation of its own performance, Board Committees, and individual directors pursuant to the provisions of the Act and the Listing Regulations.

The Board evaluated its performance after seeking inputs from all the directors on the basis of criteria such as the Board composition and structure, effectiveness of board processes, information and functioning, etc. The performance of the Committees was evaluated by the Board after seeking inputs from the committee members on the basis of criteria such as the composition of committees, effectiveness of committee meetings, etc. The above criteria are as provided by the Guidance Note on Board Evaluation issued by the Securities and Exchange Board of India.

The Chairman of the Board had one-on-one meetings with the Independent Directors and the Chairman of NRC had one-on-one meetings with the Executive and Non-Executive (Non-Independent) Directors. These meetings were intended to obtain Directors' inputs on effectiveness of the Board/Committee processes.

The Board and the NRC reviewed the performance of individual directors on the basis of criteria such as the contribution of the individual director to the board and committee meetings like preparedness on the issues to be discussed, meaningful and constructive contribution and inputs in meetings, etc.

In a separate meeting of independent directors, performance of non-independent directors and the board as a whole was evaluated. The Independent Directors in the said meeting also evaluated the quality, quantity and timeliness of flow of information between the Company management and the Board that is necessary for the Board to effectively and reasonably perform their duties. Additionally, the Chairman of the Board was also evaluated on key aspects of his role, taking into account the views of executive directors and non-executive directors in the aforesaid meeting. The above evaluations were then discussed in the board meeting that followed the meeting of the independent directors and NRC, at which the performance of the Board, its Committees, and individual directors was also discussed. Performance evaluation of independent directors was done by the entire board, excluding the independent director being evaluated.

### REMUNERATION POLICY

Pursuant to the provisions of Section 178(3) of the Act, and Regulation 19 of the Listing Regulations, the NRC has formulated a policy relating to the remuneration for the Directors, KMP, Senior Management and other employees.

The philosophy for remuneration is based on the commitment of fostering a culture of leadership with trust. While formulating this policy, the NRC has considered the factors laid down in Section 178(4) of the Act which are as under:

- That the level and composition of remuneration is reasonable and sufficient to attract, retain and motivate Directors of the quality required to run the company successfully;
- Relationship of remuneration to performance is clear and meets appropriate performance benchmarks; and
- Remuneration to Directors, key managerial personnel and senior management involves a balance between fixed and incentive pay reflecting short and long-term performance objectives appropriate to the working of the Company and its goals.

The key principles governing the Remuneration Policy are as follows:

- Market competitiveness;
- Role played by the individual;
- Reflective of size of the company, complexity of the sector/ industry / Company's operations and the Company's capacity to pay;
- Consistent with recognised best practices; and
- Aligned to any regulatory requirements.

In accordance with the policy, the Managing Director, Executive Director, KMPs, Senior Management and employees are paid fixed salary which includes basic salary, allowances, perquisites and other benefits and also annual incentive remuneration / performance linked incentive subject to achievement of certain performance criteria and such other parameters as may be considered appropriate from time to time by the NRC and the Board. The performance linked incentive is driven by the outcome of the performance appraisal process and the performance of the Company.

## REMUNERATION FOR INDEPENDENT DIRECTORS AND NON-INDEPENDENT, NON-EXECUTIVE DIRECTORS

The Non-Executive Directors, including Independent Directors, are paid sitting fees for attending the meetings of the Board and Committees of the Board. As per the policy, the overall remuneration (sitting fees and commission) should be reasonable and sufficient to attract, retain and motivate Directors aligned to the requirements of the Company including considering the challenges faced by the Company and its future growth imperatives. The remuneration should also be reflective of the size of the Company, complexity of the business and the Company's capacity to pay the remuneration.

The Company pays a sitting fee of Rs. 30,000 per meeting per Director for attending meetings of the Board, Audit, Nomination and Remuneration and Executive Committees (Rs.20,000 in case of Mr. N. Chandrasekaran, Chairman and Mr. Harish Bhat, Non-Executive Director, being the employee of other Tata Companies). For meetings of all other Committees of the Board, a sitting fee of Rs. 15,000 per meeting per Director is paid (Rs.10,000 in case of Mr. Harish Bhat, Non-Executive Director, being the employee of other Tata Companies). Within the ceiling as prescribed under the Act, the Non-Executive Directors including Independent Directors are also paid a commission, the amount whereof is recommended by the NRC and approved by the Board. The basis of determining the specific amount of commission payable to a Non-Executive Director is related to his attendance at meetings, role and responsibility as Chairman or member of the Board / Committees and overall contribution as well as time spent on operational matters other than at the meetings. The shareholders of the Company had approved payment of commission to the Non-Executive Directors at the Fifty – Fifth Annual General Meeting held on July 5, 2018 for each financial year to be distributed among the Directors in such manner as the Board of Directors may, from time to time, determine within the overall maximum limit of 1% (one percent) per annum or such other percentage as may be specified by the Act, from time to time. No Stock option has been granted to any Director.

As a policy, Mr. N. Chandrasekaran, Chairman, has abstained from receiving commission from the Company.

## Boards Report (continued)

Further, in line with the internal guidelines of the Company, no payment is made towards commission to the Non-Executive Directors of the Company, who are in employment with any other Tata Company. Accordingly, no commission is paid to Mr. Harish Bhat, Non- Executive (Non-Independent) Director.

### FAMILIARISATION PROGRAMME FOR INDEPENDENT DIRECTORS

As trustees of shareholders, independent directors play a pivotal role in upholding corporate governance norms and ensuring fairness in decision making. Being experts in various fields, they also bring independent judgement on matters of strategy, risk management, controls and business performance.

At the time of appointing a new Independent Director, a formal letter of appointment is given to the Director, inter alia, explaining the role, duties and responsibilities of the Director. The Director is also explained in detail the compliances required from him / her under the Act, SEBI Regulations and other relevant regulations.

By way of an introduction to the Company, presentations are also made to the newly appointed Independent Director on relevant information like overview of the Company's businesses, market and business environment, growth and performance, organisational set up of the Company, governance and internal control processes.

Ongoing familiarisation aims to provide insights into the Company and the business environment to enable all the Independent Directors to be updated of newer challenges, risks and opportunities relevant in the Company's context and to lend perspective to the strategic direction of the Company.

The details for familiarisation programme of the Independent Directors are put up on the website of the Company. As required under Regulation 46(2)(i) of the Listing Regulations, the details of familiarisation programmes conducted during FY 2019-20 is also put on the Company's website and the same can be accessed at the link : <https://www.tataconsumer.com/investors/Board-Of-Directors-List/familiarization-programme?reload>

### BOARD DIVERSITY

The Company recognizes and embraces the importance of a diverse board in its success. The Company believes that a truly diverse board will leverage differences in thought,

The Report of the Secretarial Auditor for FY 2019-20 is attached herewith as Annexure 4. There are no qualifications, observations or adverse remark or disclaimer in the said report.

## COST AUDITORS

Your Board has appointed M/s Shome and Banerjee, Practicing Cost Accountants (Firm Registration Number: 000001) as Cost Auditors of the Company for conducting cost audit for the FY 2020-21. A resolution seeking

approval of the members for ratifying the remuneration payable to the Cost Auditors for FY 2020-21 is provided in the Notice of the ensuing Annual General Meeting.

## COST RECORDS

The Cost accounts and records as required to be maintained under section 148 (1) of Act are duly made and maintained by the Company.

## RISK MANAGEMENT

The Board of Directors of the Company has formed a Risk Management Committee to frame, implement, and monitor the risk management plan for the Company. The Committee is responsible for reviewing the risk management plan and ensuring its effectiveness. The Committee considers the risks that impact mid-term to long-term objective of the business, including those reputational in nature. The Company has an elaborate Risk Charter and Risk policy defining risk management governance model, risk assessment and prioritization process. The Risk Management Committee reviews and monitors the key risks and their mitigation measures periodically and provides an update to the Board on Company's risks outlined in the risk registers. The Audit Committee has additional oversight in the area of financial risks and controls.

Additionally, a third-party organization has benchmarked the Company's risk management practice with various companies in India and globally and opined it as a leader in risk management practice in the FMCG category. The Company was declared as the winner in the category Best Risk Management Framework & Systems – FMCG, at the 6th edition of The India Risk Management Awards 2020 by CNBC TV-18 and ICICI Lombard. These awards recognize those organizations and teams that have significantly added to the understanding and practice of risk management. It also won the CRO Leadership award 2020 from UBS Forum.

## VIGIL MECHANISM / WHISTLE BLOWER POLICY

The Company's vigil mechanism allows the Directors and employees to report their concerns about unethical behaviour, actual or suspected fraud or violation of the code of conduct /business ethics. The vigil mechanism provides for adequate safeguards against victimisation of the Director(s) and employee(s) who avail this mechanism. No person has been denied access to the Chairman of the Audit Committee.

## Annual Report on CSR Activities

### 1. A brief outline of the company's CSR policy, including overview of projects or programs proposed to be undertaken and a reference to the web-link to the CSR policy and projects or programs.

#### Natural Foods & Beverages Policy

Tata Consumer Products Limited (formerly Tata Global Beverages Limited) is committed to be the most admired natural foods & beverage company in the world by making a big and lasting difference through Sustainability and Corporate Social Responsibility. We shall achieve this by being the consumer's first choice in sustainable foods & beverage production and consumption.

The Company shall focus on Climate Change, Water Management, Sustainable Sourcing, Waste Management and Community Development. Towards community development, we shall undertake programs focused on education and skills, healthcare and women empowerment. We shall actively participate in TATA Group activities and programs for volunteering and affirmative action.

We shall achieve this by being knowledgeable, responsive and trustworthy, and by adopting environmentally and socially-friendly technologies, business practices and innovation, while pursuing long-term growth aspirations and the enhancement of stakeholder value.

The Company aims to support sustainable livelihood and development programs for 1 million people in its supply chain and for the communities.

The Corporate Social Responsibility (CSR) Policy of the Company is available at link <https://www.tataconsumer.com/investors/policies?reload>

#### Overview of projects implemented during 2019-20:

##### Livelihood and Skill Development

The Company provides livelihood and skill development to differently abled youths through TGBL foundation, a separate Trust. TGBL foundation collaborates with Srishti Trust which enables learning and economic opportunities for these youth, through its training and rehabilitation initiatives in Munnar, Kerala. Srishti Trust

comprises of 6 units - DARE, Nisarga (strawberry unit), Athulya (manufactures handmade paper and paper products), The Deli (confectionery unit), The Garden Project (fruits, vegetables and flowers cultivation) and Aranya Naturals (natural dye and special effects). Aranya Natural was selected for the Nari Shakti Purashkar – the highest Civilian honour for Indian women in 2018. Aranya Naturals celebrated its 25th year of enterprise with an international conference on 'Natural Dyes' in Munnar in Feb 2020.

The Company also supports Unnati (a Bangalore based NGO) is a vocational training and transformation program which helps the underprivileged youth to secure stable employment. Unnati is a 50-day vocational training program offered at a subsidized cost to the underprivileged less educated, unemployed and economically backward youth with an assured job.

##### Healthcare

Providing affordable healthcare has always been a key community intervention for TCPL. The Referral Hospital and Research Centre (RHRC) Chubwa in Assam provides free or subsidized medical facilities to general population and the tea communities. The eHub, located at RHRC for the e-Healthcare Project in collaboration with Hewlett Packard, provides video consultation to estate hospitals. The hospital is recognized for safety, ethics, professionalism, and affordability. It has the lowest infant mortality rate (IMR) in the industry and in the state of Assam.

The Company supports the St. Jude's India Child Care Centres in Kolkata to extend help to the cancer affected children. SJICCC provides needy children under treatment for cancer with a clean, safe, hygienic place to stay, nutritional support, transportation to hospital for treatment, as well as recreation, education and counselling.

##### Women Empowerment

The UNICEF – ETP Improving Lives programme aims to tackle the systemic issues affecting women and children in 206 tea estates of Assam, which is over one-fourth of formal tea estates in the region. Following a successful first phase that strengthened child protection, this phase has expanded to education, health and nutrition, and Water & Sanitation challenges.

## Annexure 1 to the Board’s Report (continued)

The program is funded by TCPL, Starbucks, Tata Trust, and others. Adolescent girls have the knowledge, skills and confidence to protect themselves, increase the options and enable them to make informed decisions about their future. At the end of the first phase of the programme, we exceeded our initial targets by ensuring that over 33,000 adolescent girls have the knowledge, skills and confidence to protect themselves, increase the options open to them and enable them to make informed decisions about their future. Approximately 30,000 community members are equipped to protect children from violence, abuse and exploitation through meetings and awareness drives within the community. To complement these community-based interventions, UNICEF and ETP have made significant progress by influencing policies and systems at all levels of government and industry to strengthen child protection measures and to ensure that these changes are sustainable and scalable.

### Project Jalodari

Project Jalodari is the water management program by Tata Consumer Products that has the aim to create sustainable water sources, raise awareness and build capacities on water and sanitation in the communities in which we operate. It is a multi-sectoral intervention that integrates livelihood with water and food security, sustainable agriculture, sustainable forestry and renewable energy into the developmental paradigm of the community. Tata Consumer Products is partnering with Tata Trust and Tata Water Mission to develop Project Jalodari which is being implemented by Himmotthan Society as a CSR initiative in Paonta Sahib region in Himachal Pradesh and with Centre for Microfinance and Livelihood (CML) in Assam.

### Tata Chemicals Society for Rural Development (TCSRDR)

The Tata Chemicals Society for Rural Development (TCSRDR) was established by Tata Chemicals Limited (TCL) in 1980 to fulfill the social responsibilities of TCL to communities neighboring the company’s manufacturing plant in Mithapur (Gujarat). It works to address key concerns of communities and to preserve the environment and bio-diversity. It also works towards fulfillment of various social and environmental initiatives related to UN Sustainable Development Goals (SDG). TCSRDR believes in joining hands with the community and for this purpose, it develops and strengthens community-based organisations (CBOs) in the form of self-help groups, user groups, farmers’ groups, youth clubs, etc.

### Coorg Foundation

The Coorg Foundation was established in the year 1994 with the vision of the late Mr Darbari Seth, Chairman of Tata Coffee. The vision of Coorg Foundation is to promote and secure the upliftment, wellbeing and welfare of the people of Coorg, and the mission is to support the people of Coorg through healthcare , education, sports , culture and ecological interventions. Swastha, the Center for special education is a unit of the Coorg Foundation and it supports the noble cause of developing and educating children with special needs in Kodagu district.

### Affirmative Action

TCPL has a clear focus and strategic approach towards driving Affirmative Action (AA). This means that the organization is committed to directly conducting and supporting initiatives for socially and economically disadvantaged sections in the country at large, and in particular the AA initiatives are specifically focused on the Scheduled Caste and Scheduled Tribe communities in India. The Tata Affirmative Action Programme has defined criteria and the processes are driven through 4Es – Employment, Employability, Entrepreneurship and Education.

**I have also examined** compliance of Secretarial Standards on Board of Directors (SS-1), General Meetings (SS-2) made effective July 1, 2015 and Dividend (SS-3) made effective January 1, 2018 (voluntary adoption by the Companies) issued by the Institute of Company Secretaries of India.

During the period under review, the Company has complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. mentioned above.

### **I further report that:**

The Board of Directors of the Company is duly constituted with proper balance of Executive Directors, Non-Executive Directors and Independent Directors. Changes have taken place in the composition of the Board of Directors during

the period under review. Adequate notice is given to all the directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent at least seven days in advance, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting. Video/ Teleconferencing facilities are used as and when required to facilitate the Directors at other locations to participate in the meeting.

The dissenting views of the member(s) of the Board of Directors and Committees thereof were captured and minuted whenever arises. However, no such cases has arisen during the period under review.

**I further report that,** there are adequate systems and processes in the company commensurate with the size and operations of the company to monitor and ensure compliance with applicable laws, rules, regulations and guidelines.

**I also Report that** during the year under review, the Company had entered a Scheme of Arrangement (herein after referred as "**Scheme**") with Tata Chemicals Limited ("TCL") and its respective shareholders and creditors as per the provisions of the Companies Act, 2013 and Amendments thereof in order to recognize and reconstruct the business of the Company and TCL under the said Scheme by demerging the Consumer Products Business from TCL and Vesting the same with the Company as per the Scheme.

Pursuant to the Hon'ble National Company Law Tribunal (NCLT) approved Scheme, the name of the Company has changed to **Tata Consumer Products Limited** effective February 10, 2020 and there was a change in object clause of the Memorandum of Association of the Company by addition / alteration of some objects to cover the Consumer Products Business.

The Equity Shares had been issued and allotted to the shareholders of TCL as per the Hon'ble NCLT approved Scheme and duly been listed with the concerned Stock Exchanges.

# Management Discussion and Analysis

## ECONOMIC REVIEW

### Global

The world economy grew by 2.9% in 2019 compared with the 3.6% in the previous year, the lowest since the global financial crisis, as per the International Monetary Fund (IMF). The US economy grew by 2.3%, while China and India grew by 6.1% and 4.2%, respectively. The slowdown has been more pronounced in emerging economies like China, India and Brazil, among others. Weak business confidence due to rising trade barriers between the US and China, geopolitical tensions in other regions and fears of a no-deal Brexit, have been key factors leading to the slow growth in 2019. Accommodative easing of monetary policy by central banks of several countries and reform initiatives by governments arrested the slowdown to an extent. There has also been increasing concerns over climate change, and governments and businesses are being called to act more responsibly. In response to these factors, organisations globally are focusing on being more agile, being closer to consumers and conducting business in a more sustainable and responsible manner.

### Outlook

The initial outlook for the ensuing year was for stronger growth, especially over the subdued 2019 economic performance, buoyed by favourable news on US-China trade negotiations, the UK transitioning to a new economic relationship with Europe by December 2020 and a healthy performance of emerging markets. However, 2020 saw a significantly changed scenario with the outbreak of the COVID-19 pandemic.

This was followed by strong actions by the governments across the world in the form of a global lockdown to stem the rate of spread of the disease. Despite relief measures provided in the form of easing of monetary policy by central banks and fiscal packages announced by some governments, we are expected to see a contraction in global economy. Currently, the analyst consensus is a degrowth this year and then a gradual recovery next year – however, it is marked with uncertainty depending on the ground situation, that is, the duration of lockdown, growth in infection rate with the opening up of economies, timeline for development of vaccine and others.

### India

According to the IMF, the Indian economy grew by 4.2% in FY 2019-20 due to sharper than expected slowdown in domestic demand and lingering stress in the Non-Banking Financial Company (NBFC) sector. The sluggish demand is

attributed to the decline in consumption growth (tightening of credit terms and poor consumer sentiment), investment and exports. The Government of India also announced a number of policy measures to boost investment, such as reduction in corporate tax rate from 30% to 22%, which was complemented by the easing of repo rates by the Reserve Bank of India. India's rank in the World Bank's Ease of Doing Business index has improved from 77 last year to 63 this year.

### Outlook

Similar to the global outlook, the Indian economy was projected to grow at a stronger pace in FY 2020-21 than the previous year, supported by monetary and fiscal stimulus and lower oil prices. However, the unprecedented COVID-19 pandemic, and the subsequent nationwide lockdown by the Government, along with other necessary measures to contain the pandemic, have made experts revise their forecasts significantly, with possible contraction of the Indian GDP in Q1 FY 2020-21. In the short term, the lockdown could also potentially lead to a financial distress, both for consumers and companies, including disruptions in money supply and general liquidity.

### COVID-19 Impact on the Indian FMCG Industry

In the initial days post the lockdown, there were instances of panic buying (though at lower levels as compared to international markets), supply shocks in the system with unavailability of labour (impacting all areas of value chain – manufacturing, logistics and delivery) and streamlining of retail operations including e-commerce. The situation on the ground has however been steadily improving.

The pandemic has caused disruption in the industry and we will see long term shifts in consumer behaviour. The digital disruption can be seen across segments – whether it is in terms of increase in consumption of online content (news, entertainment, games and learning) or stronger demand for online delivery (where it is relatively easier to maintain social distancing). There is also an upswing in sales of general trade or 'kirana' outlets with the restriction on travel and closing of shopping malls or complexes during the lockdown.

**In the short term, there will be higher growth and demand of Staple products (such as Salt, Pulses, Tea and Coffee – also part of essential commodities) for in-home consumption, in comparison to discretionary items.**

In the short term, we expect increased at-home consumption with a reduction in orders for take-outs or deliveries. Potentially, there will be a stronger focus on quality and hygiene – resulting in consumer preference shifting from unbranded to branded options. Consumers will proactively look at health & wellness options in their purchases, including traditional and preventive measures. There will be higher growth and demand of Staple products (such as Salt, Pulses, Tea and Coffee – also part of essential commodities) for in-home consumption, in comparison with discretionary items – which is in direct contradiction to the trend witnessed in the last few years. We will also see the rise of consumers who are more price and value conscious in their choices, given the uncertainty of the COVID-19 pandemic.

## COMPANY OVERVIEW

### Creation of Tata Consumer Products Limited

In May 2019, we announced the scheme of arrangement, according to which the Consumer Products Business of Tata Chemicals would be merged with Tata Global Beverages Limited, and the new combined entity would be renamed as Tata Consumer Products Limited (Tata Consumer) to reflect the larger portfolio of the Company and its vision to expand into multiple categories beyond just Food & Beverage (F&B). Post the transaction, Tata Consumer is among the Top 5 listed FMCG players basis revenues in F&B and among the Top 10 basis F&B revenues in India.

This marked a new strategic direction for the Company with accelerated expansion into the ~Rs. 6,00,000 Crores Indian FMCG industry. The combination of the two consumer-focused businesses will benefit both sets of shareholders, who will be able to participate in a larger business poised to grow its share of the Food & Beverages market, with a broader exposure to the attractive and fast growing FMCG sector.

The merged consumer business will also benefit from a combined reach of over 200 Million households, a broader portfolio, deeper distribution, enhanced innovation capabilities, as well as a strong product pipeline. In addition, the new consumer entity expects to achieve substantial revenue and cost synergies, which will add value to its shareholders.

The final approval on the merger came through in February 2020 and Tata Consumer was formed. The appointed date of the merger is 1<sup>st</sup> April 2019.

**We are among the Top 5 listed FMCG players basis revenues in F&B and among the Top 10 basis F&B revenues in India.**

## Strategic Priorities

Tata Consumer is a fast-growing F&B company – with the second largest presence in Tea globally, a leadership position in the Salt category in India and a growing portfolio of other products (India – Pulses, Liquid Beverages, Coffee, Spices and Ready-to-Eat; International – Coffee). We are committed towards delivering high-quality, innovative, tasty and convenient products with goodness and care at their core.

Post the merger, we have leapfrogged in our journey to gain scale in the FMCG space with a larger portfolio of F&B products. We remain aligned to our five stated strategic pillars:

- Improving Execution and Operational Effectiveness**  
 We are focused on realising synergies through effective integration between two businesses. We are exploring alternate business structures to improve profitability. We are efficiently managing spends, including commodity costs and building efficiencies across the value chain.
- Rejuvenating the Base Business**  
 We continue to invest in our core brands in F&B for building sustainable and profitable growth. We are focusing on brand building, premiumisation, distribution and developing alternate channels for growth.
- Investing for Growth**  
 We are piloting new launches and categories by leveraging a differentiated offering and a 'right-to-win' strategy to build a larger play across different markets successfully.
- Driving Innovation**  
 We are capitalising on industry trends to serve consumer needs specific to markets and geographies.
- Reviewing Portfolio Options**  
 We are realigning capital investments to markets/businesses with higher growth potential and ability to generate sustainable returns. We are exploring additional avenues for growth.

## Management Discussion and Analysis (continued)

### • Investing in People

We remain committed to investing in building people capabilities and creating a sustainable high-performance work culture.

### Key Strategic Developments

During the year under review, we continued to invest in our core businesses, both in India and across various international markets. We acquired a branded tea business in the state of Rajasthan, India, to expand our distribution and offering. We supported our new innovations for growth through Cold Infusions in the UK, Australia and Canada, Supers 2.0 in Canada (after the successful stint of Supers 1.0), new line of Coffee blends in USA (Barista and Flavors of America) – to name a few.

As part of our portfolio review, we exited our Czech business to focus on core growth markets. We also initiated the process to acquire a 50% stake of our JV partner PepsiCo in NourishCo Beverages, which is in line with our ambition to create a larger portfolio in the F&B industry in India. On the completion of this acquisition, NourishCo Beverages will become a fully owned subsidiary of Tata Consumer.

**We are focused on realising synergies through effective integration between two businesses.**

### COVID-19 Impact on Tata Consumer

In the last month of FY 2019-20, our business was impacted by the lockdown issued by the various governments across the globe to arrest the growth of COVID-19 cases. We saw a mixed response across our different businesses – panic buying and closure of restaurants led to a spike in retail and online sales for both our Indian and International branded businesses, while food service sales were impacted significantly.

While we managed production and supply chain operations internationally; we faced logistical challenges in the Indian market with limited availability of workers (including due to large scale migration to home states), restriction in movement of transport and time taken to streamline operations of retail stores, including modern trade and e-commerce. The situation has however progressively improved with measures taken by the Government of India leading to higher market openings and easing of supply constraints. We have also partnered with e-commerce and delivery players in India to ensure direct reach to our customers wherever possible.

Tata Starbucks saw the closure of stores from mid-March. Some of the stores opened for deliveries only from the last week of April 2020 onwards. The Plantations operations (subsidiary Tata Coffee and associate companies APPL and KDHP) were also shut down, but have resumed operations in April, albeit with a lower number of workers to start with, and are now fully operational.

### SCOT Analysis

#### Strengths & Challenges

We have leading positions in the Tea and Salt segments in India and these businesses will continue to contribute to a significant share of our revenue growth in the next few years. We are leveraging our distribution strength, operational excellence and brand loyalty to build future platform plays in their specific market categories (including Packaged Foods, Liquid Beverages, Out-of-Home, as well as newer categories under exploration). We are further strengthening our sales network and using technology to improve our execution capabilities. The integration of the Beverages and Foods businesses in India has the potential to realise both revenue and cost synergies, while providing a platform for accelerated growth in the future.

**We are leveraging our sales and distribution strength, operational excellence and brand loyalty to build future businesses, which have the potential to become large platform plays in their specific market categories.**

Our leading International plays – Tetley and Eight O' Clock – are heritage brands and have built a loyal customer base. These brands operate primarily in developed markets with lower growth rates and a declining black tea category. Our last few innovations (Supers, Cold Infusions, Barista Blends) have met with good consumer response and we are fast-tracking the process to launch in different markets (to gain a head-start against competition) and actively building innovation pipeline. At the same time, we are also investing in the brands to ensure long term health of the business. We are also intensifying efforts on restructuring our cost base to ensure improvement in operational efficiency.

Among our B2B businesses, our extraction business (both Tea and Coffee) have performed well and enjoys healthy margins. In Tata Coffee, our freeze-dried plant in

Vietnam performed well and has already reached over 80% capacity utilisation by the end of the first year of operation. However, our plantations business has suffered in the last few years due to adverse weather conditions, including floods, pest attack and lower commodity prices. Going forward, we believe that the long-term fundamentals of the business would remain strong and we will continue to evaluate various options to improve efficiency.

### Opportunities & Threats

All our businesses have vast opportunities, both in India and International markets as existing trends in health & wellness and convenience create new consumer needs and market opportunities. We are preparing to leverage this through focused expansion of the sales and distribution systems in India and scale up and improve our robust supply chain. Premium product offerings and new market models are also being developed. We are also looking at opportunities to expand our India products in the international markets, where we have a presence to cater to both the ethnic food aisles and the needs of the Indian diaspora.

The key threats for our businesses include changing preference of consumers, commodity prices and currency volatility as well as concentration of retailers in developed markets. The current COVID-19 crisis provides opportunities with likely increase in the in-home consumption. However, parts of our business, which cater to out-of-home consumption, have been adversely impacted. We run multiple factories and operations across the world and engage with workers daily. Employee and support systems safety is a key focus in this environment. Though we have plans to ensure business continuity at every level, the continuation of the crisis can have long term demand and supply implications, which is difficult to predict at this point in time.

### Growth Drivers

#### India

##### Beverages

The year 2019-20 saw the India Beverages business deliver strong volume and revenue growth of ~7% despite slowdown in category growth. During the year, we completed the acquisition of the branded tea business of Dhunseri Tea Ltd. ('Lal Ghoda' and 'Kala Ghoda'). Lal Ghoda is the leading premium tea brand in Rajasthan (market dominated by local players and where Tata Consumer had a very small presence). On the organic front, we continued to invest behind our premium brands portfolio – Tata Gold, Chakra Gold and the re-stage of Tata Tea Premium. Building on the health & wellness and convenience trends, we pilot launched

two new products – Tata Tea Tulsi Green Tea and Tata Tea Quick Chai Lite (3 in 1 tea mix with 'low sugar' variant to make boiled tea). During the year, we also opened the seventh store of Tata Cha in Cunningham Road, Bangalore.

### Foods

The India Foods business (erstwhile Consumer Products Business of Tata Chemicals/CPB) delivered a revenue growth of 12%, in the year, led by the Salt and the Pulses portfolio. We supported the core Salt business with differentiated campaigns. Pulses delivered good growth and Spices is now finding the ground. We also test launched a host of new food product categories in the e-commerce outlets, including Nutrimixes (Chilla), Poha, Chutney, Organic Pulses and Sattu.

**We test launched a host of new food product categories in the e-commerce outlets, including Nutrimixes (Chilla), Poha, Chutney, Organic Pulses and Sattu.**

### Joint Ventures

#### NourishCo

NourishCo Beverages, our water and other liquid beverage business in India, performed below expectation, led by muted growth of Tata Gluco Plus, mainly due to temporary supply challenges. While it was resolved in May, we however ended up missing a part of the peak summer season.

Our Himalayan Glass Bottle (launched to capitalise on the trend of increasing consumer concern for plastic bottles, especially in fine dining restaurants and hotels) continues to perform well.

Our Tata Water Plus PET bottle delivered strong profitable growth, as we expanded distribution by leveraging our Tata Gluco Plus footprint in the markets of Andhra Pradesh, Telangana Tamil Nadu and Odisha.

The overall business of Nourishco was impacted due to COVID-19, as a significant portion of our March sales did not happen due to the lockdown. The situation is gradually coming back to normal, as the lockdown is easing across the country.

**Both our Himalayan Glass Bottle and Tata Water Plus PET bottle performed well during the year.**

## Management Discussion and Analysis (continued)

### Tata Starbucks JV

Tata Starbucks, our 50:50 JV with Starbucks, improved sales by 21% in FY 2019-20 with robust in-store performance and new store openings (opened 39 new stores in the current fiscal versus 30 stores in FY 2018-19). We are now present in 11 cities in India (with expansion to Ahmedabad, Surat and Vadodara this year). The total store count is 185, as on 31<sup>st</sup> March 2020. The business was impacted in the last quarter due COVID-19 and a number of store openings that were scheduled in March 2020, had to be postponed. By the end of May 2020, we had ~60 stores opened for takeaway and deliveries in 10 out of the 11 cities we are present in.

### International

During the year, the International Beverages business grew by 0.4% on constant currency basis (excluding the Czech Republic, which we exited during the year) amidst a declining tea industry. We achieved a volume growth of ~1% and ~4% in the International branded Tea and Coffee businesses, respectively. We made concerted efforts to drive product innovation and attract new consumers to the Tetley and Eight O' Clock brand umbrella.

### USA

In USA, the Eight O' Clock brand completed 160 years of existence and to mark the occasion, we launched a new line of products under the Brand with a differentiated packaging – Barista Blends and Flavors of America – as compared to our base portfolio. We also introduced a new value coffee brand (Early Riser) to compete in a different part of the coffee shelf in the West Coast – the Can segment, where we are currently absent. During the year, we also launched the Indulgence Blends (a delectable blend of four chocolate flavoured coffees) to celebrate holidays and special occasions.

### UK

In the UK, we continued to support our new product launch – Cold Infusions – during the summer season. The Cold Infusions category continues to grow despite increased competition and is now ~1% of the overall category and growing by ~25%. During the year, we also launched the new marketing campaign #NowWereTalking, to strengthen our brand position in Tea.

**Product innovations, along with differentiated marketing campaigns, are helping bring new customers to our brand and improving brand salience in our international markets.**

### Canada

In Canada, we launched the next line of Supers (our range of teas fortified with vitamins and minerals) – Supers 2.0 – supported by a media campaign. Supers continues to drive growth, both for us and the overall non-black tea category. By the end of the financial year, it had a monthly share of ~3.9% in the non-black category.

### Other markets

We also launched Cold Infusions in Australia under the Tetley brand with a new campaign 'Thirst Tea?' featuring popular comedian and actor Celia Pacquola. The Cold Infusions segment is one of the fastest growing segments in the tea category, representing 7% of the total tea category in just one year.

As mentioned earlier, we exited our 100% stake in TGB Czech.

This year, we also focused on launching and expanding our ethnic brands aimed at the South Asian diaspora across different markets under different brands like the Tata Tea Export portfolio (Tata Tea Gold and Tata Tea Premium), Tetley Ethnic range in the UK and Flavors of India in USA (Masala, Ginger and Cardamom flavours) and Good Earth Ayurveda Teas in USA.

### Tata Coffee (including Vietnam business)

Tata Coffee's revenues in FY 2019-20 grew by 19% owing to the commercialisation of the freeze-dried plant in Vietnam (reaching over ~80% of capacity utilisation by the end of the fiscal) and the improved performance from its coffee and pepper plantations.

### Sustainability

Sustainability remains key to the Company's Vision and Purpose.

- We are committed to sustainably sourcing all our teas and encourage our supply chain partners to follow sustainable agricultural practices to earn the certification of the Rainforest Alliance (international markets) and trustea programmes (India). All the Tetley tea is 100% Rainforest Alliance certified in the international markets since 2016.
- Tata Consumer supports affordable healthcare to over 1,00,000 tea community members annually through its hospitals in Munnar (Kerala) and Chubwa (Assam). These hospitals have treated over five Lakh patients in the past five years. We are now initiating partnership with Tata Chemicals to improve the lives of the communities in Gujarat.

- One of our other flagship projects is 'Project Jalodari'. It is a water management programme that aims to create sustainable water sources, raise awareness and build capacities on water and sanitation in the communities of Himachal Pradesh and Assam.
- In line with regulations, we are committed to reducing the impact of plastic packaging on the environment by managing the plastic waste we generate through packing of tea, and also by shifting towards sustainable packaging for our products. During the year, we scaled up the recyclable packaging of Tata Salt products to cross 21%. We also conducted pilot tests for recyclable packaging for the India Tea business in Goa and received encouraging results.

# 21%

Of Tata Salt products use  
recyclable packaging

- We have framed the Extended Producer Responsibility (EPR) for collection and reprocessing of plastic packaging waste on a brand neutral basis across key markets. In FY 2019-20, the India Beverages business achieved 70% collection of plastic packaging waste and the India Food business achieved 98%. The target is to secure 100% collection and disposal of plastic packaging in India by 31<sup>st</sup> December 2020.
- We joined the UK Plastics Pact in October 2018, which is a collaborative initiative between UK businesses across the plastics value chain, the government and NGOs, to create a circular economy for plastics.
- Tata Starbucks eliminated 100% of its single-use customer-facing plastics, which includes straws, stirrers, cups and lids into compostable poly lactic acid and wood (which is more environment friendly). PET bottles for the water and juices category have been eliminated and moved to recyclable glass packaging across all stores in India.

In FY 2019-20, the India Beverages business achieved 70% collection of plastic packaging waste and the India Food business achieved 98%. Tata Starbucks eliminated 100% of its single-use customer-facing plastics.

## Road Ahead

In the short term, we visualise disruption caused by the lockdown, both in India and international markets (the initial panic buying would also normalise). However, over the medium term, with the gradual recovery in economy, we are hopeful that growth will revert to normal levels. As the underlying dynamics change, we will continue to closely monitor the position on ground and prepare ourselves for future trends.

We are at a pivotal stage in our India journey to leverage the combined platform of the Foods and Beverages businesses to drive incremental growth and deliver cost efficiencies. This year, our teams focused on ensuring smooth Day One transition after we received formal approvals in February 2020. In the upcoming financial year, we will focus on successfully integrating the two businesses and driving efficiencies and synergies, both, on the top-line and costs, within the Tata Consumer system. The key objectives of the exercise will be: (i) to create a common integrated organisation structure; (ii) to combine and upgrade our Sales & Distribution network; and (iii) to maximise synergies and growth opportunities in our existing and new categories.

In the upcoming financial year, we will focus on  
successfully integrating the two businesses.

We are in the process of acquiring the 50% shareholding of PepsiCo in the JV NourishCo Beverages. We are confident about the growth potential of the business and believe it can contribute meaningfully to the Company's financials in the next few years.

In the international market, we will continue to focus on innovation to build our non-black tea portfolio and coffee. We are also closely monitoring costs across the supply chain, to further build efficiencies, which could then be invested back in the business to build growth.

The next year will be important for our non-branded/B2B business as it will be the first full year of operations for our Vietnam plant and will add incrementally to both top-line and bottom-line. However, we will have to watch out for the commodity prices that might see some swings due to the impending COVID-19 crisis the world over.

## Management Discussion and Analysis (continued)

### INDUSTRY AND BUSINESS OVERVIEW

#### India

The total organised Indian F&B industry is expected to be ~Rs. 4,00,000 Crores market as on 2019 and projected to grow by 2.5x to ~Rs. 10,00,000 Crores by 2025 (CAGR of 16%) – leveraging India's favourable demographic (1.4 Billion strong population, rising income levels and higher urbanisation). The F&B segment constitutes ~30% of household spending and is expected to sustain the wallet share, going forward.

#### Beverages

We operate in the sub-categories of Tea (Tata Tea, Tetley, Gemini, Lal Ghoda, Kala Ghoda and Teaveda), Coffee (Tata Coffee Grand) and Water (Himalayan, Tata Gluco Plus, and Tata Water Plus).

#### Industry Overview

##### Tea

The Indian tea market is estimated to be ~Rs. 26,000 Crores, with unbranded being 30-35% of the overall market (by value). Tea is the favourite Indian beverage and we continue to see growth across all tiers through upgradation from loose to economy branded tea and movement up the chain to premium and super premium teas. Black tea is the predominant sub-category, with high customer preference for the taste of boiled milk tea. Green tea is estimated to be ~3% of the branded category and is growing at 12.5%. Health & wellness continues to be a strong trend and consumers are also looking at functional benefits from their cup of chai (such as Ayurveda Tea and Tulsi Tea).

There is a re-emergence of tea cafés in urban centres in the last few years, which is helping reinvent the tea culture, provide a comfortable venue compared to tea stalls and serve as an alternative to coffee chains. Tea cafés like Chaayos, Chaipoint and our own Tata Cha are becoming prominent. There is an increasing potential base of consumers, who see tea as fashionable and are getting familiar with different varieties of tea.

##### Coffee

The branded retail coffee market in India is estimated at ~Rs. 2,750 Crores in 2019. Instant coffee is the largest sub-segment and is ~80-85% of the category and growing as consumers look at convenience. We are also witnessing the emergence of artisanal and gourmet premium coffees – estimated to be ~5% of the organised market. In terms of at-home consumption, we see different consumer behaviours in the South and Rest of India segments. In the

Rest of India, coffee is an aspirational product and there is preference for instant coffee, especially during winters. On the other hand, in the South, we see regular consumption of both instant and Roasted & Ground (filter coffee).

##### Water

Water is the second largest beverage sub-category after Tea in India (globally it is the largest sub-category in the Beverages market). The current size of the packaged water market in India is ~Rs. 17,000 Crores, growing at a CAGR of 12%. Fruit-based beverages is a ~Rs. 8,250 Crores category, growing at a CAGR of 10%.

Within the packaged drinking water category, we were one of the first players to launch naturally sourced mineral water in India through our brand Himalayan, and continue to enjoy a leadership position. We also entered the functional and fortified water space with Tata Gluco Plus and Tata Water Plus.

#### Industry Outlook

The COVID-19 pandemic has resulted in short-term disruptions in the industry, especially for out-of-home consumption. Even for essential products like Tea and Coffee, there will be supply challenges before things get normalised. In the short term, we will also see consumers getting more value conscious and hence, the growth dynamics will change across the different tiers (economy/premium).

However, long-term drivers remain robust and expect continued expansion of the categories. There is an opportunity to grow, driven primarily by distribution expansion (including into white space geographies like Rajasthan, with the acquisition of Lal Ghoda and Kala Ghoda) as well as through new product innovation.

## NO. 1

Tea company in the Indian market by volume and No. 2 by value.

#### Business Performance

##### Tea

We are the market leader by volume (~19.7%) and the second largest player in value terms (20.0%) in India (Source: Nielsen). We maintained the pace of volume and revenue growth in the financial year despite the slowdown in category growth rate. Tata Consumer also

took the top spot as the fastest-growing tea company in modern trade (growing channel in the Indian Consumer landscape) backed by differentiated strategy and strong team execution.

This year, we continued to invest in our portfolio of premium brands – Tata Tea Gold, Chakra Gold and Tata Tea Premium.

The year also marked inorganic acquisition of the branded tea business of Dhunseri Tea – Lal Ghoda and Kala Ghoda. The acquisition is in line with our strategy to explore additional avenues for growth – especially in markets like Rajasthan, where Tata Consumer has a minor presence. The integration of the business with systems and processes of Tata Consumer is on track and the business delivered is as per expectations.

Tata Tea Gold partnered with IIFA 2019 as the Official Brand Partner, to launch #DilKiSuno stories as part of the brand's 'Dil ki Suno' campaign, which attempts to bring alive the inspiring stories of consumers, who have listened to their hearts and paved their own path.

We did hyperlocal campaigns for Tata Tea Premium and Tata Tea Chakra Gold. The intent was to disrupt the category by celebrating regional pride and creating a State specific communication plan including media choices. We did a restage for Tata Tea Premium with an integrated campaign, including the creation of a region-specific pack, trade message and marketing campaign by tapping into local/regional-level insight for the states of Delhi, UP, Punjab and Haryana.

In the South, our regional brand Kanan Devan ran the 'Pure & Natural' campaign to build awareness against adulterated teas and its harmful impacts by TVC and press articles across publications.

The Spice Mix portfolio (Tata Tea Elaichi and Masala) continues to perform well in the market and has already exceeded gross sales of Rs. 200 Crores in the current financial year.

We test launched Tata Tea Tulsi Green in Q2 FY20 in Delhi NCR to check consumer response and acceptance of the product. We intend to do a larger rollout in the next financial year.

For our 3-in-1 tea mix product, Tata Tea Quick Chai, which addresses the market for convenience in tea drinking by addressing the taste barrier of boilable tea, we worked on the product formulation in this financial year to create the low sugar variant as well as extended the range to Masala and Cardamom.

We also kick-started the process of sales transformation to create a modernised system that can handle multiple product categories. We have rolled out our Distributor Management and Sales Force Automation software across our distributors, stockists and sales teams. We are happy to report that we are close to completing the rollout across our 1,400 distributors and have noticed good adoption levels.

**We have almost completed the fastest rollout of our Distributor Management and Sales Force Automation software across our 1,400 distributors and noticed good adoption levels.**

To support our growth, we have also looked at driving cost efficiencies across our supply chain, which is enabled by digitisation. Our digital initiative in blending called 'DigiTea' has contributed significantly to our profitability by providing real-time data of auctions, enabling centralised data on buying across centres and creation of daily buying tracker, as opposed to the previous fortnightly tracker. Similarly, in operations, measures like increase in automation, optimisation of packaging specifications and business waste reduction among others, have contributed to the bottom-line.

NourishCo Beverages, our Liquid Beverages in India, delivered mixed results. Our star performer Tata Gluco Plus had muted results in FY 2019-20 as we suffered from labour related temporary disruption in our Andhra Pradesh factory. This happened during the period of March to May – which unfortunately impacted sales during the peak summer season. Tata Gluco Plus continued its geographical expansion with new plants commissioned in Odisha, West Bengal and Delhi NCR. We also launched a lychee flavoured beverage, which received good customer response.

Himalayan Glass Bottle continues to perform well. However, the overall Himalayan brand underperformed against expectations as the change in distribution system from PepsiCo to Varun Beverages did not yield results as planned.

Tata Cha, our foray in the Out-of-Home beverage space, has increased presence to seven stores in Bangalore. We have been doing menu interventions to drive the number of transactions in the store (for instance, the new monsoon menu). However, given the lockdown situation, we had to delay opening of four of our stores to the next financial year.

## Management Discussion and Analysis (continued)

### Foods

#### Industry Overview

The organised Indian Staples industry is ~Rs. 88,000 Crores in 2019. It is largely unorganised, with the share of branded players at less than 10%.

#### Salt

Within the Staples category, the Indian Salt market is estimated to be ~Rs. 7,000 Crores with unorganised players forming ~12% of the category by volume (a stark difference to the rest of the category). The growth drivers for branded play remains the increasing awareness of better product quality, visible purity and iodine content. We compete in the category with Tata Salt (vacuum evaporated salt sold nationally) and I-Shakti salt (lower priced solar evaporated salt normally sold in South). Our supply partners, Tata Chemicals have the largest manufacturing facility for producing vacuum evaporated salt in India. We are seeing a growing trend of health & wellness with consumers making conscious choices by selecting better-for-you options (such as lower sodium content in Tata Salt Lite, Iron and iodine fortification in Tata Salt Plus). Specialty salts like rock salt and black salt have increased presence in modern format stores.

#### Pulses

India is the largest producer, consumer and importer of pulses. The total Pulses and Derivatives industry is estimated to be ~Rs. 1,50,000 Crores in FY 2018-19 with only 1% of the segment being branded. The low penetration is primarily led by a host of factors including low perceived value addition by packaged players (leading to consumers unwilling to pay price premium) and low consumer concern regarding adulteration in unbranded. However, the trend has been changing in the last few years with consumers preference for better quality packaged products, launch of differentiated products (such as Tata Sampann Unpolished dals, Tata Sampann Low Oil Absorb Besan, an organic range of pulses) and growth in the number of organised players entering the category (and thereby, expanding the base). Tata Sampann is the first national branded player in this category.

#### Spices

India is the world's largest producer, consumer and exporter of spices and accounts for almost half of the global spice trade. The total Spices industry is worth ~Rs. 60,000 Crores, with the branded Spices industry, estimated to be ~Rs. 18,000 Crores in FY 2018-19, is highly fragmented with the presence of many regional

players. The branded segment is growing at a CAGR of ~15%. Straight/Pure Spices form ~80% of the segment (with a high-competitive intensity from unorganised players), while blended spices are mainly branded with consumers choosing to be brand loyal. However, there is an increasing demand for branded products, with consumers looking at improved quality products in straight/pure spices (with better quality of raw materials used) and increasing adoption of blended spices in the kitchen (higher convenience and consistency of taste).

#### Snacks/Ready-to-Cook

Snacks/Ready-to-Cook is an Rs. 40,000 Crores segment with a high share of branded play (Ready-to-Cook is all-branded in comparison to Snacks). The growth is being driven by more players entering the segment and offering consumer different taste choices including healthier food and convenience (such as Tata Sampann Chilla Mix).

#### Industry Outlook

We expect the current trends to continue and the demand for the branded products in the staples category to grow at a strong pace. The disruption caused due to COVID-19 is likely to further accelerate the adoption of branded products across the Staples and Spices category as customers are now preferring more branded products than loose and local options.

#### Business Performance

The Foods Business witnessed robust growth of 12%, in FY 2019-20, led by the flagship brand Tata Salt and Pulses and Spices through the Tata Sampann brand.

Tata Salt is the market leader in the branded salt category with significant share of ~30% of the entire category (as per Nielsen). During the year, Tata Chemicals also increased the Salt manufacturing capacity in its Mithapur plant from 1 Million tonnes to 1.2 Million tonnes – which will provide support to Tata Consumer's ambition in growing the business. Tata Salt won its first ever metal (Bronze) at The EFFIES 2020 Awards for the campaign 'Sawal Kijiye Apne Namak Se' (Question your salt), which was launched to educate consumers about the quality of their salt.

# 12%

Growth in Foods business in  
FY 2019-20

The year saw good performance by Tata Sampann Pulses and Besan, as we strengthened the sourcing, packing and supply chain model to improve our efficiencies. The Tata Sampann Spices segment witnessed marginal revenue growth led by muted performance by pure spices (which contributes significantly to the topline) and a below par performance by blended spices. A variety of campaigns and activations were carried out this year, to seed in the brand message and generate trials. We collaborated with several content creators on digital platforms to expand our digital reach and presence. Radio led activation for spices under Sampann Superchef was conducted in eight major cities reaching out to more than a lakh consumers and actively engaging with more than 60,000 consumers. We also undertook multiple initiatives to communicate our superior proposition on Haldi/Turmeric across various channels.

During the festive season of Diwali, Tata Sampann launched its new digital campaign #LautAayiDiwali, which brings out nostalgic memories of Diwali, celebrating the true taste and essence of the festival.

We are also doing a number of pilots in the new Foods category, such as Nutrimixes/Chilla, Poha (High Fibre White Rice and Red Rice), pulse based snacks and low sugar Tata Nx, to name a few. The aim is to do a limited launch in select channels (across e-commerce/modern trade format outlets) or select geographies with some awareness drive to get customer feedback on the product and gauge levels of customer acceptance (repeat buy) before a larger national roll out.

Digital transformation initiatives were also implemented across the value chain including revamping our Distribution Management software to make it more robust, and installing it across our 600 stockists. We also initiated pilot of Transport Management System software and will be scaling it up across locations in the next financial year. We have also started digital platform NutriKorner, to engage with our customers on food and health along with the establishment of the brand message.

**We are piloting new products in the Foods category, such as Nutrimixes/Chilla, Poha (High Fibre White Rice and Red Rice), pulse-based snacks and sugar replacements like Tata Nx.**

## International

### Beverages

#### Industry Overview

##### Tea

As per Euromonitor estimates, global hot tea category is a ~USD 45 Billion industry. Black/Everyday black tea forms the largest category sub-segment globally – but is declining across different international markets. Non-black tea (Green, Fruit & Herbal, Decaf, Specialty, Cold Infusions etc.) is growing and in some markets like Canada, has become larger than black tea. However, a similar growth profile may not be seen across the different non-black segments. For instance, green tea has started witnessing softening of growth/decline in some markets.

Health & wellness is one of the key focus areas of the industry. There is an increasing number of new launches with active health claims, such as Gut Health and Sports & Recovery (Tetley Super Teas also leverage on this trend). Consumer perception with respect to macronutrients in relation to health are evolving as media/science dictates what is good for body like no sugar, good carbs, low sodium (Tetley Cold Infusions was launched with an alternative offer of low sugar hydration).

##### Coffee

Retail hot coffee is ~2x the size of Tea at USD 88 Billion. USA is the largest coffee market – estimated at ~USD 12 Billion – and has also been leading growth in the category.

Coffee has four sub-segments: Roast & Ground, Beans, Pods and Instant Coffee. Affordable ground and instant formats are more prevalent in early stage markets like Asia, Africa and the Middle East (where Tea is the primary beverage of choice) while Roast & Ground and Pods are more prevalent in countries with an evolved café culture. Our largest play in coffee is in USA with the Eight O' Clock coffee brand.

The USA market has been witnessing a slowdown of growth and an increase in competitive intensity. The growth is either being driven by: (i) premium/food service brands (such as Starbucks and Dunkin Donut) that are over-investing in promotions/discounts; (ii) small niche brands that are capitalising on trend of artisanal, single-origin coffees; and (iii) private label (retailers look at SKU rationalisation and restrict shelf choice to a few select brands).

Consumers are looking at authentic and premium choices in coffee, and there have been several new launches targeting the trend (like we launched Barista Blend and

## Management Discussion and Analysis (continued)

Flavors of America). Consumers are also more conscious about their choices and want to select healthier options.

### Industry Outlook

With the increase of COVID-19 cases and closing of bars and restaurants, consumers have started stockpiling on tea and coffee in their pantries, which led to overall growth in category (including declining segments like everyday black in the UK). However, this growth is expected to decline in the next few weeks, as countries look to lift the lockdown and the situation returns to normalcy.

The international markets are seeing an upsurge in the in-home consumption and will positively impact our businesses, if sustained. We will continue to focus on innovation led growth.

**We launched two unique lines of coffee blends under Eight O'Clock, with a new packaging – Barista Blends and Flavors of America.**

### Business Performance

#### USA

On the eve of the 160<sup>th</sup> anniversary of our Eight O' Clock coffee brand in USA, we extended the brand with two new unique lines supported by new packaging – Barista Blends and Flavors of America. While Barista Blends allows consumers to make their home the coffee house, the seven new star-spangled creations of Flavors of America celebrate the great flavours associated with various states in the US. Both new Eight O' Clock lines were crafted coffees made with 100% Arabica beans that are uniquely roasted and blended with flavours to deliver an enhanced coffee drinking experience.

We launched the ethnic range of Tetley in three flavours – Masala, Elaichi (Cardamom) and Ginger in USA. This is the first time a mainstream tea brand is disrupting the tea category by offering an authentic chai experience in a tea bag format. In the US, we also launched a range of Ayurveda inspired Teas under our Good Earth brand in three flavours – Calm (peppermint tea with floral notes from hibiscus and beautifully balanced with zesty lemon balm), Peace (chamomile tea blended with sweet cinnamon and a touch of zesty orange peel) and Warmth (lively kick of ginger and sweet earthy notes from holy basil and spearmint).

**We launched the ethnic range of Tetley in three flavours in USA. This is the first time a mainstream tea brand is disrupting the tea category by offering an authentic chai experience in a tea bag format.**

#### UK

In the UK, the focus was to scale up the new product launch – Cold Infusions (with four new blends) – as well as to strengthen our core business with a new marketing advertisement. Cold Infusions is the fastest growing category within the Tea segment (though on a smaller base) in the UK, and has been doing very well (has already reached ~1% of overall category). We brought four fruit and herbal infusions (Raspberry & Cranberry, Peach & Orange, Mango & Passion Fruit and Mint, Lemon & Cucumber), which were complemented by high impact consumer campaigns (Shake up Water, Wake up Flavour), encouraging consumers to shake up the ordinary. It ran throughout summer with live events, sampling, print, outdoor and social campaigns.

We also launched a new campaign for Tetley – 'Now We're Talking'. The campaign kicked off with a witty and heart-warming TV commercial featuring the antics of a cat with attitude and a lovable dog. The advertisement mirrored the everyday conversations people have on their sofas at home – proving that Tetley can get anyone talking.

Six of our Tetley products in the UK have also won the coveted Gold Stars at the Great Taste Awards. The Great Taste Awards, known as the 'Oscars' of the fine Food & Beverages world, is organised by the Guild of Fine Food. Five of our products received one Gold Star each for fantastic flavour (Tetley Green Tea Mint, Super Fruit Boost Blueberry & Raspberry, Extra Strong, Super Herbals Multi Turmeric & Chamomile and Super Herbals Detox Mint Infusion), while Redbush received two Gold Stars ('above and beyond delicious').

This year, we also launched Indian flavours for the South Asian diaspora in different geographies through our flagship brand, Tata Tea. 'Tata Tea Export Portfolio' consisting of Tata Tea Gold and Tata Tea Premium was launched in UK and Europe.

#### Canada

We extended the Super Teas range in Canada (Supers 2.0) with three new flavours – two in Herbals and one in Green/Matcha. This was integrated with a marketing

campaign run across Canada TV, social media together with in-store shelf advertisement and promoted with a 'Wellness Contest'. Like Supers 1.0, the products line was well received by our customers and drove growth for us as well as the overall Non-Black Tea category in Canada. For the month of March, our share in the Non-Black category moved to ~3.9%. Tetley Super Tea Antiox won the ChickAdvisor 2019 Reviewers' Choice Award.

#### Australia

We extended the launch of Cold Infusions in Australia with four exciting flavours designed to give water a refreshing twist. The launch was supported by an integrated campaign featuring popular Australian comedian and actor Celia Pacquola ('Thirst Tea?'). Like UK, the Cold Infusions segment is witnessing incredible growth in Australia and is one of the fastest growing in the tea category, representing ~7% of the total tea category in just one year.

**This year, we launched our Cold Infusions range in three of our markets (UK, Australia and Canada). It is a fast-growing segment and in some markets like Australia, has already occupied 7% of the total tea segment. We also expanded our Supers range in Canada.**

#### Non-Branded business/B2B

The year saw good performance for the B2B coffee business and showed a growth of ~16%, led by commercialisation of Vietnam Freeze Dried plant and favourable performance by the Tata Coffee Plantation business (higher sales of Robusta coffee). At the 4<sup>th</sup> Ernesto Illy International Coffee Awards in New York by Illy Caffé, a global leader in Coffee, Tata Coffee's Suntikoppa estate in Coorg won the Best Indian Coffee and was amongst the finalists for global recognition for producing the finest coffee through sustainable means.

Tata Coffee's state-of-the-art freeze-dried coffee plant in Vietnam is operational and has reached over ~80% capacity utilisation. Freeze-dried coffee is a growing segment worldwide in the premium Instant Coffee space. Tata Coffee also launched its e-commerce platform [www.coffeesonnets.com](http://www.coffeesonnets.com) that sells three unique variants of luxury single origin specialty coffee named 'The Sonnets -Voice of our estates.' The coffees are directly sourced from two of Tata Coffee's 19 estates located in the Coorg region of Karnataka (Goorghuly and Woshully) and are

recognised for growing some of the best Arabica Coffees in the country.

#### Road Ahead

In the short-term, performance will be impacted by demand from export markets outside India and supply constraints arising out of the COVID-19 crisis. The business outlook is expected to improve gradually as markets normalise.

#### Others – Tata Starbucks

During the year, we grew the revenues by ~21%. Tata Starbucks kept up the momentum on expanding the store base, and added 39 new stores to reach 185 stores by the end of FY 2019-20 (compared with the 30 new stores opened FY 2018-19). We unfortunately had to phase the opening of some stores to the next financial year, due to the COVID-19 situation in the month of March 2020.

This year, we entered three new cities of Gujarat: Ahmedabad, Surat and Vadodara. All the stores have been very well received by the customers and performance is as per expectations.

In an industry first, Starbucks completed the transition to compostable and recyclable packaging solutions across its stores in India by World Environment Day (5<sup>th</sup> June 2019) and on-boarded hearing and speech impaired barista partners with a customised learning tool and sensitisation workshops.

Tata Starbucks was recognised as one of the top 100 Best Companies to Work For and top 75 Best Workplaces for Women in India by the Great Place to Work® Institute in 2019. We have achieved 100% pay equity for women and men, a landmark accomplishment that demonstrates Starbucks' commitment to gender equality globally. Tata Starbucks continues to create opportunities for female partners, boosting the share of female partners from 14% in FY 2013-14 to 29% in FY 2018-19 and plans to increase the share to 40% by FY 2021-22.

We also witnessed a very healthy jump in the usage of our loyalty programme, which now forms ~31% of our revenues, out of which 10% is through mobile tender.

**Tata Starbucks was recognised as one of the top 100 Best Companies to Work. It also achieved 100% pay equity for women and men.**

## Management Discussion and Analysis (continued)

### Road Ahead

In the short term, store reopening and ramp up will be impacted by the pace at which normalcy is restored in the economy and the return of consumer confidence. We are exploring additional revenue models including delivery and open pick up systems. There will be renewed focus on delivery and expanding the loyalty programme and usage of mobile tender as we prepare ourselves for the post COVID-19 world.

### FINANCIAL REVIEW

The Consumer Products Business of Tata Chemicals comprising of the business under the brands; Tata Salt and Tata Sampann merged with Tata Consumer w.e.f. 1<sup>st</sup> April 2019. The aforesaid SBU is being referred to as 'India Foods' in this segment.

Pursuant to the merger, we have acquired Net assets of Rs. 6,099 Crores as at 1<sup>st</sup> April, 2019, which includes Goodwill of Rs. 3,563 Crores, Intangible assets (including Indefinite Brands) of Rs. 2,459 Crores and other assets (net of liabilities) of Rs. 77 Crores. Consolidated Financials for the year include the full year impact of India Foods business performance including the addition of net assets as at 1<sup>st</sup> April 2019 mentioned above.

### Consolidated Business

#### Key Financials

- **Revenue from operations** at Rs. 9,637 Crores, higher than the previous year by 33% (including the impact of merger of India Foods business). On a like to like basis, the Group revenues have grown by 4% with volume growth in both India and International branded beverages businesses.
  - India Beverages business grew by ~7% both in volume and value terms.
  - India Food business grew by ~12% with all business segments growing led by Salt and Pulses.
  - International business, excluding Czech business (exited during the year), grew by modest 0.4% with a volume growth of ~1% and ~4% in the International Branded Tea and Coffee businesses, respectively.

- **Earnings before interest, taxes and Depreciation & Amortisation (EBITDA)** at Rs. 1,310 Crores, higher than the previous year by 56%. On a like to like basis, EBITDA excluding India Foods business and impact for revised lease accounting, increased by ~12%.
- **Profit before exceptional items and taxes (PBIT)** at Rs. 1,084 Crores, higher than the previous year by 41%. On a like to like basis, PBIT increased by 6.5%.
  - Profits from the India beverage business increased, excluding non-recurring gains in previous year, with higher spends on brand building
  - Profits from India Foods, excluding amortisation charge on intangible assets of ~Rs. 43 Crores (arising out of merger), marginally declined with higher investments behind brands for long term health of business
  - Significant improvement in profits in the international business with gross margin expansion, due to better management of commodity costs, and cost reduction initiatives across businesses (including overheads), which was partly offset by higher advertisement spend to support brands
- **Exceptional items** mainly include costs related to merger of India Foods business and non-cash impairment loss on goodwill relating to businesses in Australia and the US. The accounting impairment has been recognised due to a combination of factors like COVID-19 related impact on specific out-of-home business segments, changes to discount rates due to market conditions and revision in business plan sensitivities.
- **Group net profit** for the year at Rs. 460 Crores, is marginally higher by ~1% than that of the previous year, with higher exceptional items and higher losses from Associates and Joint Ventures due to impact of deferred tax/lease accounting and business disruptions caused by the COVID-19 outbreak in India.
- **Earnings per share** is Rs. 4.99 for the year as compared to Rs. 6.47 in the previous year. EPS for the year is mainly impacted due to higher exceptional items and higher losses from Associates and Joint Ventures despite higher operational profits generated during the year. The Cash EPS for the year is Rs. 11.02 as compared to Rs. 8.07 in the previous year.

## Standalone India Business

## Key Financials

- **Revenue from operations** at Rs. 5,690 Crores, higher than that of the previous year by 66%. On a like to like basis, the revenue from operations grew by 6%. This was driven by volume growth of ~7% in the Indian branded tea portfolio, which was seen across different type of brands i.e. Economy and Premium. The Food Business grew at ~12% and ~3% in value and volume terms respectively, with all business segments growth led by Salt and Pulses. This year also saw the partial benefit of acquisition of the branded tea business of Dhunseri Tea Limited.
- **Earnings before interest, taxes, depreciation and amortisation (EBITDA)** at Rs. 806 Crores, higher than that of the previous year by 74%. On a like to like basis, EBITDA excluding impact for revised lease accounting and the India Foods business increased by 4%, with a higher brand investment.
- **Profit before exceptional items and taxes (PBIT)** at Rs. 781 Crores, higher than that of the previous year by 36%.
  - On a like to like basis, Profit before exceptional items and taxes declined by 10%. This is lower than that of the previous year mainly on account of higher advertisement spends on brands (especially the premium brands – Tata Tea Gold, Tata Tea Premium and Chakra Gold) to ensure long term health of the business, lower dividend income from overseas subsidiaries and absence of non-recurring gains.
  - The India Foods business delivered a PBIT of Rs. 266 Crores. PBIT, excluding brand amortisation charge of ~Rs. 43 Crores (arising out of the merger), marginally declined with higher investments behind brands for long term health of the business.
- **Exceptional items** of Rs. 52 Crores mainly consists of costs related to the merger.
- **Profit after tax** at Rs. 524 Crores, higher than that of the previous year by 27% mainly due to addition of the India Foods business, lower taxation rate adopted for the year, partly offset by higher exceptional items.

## Management Discussion and Analysis (continued)

### RISK MANAGEMENT

The Board of Directors of the Company has formed a Risk Management Committee to frame, implement and monitor the risk management plan for the Company. The Committee is responsible for reviewing the risk management plan and ensuring its effectiveness. The Committee considers the risks that impact mid- to long-term objectives of the business, including those reputational in nature.

The Company has an elaborate risk charter and risk policy defining risk management governance model, risk assessment and prioritisation process. The Risk Management Committee reviews and monitors the key risks and their mitigation measures periodically and provides an update to the Board on Company's risks outlined in the risk registers. The Audit Committee has additional oversight in the area of financial risks and controls.

Additionally, a third-party organisation has benchmarked the Company's risk management practice with various companies in India and globally and pronounced it as a leader in FMCG category. The Company was declared as the winner in the category Best Risk Management Framework & Systems – FMCG, at the sixth edition of The India Risk Management Awards 2020 by CNBC TV-18 and ICICI Lombard. These awards recognise those organisations and teams that have significantly added to the understanding and practice of risk management. It also won the CRO Leadership award 2020 from the UBS Forum.

**Tata Consumer won the 'Best Risk Management Framework & Systems – FMCG' at the India Risk Management Awards 2020.**

### CYBERSECURITY

We devised a three-pronged approach to cybersecurity.

- Ensured strong safeguards that included antivirus and malware detection and prevention, laptop hard-disk encryption, virtual private network to access our applications, and web security to block malicious sites
- Established and solidified, our managed Security Operations Centre (SOC), which provides protective monitoring and speedy response and recovery to any cybersecurity incidents that might happen
- Ensured strong operational safeguards that included end point security, disk encryption, multi-factor

authentication (MFA), secure internet access, virtual private network, and strengthened user access management. We have also established and solidified our managed Security Operations Centre (SOC) that provides threat intelligence, protective monitoring and speedy response and recovery to any incidents that might happen by utilising the Security Incident and Event Management (SIEM) tools.

- Implemented a proactive security assessment tool, Security Assessment Framework for Enterprise (SAFE), which provides Enterprise Wide, Objective, Unified, Real Time Cyber Risk Quantification (CRQ) platform. This helps us to assess, analyse and give a score to every IT asset (including, but not restricted to laptops, servers, network connectivity devices) and gives advance visibility of assets at risk and allows us to proactively take actions to eliminate/mitigate it.
- Received a national level award by Data Security Council of India (a not-for-profit, industry body on data protection in India, setup by NASSCOM®) – Cyber Risk Quantification Champion of the Year for demonstrating the largest improvement in a year for the APAC region (~112 companies had participated from the region).

### HUMAN RESOURCES AND INDUSTRIAL RELATIONS

We currently have over 2,200 full time employees across all our branded businesses. As we embark on our growth journey with entry into a larger portfolio of the Food & Beverages segment, we improved our people strategy and processes across the following areas to propel this growth.

#### High Performance Culture

To strengthen the culture of high performance, we enhanced our performance management system to reward employees on performance achievement as well as showcasing behaviours aligned to our values. We ensured stronger cascade of goals and communicated the performance expectations to better align employees to the organisation's goals. We also introduced the concept of 'One Significant Thing', wherein employees get an opportunity to take on a personal goal. This builds a culture wherein the employees as well as the organisation support each other.

Additionally, we rolled out the sales incentive programme in India to enable sales growth by encouraging and rewarding sales employees for their high performance.

## Managing Talent

We strive to nurture and develop our employees' skills and capabilities. This is achieved through multiple platforms (internal and external) including academy-based development opportunities, group learning programmes, e-learning platforms, mentoring programmes to name a few.

In line with our objective to develop talent and provide them with opportunities, internal movements were planned across functions and geographies. We held 'FELT Leadership' sessions across all our geographies, to create a workplace that cares for employees as well as builds a deeper understanding of health and safety guidelines. The Management Trainee programme 'Emerging Leaders Plus', is now established as a key programme to build our pipeline for future leaders.

## Energising Employees

We continue to leverage employee engagement surveys to gather employee feedback. We also established a stronger, more regular and visible internal communication mechanism with employees across the organisation.

In our last (dipstick) survey, we witnessed a noteworthy progress in three areas – leadership connect, communication of survey results, elements of managing talent, which were identified as global engagement drivers. We continued to action plan and introduce new initiatives to further strengthen employee engagement globally.

## Health & Wellness

We actively focused on bringing a shift from reactive healthcare to proactive wellbeing. Globally, our health & wellness focus includes a wellness app, options to savings programme, flexible work hours, employee assistance programmes, meditation/fitness classes, conversation with coaches on mental fitness, enhanced insurance and volunteering activities across all geographies.

## Rewards & Recognition

We have a well-established rewards and recognition platform, 'Brewing Brilliance', wherein 4,000+ monetary and non-monetary peer-to-peer rewards were shared globally. We also concluded the 'Perfect Cup' celebrations (our annual awards programme) that recognises individuals and teams, who have contributed significantly across functional areas.

## Employer Branding

We actively leverage technology and social media including LinkedIn, Twitter, Glassdoor to strengthen the overall approach and brand presence to deepen our engagement and brand image with potential talent and stakeholders.

The Industrial Relations environment across the organisation has been stable, barring a few negotiations and settlements.

## INTERNAL CONTROLS AND GOVERNANCE

Our internal financial control framework is commensurate with the size and operations of the business and is in line with requirements of the regulations. We have laid down adequate procedures and policies to guide the operations of our business. Unit/functional heads are responsible for ensuring compliance with the policies and procedures laid down by the management. Our internal control systems are routinely tested by the Management, Statutory Auditors and Internal Auditors.

The Tata Code of Conduct has prescribed guidelines outlining the key disclosure and governance requirements besides mandating the observance of applicable statutory requirements by us. We cascade these guidelines across all levels in the organisation and observe the same in our stakeholder relationships.

## INTERNAL AUDIT

Internal Audit at Tata Consumer is an independent, objective, assurance and consulting activity designed to add value and improve the organisation's internal controls. It helps the Company to accomplish its objectives by bringing a systematic and disciplined approach to evaluate and improve the effectiveness of process, controls and governance.

The Internal Audit function carries out a focused and risk-based annual internal audit plan approved by the Audit Committee, using a 10-factor risk approach. The internal audit primarily focuses on the adequacy of process and controls. The internal audit reports are reviewed by the Audit Committee periodically.

The Internal Audit function at Tata Consumer is differentiated by utilising homegrown data analytics platform Tgo and a mix of various in-house domain specialists in the execution of the annual audit plan.

## m. Commodity price risk or foreign exchange risk and hedging activities

Commodities Tea, Coffee, Salt and Pulse form a major part of business of the company and hence commodity price risk is one of the important risks for the Company. The Company has a robust framework in place to protect its interests from risks arising out of market volatility. Based on continuous monitoring and market intelligence the sales and procurement team take appropriate strategy to deal with the market volatility.

The Company operates in various geographies and is exposed to foreign exchange risk on it's various currency exposures. Volatility in currency exchange movements in GBP, USD, CAD, and AUD can have an impact on the Company's operations. The Company has established foreign currency hedging policies and practices to manage these risks.

## n. Commodity Risk faced by the Company during the year and how they are managed

Tea is a multi-harvest agricultural commodity and is sold through public auction or by private agreement. Price levels reflect supply/demand position and as an agricultural crop, supply/ demand balance may change quickly based on the changes in weather conditions. The Company manages these risks by actively managing the sourcing of tea, distribution of source of supply, private purchases and alternate blending strategies.

Cyclical movement in coffee commodity markets impacts our business. A decline in the coffee terminal prices results in lower realizations for our Coffee Plantation business in India. Whereas, the US branded coffee operations gets adversely impacted with increase in the coffee terminal prices. The Company manages these commodity risks based on appropriate hedging strategies.

For Salt and Pulses, the price fluctuations are managed through active sourcing and commercial negotiations with customers and suppliers.

The Company's exposure to market risks for commodities and currencies are detailed in Note 36B under "Financial Risk Management" forming part of Notes to the Consolidated Financial Statements

The details of the unclaimed dividends so transferred are available on the Company's website, <http://https://www.tataconsumer.com/investors/investor-information/unclaimed-dividend> and in the website of the Ministry of Corporate Affairs at [www.mca.gov.in](http://www.mca.gov.in).

It may be noted that the unclaimed dividend for the financial year 2012-13 declared on July 15, 2013, is due to be transferred to the IEPF by September 2020. The same can, however, be claimed by the Members by August 23, 2020.

Members who have not encashed the dividend warrant(s) from the financial year ended March 31, 2013 onwards may forward their claims to the Company's Registrar and Share Transfer Agents before they are due to be transferred to the IEPF.

In accordance with Section 124(6) of the Act, read with the IEPF Rules, all the shares in respect of which dividend has remained unclaimed or unpaid for seven consecutive years or more are required to be transferred to the demat Account of the IEPF Authority. Accordingly, all the shares in respect of which dividends were declared upto the financial years ended March 31, 2012 and remained unpaid or unclaimed were due to be transferred to the IEPF. The Company had sent notices to all such members in this

regard and published a newspaper advertisement and thereafter transferred the shares to the IEPF during financial year 2019-2020. The details of such shares transferred have been uploaded in the Company's website <http://https://www.tataconsumer.com/investors/investor-information/iepf-related-matters>.

The shares and unclaimed dividend transferred to the IEPF can however be claimed back by the concerned shareholders from IEPF Authority after complying with the procedure prescribed under the IEPF Rules. The Member/Claimant is required to make an online application to the IEPF Authority in e-Form No. IEPF -5 (available on [iepf.gov.in](http://iepf.gov.in)) along with requisite fees as decided by the IEPF Authority from time to time.

The following table gives information relating to outstanding dividend accounts and the dates when due for transfer to IEPF:

Financial year ended	Date of payment of dividend	Last date for claiming Unpaid dividend	Transfer to IEP Fund in
March 31, 2013	18.07.2013	06.08. 2020	August 2020

## Independent Auditor's Report

### To The Members of Tata Consumer Products Limited (Formerly Tata Global Beverages Limited) Report on the Audit of the Standalone Financial Statements

#### Opinion

We have audited the accompanying standalone financial statements of Tata Consumer Products Limited (the "Company"), which comprise the Balance Sheet as at March 31, 2020, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

#### Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matter to be communicated in our report.

Evaluated the differences identified by these independent firms during their physical verification of inventories and it was noted that there were no major deviations found.</li> </ul> </li> </ul>

## Independent Auditor's Report (continued)

### Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Management Discussion and Analysis Report and Business Responsibility Report, but does not include the consolidated financial statements, standalone financial statements and our auditor's report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and

presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

### Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has

adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
  - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
  - c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flow dealt with by this Report are in agreement with the relevant books of account.
  - d) In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act.
  - e) On the basis of the written representations received from the directors as on March 31, 2020 taken on record by the Board of Directors, none of the directors are disqualified as on March 31, 2020 from being appointed as a director in terms of Section 164(2) of the Act.
  - f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.

## Independent Auditor's Report (continued)

- g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended,

In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

- i. The Company has disclosed the impact of pending litigations on its financial position in its standalone financial statements.
- ii. The Company has made provision, as required under the applicable law or accounting

standards, for material foreseeable losses on long-term contracts including derivative contracts.

- iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

2. As required by the Companies (Auditor's Report) Order, 2016 (the "Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

## ANNEXURE “A” TO THE INDEPENDENT AUDITOR’S REPORT

(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date)

### Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Tata Consumer Products Limited (the “Company”) as of March 31, 2020 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

### Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### Auditor’s Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

### Meaning of Internal Financial Controls Over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

### Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control

over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the

Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

## ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

- (i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.
- (b) The Company has a program of verification of fixed assets to cover all the items in a phased manner over a period of three years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the program, certain fixed assets were physically verified by the Management during the year. According to the information and explanations given to us, no material discrepancies were noticed on such verification.
- (c) According to the information and explanations given to us and the records examined by us and based on the examination of the registered sale deed / transfer deed / conveyance deed provided to us, we report that, the title deeds, comprising all the immovable properties of land and buildings which are freehold, are held in the name of the Company as at the balance sheet date. In respect of immovable properties of land and buildings that have been taken on lease and disclosed as fixed asset in the financial statements, the lease agreements are in the name of the Company, where the Company is the lessee in the agreement.
- (ii) As explained to us, the inventories were physically verified during the year by the Management at reasonable intervals and no material discrepancies were noticed on physical verification.
- (iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013.
- (iv) In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Sections 185 and 186 of the Companies Act, 2013 in respect of grant of loans, making investments and providing guarantees and securities, as applicable.
- (v) According to the information and explanations given to us, the Company has not accepted any deposits and hence reporting under clause (v) of the Order is not applicable.
- (vi) The maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended prescribed by the Central Government under sub-section (1) of Section 148 of the Companies Act, 2013, and are of the opinion that, prima facie, the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.
- (vii) According to the information and explanations given to us, in respect of statutory dues:
  - (a) The Company has generally been regular in depositing undisputed statutory dues, including Provident Fund, Employees' State Insurance, Income-tax, Goods and Service Tax, Customs Duty, cess and other material statutory dues applicable to it to the appropriate authorities.
  - (b) There were no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-tax, Goods and Service Tax, Customs Duty, cess and other material statutory dues in arrears as at March 31, 2020 for a period of more than six months from the date they became payable.
  - (c) There are no disputed dues of Customs Duty. Details of dues of Income-tax, Sales Tax, Service Tax and State Value Added Tax which have not been

The presentation of the Financial Statements is based on Ind AS Schedule III of the Companies Act, 2013.

#### (b) Basis of measurement

The financial statements have been prepared on an accrual basis and in accordance with the historical cost convention, unless otherwise stated. All assets and liabilities are classified into current and non-current generally based on the criteria of realisation/settlement within a twelve month period from the balance sheet date.

## 2.2 Significant Accounting Policies

The principal accounting policies applied in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### (a) Business Combinations

The Company applies the acquisition method to account for business combination. The consideration transferred for the acquisition of a business comprises the,

- fair values of the assets transferred,
- liabilities incurred to the former owners of the acquired business,
- equity interests issued by the Company, and
- fair value of any asset or liability resulting from a contingent consideration arrangement

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the fair value of consideration over the identifiable net asset acquired is recorded as goodwill, if the consideration is lower, the gain is recognised directly in equity as capital reserve. In case, business acquisition is classified as bargain purchase, the aforementioned gain is recognised in the other comprehensive income and accumulated in equity as capital reserve.

Business combinations involving entities or businesses under common control are accounted for using the pooling of interest method. Under pooling of interest method, the assets and liabilities of the combining entities are reflected at their carrying amounts, with adjustments only to harmonise accounting policies.

Acquisition-related costs are expensed as incurred.

Any contingent consideration to be transferred by the Company is recognised at fair value at

# Notes to Financial Statements (continued)

the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in the statement of profit and loss. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

**(b) Property, Plant and Equipment**

**i) Recognition and measurement:**

Property, plant and equipment including bearer assets are carried at historical cost of acquisition less accumulated depreciation and accumulated impairment losses, if any. Historical cost includes expenditure that is directly attributable to the acquisition of the assets. Subsequent expenditure is added to its book value only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replacements are derecognised. All repairs and maintenance are charged to the statement of profit and loss during the financial year in which they are incurred.

**ii) Depreciation:**

Depreciation is provided on assets to get the initial cost down to the residual value, including on asset created on lands under lease. Land is not depreciated. Depreciation is provided on a straight line basis over the estimated useful life of the asset as prescribed in Schedule II to the Companies Act, 2013 or based on a technical evaluation of the asset. Cost incurred on assets under development are disclosed under capital work in progress and not depreciated till asset is ready to use.

The residual values and useful lives for depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. An asset's carrying amount is written down immediately to its recoverable

amount if the asset's carrying amount is greater than its estimated recoverable amount. Recoverable amount is higher of the value in use or exchange.

Gains and losses on disposals are determined by comparing the sale proceeds with the carrying amount and are recognised in the statement of profit and loss.

**iii) Estimated useful lives of items of property, plant and equipment are as follows:**

Category	Useful life
Leasehold buildings / improvements	Lower of lease term or useful life
Buildings	30 to 60 years
Plant and Machinery	10 to 25 years
Furniture and Fixtures and other Office Equipments	5 to 16 years
Computer, Printers and other IT Assets	2 to 5 years
Motor vehicles	8 to 10 years

**(c) Biological Assets**

Biological assets are classified as bearer biological assets and consumable biological assets. Consumable biological assets are those that are to be harvested as agricultural produce. Bearer biological assets which are held to bear agricultural produce are classified as Bearer assets.

The Company recognises tea bushes and shade trees as bearer assets, with further classification as mature bearer assets and immature bearer assets. Mature bearer plants are those that have attained harvestable stage.

Bearer assets are carried at historical cost of acquisition less accumulated depreciation and accumulated impairment losses, if any. Subsequent expenditure on bearer assets are added to its book value only when it is probable that future economic benefits associated with

the item will flow to the Company and the cost of the item can be measured reliably.

Cost incurred for new plantations and immature areas are capitalised. The cost of immature areas coming into bearing is transferred to mature plantations and depreciated over their estimated useful life which has been ascribed to be within the range of 50 years.

Tea is designated as agricultural produce at the point of harvest and is measured at their fair value less cost to sell as at each reporting date. Any changes in fair value are recognised in the statement of profit and loss in the year in which they arise.

#### **(d) Investment Property**

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the Company, are classified as investment property. Investment property is measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure related to investment properties are added to its book value only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Investment properties are depreciated using the straight line method over the useful lives. Depreciable investment properties have been ascribed a useful life in the range of 60 years.

#### **(e) Intangible Assets**

##### **(i) Goodwill**

Goodwill arising on a business combination represents the excess of the fair value of consideration over the identifiable net asset acquired. Fair value of consideration represents the aggregate of the consideration transferred, a reliable estimate of contingent consideration payable, the amount of any non-controlling interest in the acquiree and the fair value of

any previous equity interest in the acquiree on the acquisition date. Net assets acquired represents the fair value of the identifiable assets acquired and liabilities assumed.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Cash generating units (CGUs), or groups of CGUs, that is expected to benefit from the acquisition itself or from the synergies of the combination or both. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes.

Goodwill is not amortised but is tested for impairment. Goodwill impairment reviews are generally undertaken annually. The carrying value of the CGU containing the goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognised immediately as an expense and is not subsequently reversed unless the CGU is classified as "Asset held for sale" and there is evidence of reversal. Goodwill is subsequently measured at cost less amounts provided for impairment.

##### **(ii) Brands and Trademarks**

Brands/trademarks acquired separately are measured on initial recognition at the fair value of consideration paid. Following initial recognition, brands/trademarks are carried at cost less any accumulated amortisation and impairment losses, if any. A brand/trademark acquired as part of a business combination is recognised outside goodwill, at fair value at the date of acquisition, if the asset is separable or arises from contractual or other legal rights and its fair value can be measured reliably.

The useful lives of brands/trademarks are assessed to be either finite or indefinite. The assessment includes whether the brand/trademark name will continue to trade and the expected lifetime of the

## Notes to Financial Statements (continued)

brand/trademark. Amortisation is charged on assets with finite lives on a straight-line basis over a period appropriate to the asset's useful life. The carrying values of brands/trademarks with finite and indefinite lives are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Brands/trademark with indefinite useful lives are also tested for impairment annually either individually or, if the intangible asset does not generate cash flows that are largely independent of those from other assets or groups of assets, as part of the cash-generating unit to which it belongs. Such intangibles are not amortised. The useful life of a brand with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

Brands and trademarks having finite lives have been ascribed a useful life within the range of 10 – 20 years.

### (iii) Customer relationships

Customer relationships acquired in a business combination are recognised at fair value at the acquisition date. The customer relationships have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method over the estimated useful life of the customer relationship. Customer intangibles have been ascribed a useful life to be within the range of 8- 20 years.

### (iv) Distribution Network

Distribution network acquired in a business combination are recognised at fair value at the acquisition date. The distribution networks have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method over the

estimated useful life of the distribution network. Distribution networks have been ascribed a useful life within a range of 8 – 10 years.

### (v) Patent / knowhow

Product development cost incurred on new products having enduring benefits is recognised as Intangible Assets and are amortised over a period of 10 years.

### (vi) Computer software

Software development costs are expensed unless technical and commercial feasibility of the project is demonstrated, future economic benefits are probable, the Company has an intention and ability to develop and sell or use the software and the costs can be measured reliably. Directly attributable costs that are capitalised as part of the software product include the software development cost, related employee costs and an appropriate portion of relevant overheads. Other expenditure that do not meet these criteria are recognised as an expense as incurred, developmental costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Computer software development costs recognised as assets are amortised over their estimated useful lives, which range between 3 to 5 years.

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives of 3 to 5 years.

### (vii) Website Cost

The cost incurred for separate acquisition for website for Company's own use is capitalised in the books of accounts of the Company. In case of internally generated website, the cost is capitalised only if the future economic benefits are expected to flow to the entity and if the asset can be controlled by entity as a result of past events.

These costs are amortised over their estimated useful lives of 5 years.

#### (vii) Research and Development

Research expenditure is recognised in the statement of profit and loss as incurred. Development expenditure is capitalized only if the costs can be reliably measured, future economic benefits are probable, the product is technically feasible and the Company has the intent and the resources to complete the project. Development assets are amortised based on the estimated useful life, as appropriate.

#### (f) Impairment of tangible and intangible assets

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest possible levels for which there are independent cash inflows (cash-generating units). Prior impairment of non-financial assets (other than goodwill) are reviewed for possible reversal of impairment losses at each reporting date. Intangible assets that have an indefinite useful life or intangible assets not ready to use are not subject to amortisation and are tested annually for impairment.

#### (g) Assets held for sale and disposal groups

Non-current assets held for sale and disposal groups are presented separately in the balance sheet when the following criteria are met:

- the Company is committed to selling the asset or disposal group;
- the assets are available for sale immediately;

- an active plan of sale has commenced; and
- sale is expected to be completed within 12 months.

Assets held for sale and disposal groups are measured at the lower of their carrying amount and fair value less cost to sell. Assets held for sale are no longer amortised or depreciated.

#### (h) Financial Instruments

##### Financial assets

The Company classifies its financial assets in the following categories:

- i) Financial assets at amortised cost- Assets that are held for collection of contractual cash flows on specified dates where those cash flows represent solely payments of principal and interest are measured at amortised cost.

These are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. Financial assets are measured initially at fair value plus transaction costs and subsequently, if maturing after 12 months period, using the effective interest method, less any impairment loss.

Debt instruments which do not meet the criteria of amortised cost are measured at fair value and classified as fair value through profit and loss or through other comprehensive income, as applicable.

Financial assets at amortised cost are represented by trade receivables, security deposits, cash and cash equivalent, employee and other advances.

- ii) Financial assets at fair value through other comprehensive income (FVTOCI) - All equity investments are measured at fair values. Investments which are not held for trading purposes and where the Company has exercised the option to classify the investment as at fair value

## Notes to Financial Statements (continued)

through other comprehensive income, all fair value changes on the investment are recognised in OCI. The accumulated gains or losses recognised in OCI are reclassified to retained earnings on sale of such investments.

Debt instruments that are held within a business model whose objectives are achieved by both, collecting contractual cash flows and selling the debt instruments and the contractual terms of which give rise to cash flows that are solely payment of principal and interest on specified dates are subsequently measured at fair value through other comprehensive income. All other debt instruments are measured at fair value and classified as fair value through profit or loss.

- iii) Financial assets at fair value through profit or loss (FVTPL) - Financial assets which are not classified in any of the categories above are fair value through profit or loss.
- iv) Impairment of financial assets - The Company assesses expected credit losses associated with its assets carried at amortised cost and fair value through other comprehensive income based on Company's past history of recovery, credit-worthiness of the counter party and existing market conditions. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables, the Company applies the simplified approach for recognition of impairment allowance as provided in Ind AS 109 – Financial Instruments, which requires expected lifetime losses to be recognised on initial recognition of the receivables.

### Financial liabilities

#### Initial recognition and measurement

All financial liabilities are recognised initially at fair value and in case of loans and borrowings net of directly attributable costs.

Financial liabilities are subsequently measured at amortised cost using effective interest method. For trade and other payable maturing within one year from the balance sheet date, the carrying value approximates fair value due to short maturity of these instruments.

### Investment in Subsidiaries, Associates and Joint Ventures

Investment in subsidiaries, associates and joint ventures are accounted at cost in the financial statements.

### Derivative financial instruments and hedging activities

A derivative is a financial instrument which changes value in response to changes in an underlying asset and is settled at a future date. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. The Company designates certain derivatives as either:

- (a) hedges of the fair value of recognised assets or liabilities (fair value hedge); or
- (b) hedges of a particular risk associated with a firm commitment or a highly probable forecast transaction (cash flow hedge);

The Company documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Company also documents its assessment, both at hedge inception and on an on-going basis, of whether the derivatives that are used in hedging transactions are effective in offsetting changes in cash flows of hedged items.

Movements in the hedging reserve are accounted in other comprehensive income and are shown within the statement of changes in equity. The full fair value of a hedging derivative

is classified as a non-current asset or liability when the remaining maturity of hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives are classified as a current asset or liability.

**(a) Fair value hedge**

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the statement of profit and loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Company only applies fair value hedge accounting for hedging foreign exchange risk on recognised assets and liabilities.

**(b) Cash flow hedge**

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income. The ineffective portion of changes in the fair value of the derivative is recognised in the statement of profit and loss.

Gains or losses accumulated in equity are reclassified to the statement of profit and loss in the periods when the hedged item affects the statement of profit and loss.

When a hedging instrument expires or is swapped or unwound, or when a hedge no longer meets the criteria for hedge accounting, any accumulated gain or loss in other equity remains there and is reclassified to statement of profit and loss when the forecasted cash flows affect profit or loss.

When a forecasted transaction is no longer expected to occur, the cumulative gains/losses that were reported in equity are immediately transferred to the statement of profit and loss.

**Fair value measurement**

The Company classifies the fair value of its financial instruments in the following hierarchy, based on the inputs used in their valuation:

- i) Level 1 - The fair value of financial instruments quoted in active markets is based on their quoted closing price at the balance sheet date.
- ii) Level 2 - The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques using observable market data. Such valuation techniques include discounted cash flows, standard valuation models based on market parameters for interest rates, yield curves or foreign exchange rates, dealer quotes for similar instruments and use of comparable arm's length transactions.
- iii) Level 3 - The fair value of financial instruments that are measured on the basis of entity specific valuations using inputs that are not based on observable market data (unobservable inputs).

**Interest and dividend income**

Interest income is recognised within finance income using the effective interest method. When a loan and receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables is recognised using the original effective interest rate.

Dividend income is recognised when the right to receive payment is established. Income from investments are accounted on an accrual basis.

**(i) Inventories**

Raw materials, traded and finished goods are stated at the lower of cost and net

## Notes to Financial Statements (continued)

realisable value, net realisable value represents the estimated selling price less all estimated cost of completion and selling expenses. Stores and spares are carried at cost. Provision is made for obsolete, slow-moving and defective stocks, where necessary.

Cost is determined on weighted average method for all categories of inventories other than for auction/privately bought teas wherein cost is measured at actual cost of each lot. Cost comprises expenditure incurred in the normal course of business in bringing such inventories to its present location and condition, where applicable, include appropriate overheads based on normal level of activity. Agricultural produce included within inventory largely comprise of tea and in accordance with Ind AS 41, on initial recognition, are measured at fair value less estimated point of sale costs.

Provision is made for obsolescence and other anticipated losses wherever considered necessary.

### **(j) Employee Benefits**

The Company operates various post-employment schemes, including both defined benefit and defined contribution plans and post-employment medical plans. Short term employee benefits are recognised on an undiscounted basis whereas Long term employee benefits are recognised on a discounted basis.

#### **i) Post retirement employee benefits:**

Contribution to post retirement defined benefit and contribution schemes like Provident Fund (PF), Superannuation Schemes and other such schemes are accounted for on accrual basis by the Company. With regard to Provident Fund contribution made by the Company to a Self-Administered Trust, the Company is generally liable for annual contributions and for any shortfall in the fund assets based on

the government specified minimum rates of return. Such contributions and shortfalls are recognised as an expense in the year incurred.

Post retirement defined benefits including gratuity, pension and medical benefits for qualifying executives/whole time directors are determined through independent actuarial valuation at year end and charge recognised in the statement of profit and loss. Interest costs on employee benefit schemes have been classified within finance cost. For schemes, where funds have been set up, annual contributions determined as payable in the actuarial valuation report are contributed. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income. Such accumulated re-measurement balances are never reclassified into the statement of profit and loss subsequently.

The Company recognises in the statement of profit and loss, gains or losses on curtailment or settlement of a defined benefit plan as and when the curtailment or settlement occurs.

#### **ii) Other employee benefits:**

Other employee benefits are accounted for on accrual basis. Liabilities for compensated absences are determined based on independent actuarial valuation at year end and charge is recognised in the statement of profit and loss.

#### **iii) Employee termination benefits:**

Payments to employees on termination along with additional liabilities towards retirement benefits arising pursuant to the termination are charged to the statement of profit and loss in the year in which it is incurred.

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or

whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognises costs for a restructuring that is within the scope of "Ind AS 37 – Provisions, Contingent Liabilities and Contingent Assets" and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

**(k) Provisions, Contingent Liabilities and Contingent Assets**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. If the effect of the time value of money is material, provisions are discounted. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liabilities exist when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one

or more uncertain future events not wholly within the control of the Company, or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required or the amount cannot be reliably estimated. Contingent liabilities are appropriately disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is a possible asset arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognised till the realisation of the income is virtually certain. However the same are disclosed in the financial statements where an inflow of economic benefit is possible.

**(l) Income Tax**

**i) Current Income Tax:**

Current Income Tax is measured at the amount expected to be paid to the tax authorities in accordance with Income Tax Act, 1961.

**ii) Deferred Tax:**

Deferred tax is provided using the balance sheet approach on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The tax rates and tax laws used to compute the tax are those that are enacted or substantively enacted at the reporting date. Current income tax and deferred tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss.

## Notes to Financial Statements (continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

**iii) Minimum Alternate Tax:**

According to section 115JAA of the Income Tax Act, 1961, Minimum Alternative Tax ('MAT') paid over and above the normal income tax in a subject year is eligible for carry forward for fifteen succeeding assessment years for set-off against normal income tax liability. The MAT credit asset is assessed against the normal income tax during the specified period.

**(m) Foreign currency and translations**

**i) Functional and presentation currency**

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ("functional currency"). The financial statements are presented in Indian Rupees (INR), which is the functional currency of the Company.

**ii) Foreign currency transactions and balances**

Transactions in foreign currencies are recorded at the exchange rate at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at the year-end rate. Any resultant exchange differences are taken to the statement of profit and loss, except when deferred in other comprehensive income as qualifying cash flow hedges. Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are recorded at the exchange rate prevalent at the date of transaction.

**(n) Revenue from contracts with customer**

Revenue from contract with customers is recognised when the Company satisfies performance obligation by transferring promised goods and services to the customer. Performance obligations maybe satisfied at a point of time or over a period of time. Performance obligations satisfied over a period of time are recognised as per the terms of relevant contractual agreements/ arrangements. Performance obligations are said to be satisfied at a point of time when the customer obtains controls of the asset or when services are rendered.

Revenue is measured based on transaction price, which is the fair value of the consideration received or receivable, stated net of discounts, returns and value added tax. Transaction price is recognised based on the price specified in the contract, net of the estimated sales incentives/ discounts. Accumulated experience is used to estimate and provide for the discounts/ right of return, using the expected value method.

A refund liability is recognised for expected returns in relation to sales made and corresponding assets are recognised for the products expected to be returned.

The Company recognises as an asset, the incremental costs of obtaining a contract with a customer, if the Company expects to recover those costs. The said asset is amortised on a systematic basis consistent with the transfer to goods or services to the customer.

**(o) Government Grant**

Government grants including any non-monetary grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. Government grants are recognised in the statement of profit and loss on a systematic basis over the periods in which the related costs, which the grants are intended to compensate, are recognised as expenses. Government grants related to property, plant and equipment are presented at fair value and grants are recognised as deferred income.

**(p) Leases****As a lessee**

At inception of a contract, the Company assesses whether a contract is or contains a lease. A contract is, or contains, a lease if a contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract conveys the right to use an identified asset;
- the Company has the right to obtain substantially all the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the identified asset.

At the date of commencement of a lease, the Company recognises a right-of-use asset ("ROU assets") and a corresponding lease liability for all leases, except for leases with a term of twelve months or less (short-term leases) and low value leases. For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease. Company has considered all leases where the value of an underlying asset does not individually exceed Rs.0.05 Crores, or equivalent as a lease of low value assets.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. Lease payments to be made under such reasonably certain extension options are included in the measurement of ROU assets and lease liabilities.

Lease liability is measured by discounting the lease payments using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of the leases. Lease liabilities are remeasured with a corresponding adjustment

to the related right of use asset if the Company changes its assessment of whether it will exercise an extension or a termination option.

Lease payments are allocated between principal and finance cost. The finance cost is charged to statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

The ROU assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives and restoration costs. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any. ROU assets are depreciated on a straight-line basis over the asset's useful life (refer 2.2(b)) or the lease whichever is shorter.

Impairment of ROU assets is in accordance with the Company's accounting policy for impairment of tangible and intangible assets.

**As a lessor**

Lease income from operating leases where the Company is a lessor is recognised in the statement of profit and loss on a straight-line basis over the lease term.

**(q) Borrowing Costs**

Borrowing costs consist of interest, ancillary and other costs that the Company incurs in connection with the borrowing of funds and interest relating to other financial liabilities. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

## Notes to Financial Statements (continued)

### (r) Exceptional Items

Exceptional items are disclosed separately in the financial statements where it is necessary to do so to provide further understanding of the financial performance of the Company. These are material items of income or expense that have to be shown separately due to their nature or incidence.

### (s) Earnings per share

The Company presents basic and diluted earnings per share data for its ordinary shares. Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held, for the effects of all dilutive potential ordinary shares.

### (t) Segment Reporting

Segments are identified based on the manner in which the Company's Chief Operating Decision Maker ('CODM') decides about resource allocation and reviews performance.

Segment results that are reported to the CODM include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Segment capital expenditure is the total cost incurred during the period to acquire property and equipment and intangible assets.

### (u) Cash and Cash equivalents

Cash and cash equivalents for the purpose of presentation in the statement of cash flows comprises of cash at bank and in hand, bank overdraft and short term highly liquid investments/bank deposits with an original maturity of three months or less that are readily

convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

### (v) Offsetting instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

### (w) Events after the reporting period

Adjusting events are events that provide further evidence of conditions that existed at the end of the reporting period. The financial statements are adjusted for such events before authorisation for issue.

Non-adjusting events are events that are indicative of conditions that arose after the end of the reporting period. Non-adjusting events after the reporting date are not accounted, but disclosed if material.

## 2.3 Key accounting judgement, estimates and assumptions

The preparation of the financial statements requires management to exercise judgment and to make estimates and assumptions. These estimates and associated assumptions are based on historical experiences and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an on-going basis. Revision to accounting estimates are recognised in the period in which the estimate is revised if the revision affect only that period, or in the period of the revision and future periods if the revision affects both current and future period.

The areas involving critical estimates or judgements are:

#### **Goodwill and Intangibles**

The Company records all intangible assets including goodwill acquired as part of a business combination at fair value. In relation to business combinations, judgement is required to be exercised on determining the fair values, identification and measurement of assets acquired and liabilities assumed, in allocation of purchase consideration, in deciding the amortisation policy and on tax treatment of goodwill and intangible assets acquired. Appropriate independent professional advice is also obtained, as necessary. Goodwill is assigned an indefinite useful life whilst intangible assets are assigned an indefinite or finite useful life. Goodwill and intangible assets assigned an indefinite useful life are as a minimum subject to annual tests of impairment in line with the accounting policy whereas all other intangibles assets are amortised. (Refer Note 5)

#### **Depreciation and amortisation**

Depreciation and amortisation is based on management estimates of the future useful lives of the property, plant and equipment and intangible assets. Estimates may change due to technological developments, competition, changes in market conditions and other factors and may result in changes in the estimated useful life and in the depreciation and amortisation charges. (Refer Note 3, 4, 4A and 5)

#### **Employee Benefits**

The present value of the defined benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost/(income) for pensions include the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations.

The Company determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Company considers the interest rates of Government securities that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension obligation. Other key assumptions for pension obligations are based in part on current market conditions. (Refer Note 39)

#### **Fair value of derivatives and other financial instruments**

All financial instruments are required to be fair valued as at the balance sheet date, as provided in Ind AS 109 and Ind AS 113. Being a critical estimate, judgement is exercised to determine the carrying values. The fair value of financial instruments that are unlisted and not traded in an active market is determined at fair values assessed based on recent transactions entered into with third parties, based on valuation done by external appraisers etc., as applicable. (Refer Note 38)

\* Brands acquired during the year include an amount of Rs 2093.33 Crores which has been categorised as brand with indefinite life and will be annually tested for impairment. Based on analysis of all relevant factors such as market share, stability, potential obsolescence, profitability etc, the brand is expected to provide cash inflows to the Company over an indefinite period.

**Impairment of Goodwill and intangible assets with indefinite useful life**

For the purpose of Impairment Testing, Goodwill has been allocated to Company CGUs as follows:

	Rs in Crores
	<b>2020</b>
India Food Business ( Refer Note 40A)	3562.41
India Beverages Business ( Refer Note 40B)	16.10
<b>Total</b>	<b>3578.51</b>

For the purpose of Impairment Testing, Indefinite life brand relates to following Company CGUs:

	Rs in Crores
	<b>2020</b>
India Food Business (Refer Note 40A)	2093.33
<b>Total</b>	<b>2093.33</b>

Both goodwill as well as indefinite life brand as above arose during the year (Refer Note 40). The fair values of businesses acquired were allocated to various identifiable tangible and intangible assets and the balance has been categorised as goodwill.

Value in use i.e. the enterprise value for each CGU is calculated using cash flow projections over a period of 5 years, with amounts based on medium term strategic plans, subject to experience adjustments. Cash flows beyond the 5 years period are extrapolated using a long term growth rate.

Key assumptions in the business plans include future revenue, associated future levels of marketing support and other relevant cost-base. These assumptions are based on historical trends and future market expectations specific to each CGU.

Other key assumptions applied in determining value in use are:

- Long term growth rate – Cash flows beyond the 5 years period are extrapolated using the estimated long-term growth rate applicable for the geographies in which the CGUs operate.
- Discount rate – The discount rate is based on a Weighted Average Cost of Capital (WACC) for comparable companies operating in similar markets.

The long term growth rates and discount rates applied in the value in use calculations have been set out below:

	Pre Tax Discount rate	Long Term Growth Rate
India Food Business (Refer Note 40A)	13.40%	6.0%
India Beverages Business (Refer Note 40B)	13.40%	5.0%

<b>Total</b>	<b>1.35</b>

Finance income on the net investment in the sublease recognised in the financial statement is Rs 0.03 Crores.

**Adoption of Ind AS-116 Leases**

The Company has adopted Ind AS 116, effective from April 1, 2019 and applied the standard to its leases retrospectively. The cumulative effect of initially applying the standard was recognised on April 1, 2019 as an adjustment to the retained earnings. The Company has not restated comparative for the year ended March 31, 2019.

On transition, the adoption of new standard resulted in recognition of Right-of-use Asset of Rs. 78.75 Crores, Net-investment in sublease of ROU asset of Rs. NIL and a lease liability of Rs. 101.47 Crores. The cumulative effect of applying the standard, amounting to Rs. 14.76 Crores was debited to retained earnings net of taxes (including the deferred tax of Rs. 7.96 Crores). The effect of this adoption is insignificant on profit for the period.

The principle portion of the lease payments have been disclosed under cash flow from financing activities. The lease payments for operating leases as per Ind AS 17 - Leases, were earlier reported under cash flow from operating activities. The weighted average incremental borrowing rate of 9.01% has been applied to lease liabilities recognised in the balance sheet at the date of initial application. On application of Ind AS 116, the nature of expenses has changed from lease rent in previous periods to depreciation cost for the right-to-use asset, and finance cost for interest accrued on lease liability.

The difference between the future minimum lease rental commitments towards non-cancellable operating leases as at March 31, 2019 compared to the lease liability as accounted as at April 1, 2019 is primarily due to inclusion of present value of the lease payments for the cancellable term of the leases and reduction due to discounting of the lease liabilities as per the requirement of Ind AS 116.

## Notes to Financial Statements (continued)

### B. Measurement of fair values

The basis of measurement in respect to each class of financial asset, financial liability is disclosed in note 2.2(h) of the financial statement.

The fair value of liquid mutual funds and long term equity investment is based on active market. Fair values of certain non-current investment are valued based on discounted cash flow/book value/EBITDA multiple approach. Derivative financial instruments are generally valued based on Black-Scholes-Merton approach and Dollar offset principles.

### C. Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk ;
- Liquidity risk ; and
- Market risk

Covid 19 pandemic - Commencing from the second half of March 2020, Covid 19 pandemic had an impact on the business environment. The Company continued to manufacture and supply essential food and beverage items in the relevant markets. The demand for the Company's products for in home consumption continues with some short term stocking up. However, extended lock down conditions have caused some adverse impact on sales due to disruptions in market openings and supply chain with impact being more pronounced in out of home sectors. Impact on future operations would to a large extent depend on how the pandemic develops and the resultant impact on businesses. Assessment of impact of Covid 19 pandemic on various elements of the risk management framework has been dealt with in the relevant sections below.

#### i. Risk management framework

The Risk Management Committee of the Board is entrusted with the responsibility to assist the Board in overseeing and approving the Company's risk management framework. The Company has a comprehensive Risk policy relating to the risks that the Company faces under various categories like strategic, operational, reputational and other risks and these have been identified and suitable mitigation measures have also been formulated. The Risk Management Committee reviews the key risks and the mitigation measures periodically. The Audit Committee has additional oversight in the area of financial risks and control.

#### ii. Credit risk

Credit risk is the risk that counterparty will not meet its obligations leading to a financial loss. The Company is exposed to credit risk arising from its operating (primarily trade receivables) and investing activities including deposits placed with banks, financial institutions and other corporate deposits. The Company establishes an allowance for impairment that represents its estimate of expected losses in respect of financial assets. Financial assets are classified into performing, under-performing and non-performing. All financial assets are initially considered performing and evaluated periodically for expected credit loss. A default on a financial asset is when there is a significant increase in the credit risk which is evaluated based on the business environment. The assets are written off when the Company is certain about the non-recovery.

**a. Trade Receivables**

The Company has an established credit policy and a credit review mechanism. The Company also covers certain category of its debtors through a credit insurance policy. In such case the insurance provider sets an individual credit limit and also monitors the credit risk. The concentration of credit risk arising from trade receivables is limited due to large customer base.

Management believes that the unimpaired amounts that are past due by more than 90 days are still collectible in full, based on historical payment behaviour and analysis of customer credit risk.

The movement in the allowance for impairment in respect of trade receivables during the year was as follows:

	Rs in Crores
<b>Balance as at March 31, 2018</b>	<b>3.63</b>
Impairment loss recognised	0.51
Amounts written back	-
<b>Balance as at March 31, 2019</b>	<b>4.14</b>
Acquired through Business Combination	11.43
Impairment loss recognised	(1.11)
Amounts written off	-
<b>Balance as at March 31, 2020</b>	<b>14.46</b>

Impact of Covid 19 pandemic - Based on recent trends observed , collection pattern and insurance covers in place, the Company does not envisage any material risks. Future outlook will depend on how the pandemic develops and the resultant impact on businesses

**(b) Financial instruments and cash deposits**

The credit risk from balances / deposits with banks, other financial assets and current investments are managed in accordance with the Company's approved policy. Investments of surplus funds are made only with approved counterparties and within the limits assigned to each counterparties. The limits are assigned to mitigate the concentration risks. These limits are actively monitored by the Company.

Impact of Covid 19 pandemic- Based on the recent trends observed, type of instruments and strength of the counterparties, the Company does not envisage any material risks. Wherever the underlying assets/ instruments are subject to market risks, the same have been marked to market as at the Balance Sheet date. Future outlook will depend on how the pandemic develops and the resultant impact on businesses.

**iii. Liquidity risk**

Liquidity risk is the risk that the Company may encounter difficulty in meeting its obligations. The Company monitors rolling forecast of its liquidity position on the basis of expected cash flows. The Company's approach is to ensure that it has sufficient liquidity or borrowing headroom to meet its obligations at all point in time. The Company has sufficient short term fund based lines, which provides healthy liquidity and these carry highest credit quality rating from reputed credit rating agency.

## Notes to Financial Statements (continued)

**Exposure to liquidity risk**

The following are the remaining contractual maturities of financial liabilities (excluding lease liabilities) at the reporting date. The amounts are gross and undiscounted, and exclude the impact of netting agreements.

Other Financial Liabilities	99.17	99.17	-	-	-

Impact of Covid 19 pandemic- Based on recent trends observed, profitability, cash generation, cash surpluses held and borrowing lines available, the Company does not envisage any material liquidity risks. Future outlook will depend on how the pandemic develops and the resultant impact on businesses.

**iv. Market risk**

Market risk is the risk that the fair value of the future cash flows will fluctuate because of changes in the market prices such as currency risk, interest rate risk and commodity price risk.

**a) Currency risk**

The Company operates across various geographies and is exposed to foreign exchange risk on its various currency exposures. The risk of changes in foreign exchange rates relates primarily to the Company's operating activities and translation risk, which arises from recognition of foreign currency assets and liabilities.

During the year ended March 31, 2020, the Company has designated certain foreign exchange forward contracts as cash flow hedges to mitigate the risk of foreign currency exposure on highly probable forecasted transactions. Hedge effectiveness is determined at inception and periodic prospective effectiveness testing is done to ensure the relationship exist between the hedged items and hedging instruments, including whether the hedging instruments is expected to offset changes in cash flows of hedge items.

Impact of Covid 19 pandemic- The pandemic can cause continuing volatility in the currency market and this risk would be mitigated through effective hedging policies. Further, the Company basis the recent trends believe that the probability of the non-occurrence of forecasted transactions is minimal. The Company also does not expect any material deterioration in both counterparty credit risk and own credit risk. Accordingly, the Group continues to believe that there is no impact on effectiveness of its hedges. Future outlook would depend on how the pandemic develops and the resultant impact on businesses.

Tax impact on above	2.13	(1.48)
<b>Balance at the end of the period</b>	<b>(1.13)</b>	<b>3.27</b>

**b) Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The interest rate risk can also impact the provision for retiral benefits. The Company generally utilises fixed rate borrowings and therefore not subject to interest rate risk, since neither the carrying amount nor the future cash flows will fluctuate because of change in the market interest rates.

The Company is not exposed to significant interest rate risk as at the respective reporting dates.

**c) Price Risk**

The price risk is the risk arising from investments held by the Company and classified in the balance sheet either as fair value through other comprehensive income or at fair value through profit or loss.

The Company's equity investments are mainly strategic in nature and are generally held on a long term basis. Further, the current investments are in units of liquid mutual fund and these are not exposed to significant price risk.

**d) Commodity Risk**

The Company is exposed to the fluctuations in commodity prices mainly for tea, salt and pulses. Mismatch in demand and supply, adverse weather conditions, market expectations etc., can lead to price fluctuations. For tea, the Company manages these price fluctuations by actively managing the sourcing of tea, private purchases and alternate blending strategies without impacting the quality of the blend. For Salt and Pulses, these fluctuations are managed through active sourcing and commercial negotiation with customers and suppliers.

Impact of Covid 19 pandemic- Based on recent trends, the Company believes that depending on the prevalence of lockdown conditions in regions from where raw materials are sourced, disruptions to the supply chain cannot be ruled out. This is an area which will be dynamically reviewed and managed by the Company. Future outlook will depend on how the pandemic develops and the resultant impact on businesses

**Capital Management**

The Company's objective for capital management is to maximize shareholder wealth, safeguard business continuity and support the growth of the Company. The Company determines the capital management requirement based on annual operating plans and long term and other strategic investment plans. The funding requirements are met through optimum mix of borrowed and own funds.

The Company's adjusted net debt to equity position was as follows:

	Rs in Crores	
	2020	2019

#### ii) Defined Benefits:

##### Gratuity, Pension and Post Retiral Medical Benefits:

The Company operates defined benefit schemes like retirement gratuity, defined pension benefits and postretirement medical benefits. There are other superannuation benefits and medical benefits restricted to certain categories of employees/directors in the form of pension, medical and other benefits in terms of a specific policy related to the same. The defined benefit schemes offer specified benefits to the employees on retirement. The gratuity benefit provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days' last drawn salary payable for each completed year of service. Vesting occurs upon completion of five continuous years of service.

# Independent Auditor's Report

## To The Members of Tata Consumer Products Limited (Formerly Tata Global Beverages Limited) Report on the Audit of the Consolidated Financial Statements

### Opinion

We have audited the accompanying consolidated financial statements of Tata Consumer Products Limited (the "Parent") and its subsidiaries, (the Parent and its subsidiaries together referred to as the "Group") which includes the Group's net share of loss in its associates and joint ventures, which comprise the Consolidated Balance Sheet as at March 31, 2020, and the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ('Ind AS') and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group as at March 31, 2020, and their consolidated profit, their consolidated total comprehensive income, their consolidated changes in equity and their consolidated cash flows for the year ended on that date.

### Basis for Opinion

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing specified under section 143 (10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group, its associates and joint ventures in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us and the audit evidence obtained by other auditors in terms of their reports referred to in the Other Matters section below is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Sr. No.	Key Audit Matter	Auditor's Response
1.	<p><b>Acquisition accounting for the Scheme of merger of Consumer Products Business of Tata Chemicals Limited</b> - During the year, the Parent had acquired the Consumer Product Business of Tata Chemicals Ltd. as set out in note 41 of the financial statements.</p> <p>Accounting for the acquisition has involved judgment in order to:</p> <ul style="list-style-type: none"> <li>determine whether the acquisition constitutes a business;</li> <li>determine the fair value of consideration transferred;</li> <li>identify and measure the fair value of the identifiable assets acquired and liabilities assumed;</li> <li>allocate the purchase consideration between identifiable assets and liabilities and goodwill;</li> </ul> <p>This is a material acquisitions for the Group and given the level of estimation and judgement required, we considered it to be a key audit matter.</p> <p>The most significant judgements relate to the identification and valuation of intangible assets acquired. The identified intangible assets are the brands and distribution rights.</p> <p>This includes complex valuation considerations and requires the use of specialists.</p> <p>Refer Note 2.2(a) and note 2.3 to the Financial Statements</p>	<p>Our procedures included but were not limited to:</p> <ul style="list-style-type: none"> <li>We examined the terms and conditions of the scheme of arrangement in order to challenge the Company's assessment of whether the acquisition comprises a business.</li> <li>We tested the completeness of the identified assets and liabilities acquired by comparison to the scheme of arrangement, through discussions with the Company.</li> <li>We assessed the Company's determinations of fair values for assets and liabilities acquired and the methods used to value the underlying assets by: <ul style="list-style-type: none"> <li>Reading the valuation report prepared by the appointed external valuation specialists.</li> <li>Evaluating the competence, objectivity and integrity of the appointed external valuation specialists.</li> <li>Involving our internal valuation specialists in assessing the appropriateness of the methods used to determine the fair values of the brands and distribution rights and including assumptions such as the discount rates applied.</li> </ul> </li> <li>Evaluating appropriateness of adequate disclosures in accordance with the applicable accounting standards.</li> </ul>
2.	<p><b>Impairment of the carrying value of Goodwill on consolidation</b> - On account of competitive pressure and decline in black tea demand in developed markets there is a risk that the Group's goodwill, may be impaired.</p> <p>The Group annually carries out an impairment assessment of goodwill using a value-in-use model which is based on the net present value of the forecast earnings of the cash-generating units. This is calculated using certain assumptions around discount rates, growth rates and cash flow forecasts.</p> <p>Focus was on the goodwill carried in books for cash generating units with lower headroom.</p> <p>Refer Note 6 and note 2.3 of the financial statements</p>	<p>The goodwill has been recorded in the books of an overseas component. The Principal Auditors have used the work of Component Auditors. The Component Auditor has reported that they have performed these procedures:</p> <p>Besides obtaining an understanding of Management's processes and controls with regard to testing the goodwill for impairment the Component Auditor's procedures included the following:</p> <ul style="list-style-type: none"> <li>Engaged internal fair valuation experts to challenge management's underlying assumptions and appropriateness of the valuation model used.</li> <li>Compared the Group's assumptions with comparable benchmarks in relation to key inputs such as long-term growth rates and discount rates.</li> <li>Assessed the appropriateness of the forecast cash flows within the budgeted period based on their understanding of the business and sector experience.</li> <li>Considered historical forecasting accuracy, by comparing previously forecasted cash flows to actual results achieved.</li> <li>Performed a sensitivity analysis in relation to key assumptions.</li> </ul> <p>We also assessed whether the Group's disclosures regarding the sensitivity of the impairment assessment to changes in key assumptions, appropriately reflected the risk inherent in the valuation of Goodwill.</p>

3.	<p><b>Inventory of raw tea, blended tea and salt (Existence)</b> – Parent Company – Management's physical verification of raw tea, blended tea and salt was not physically observed by us subsequent to the year-end due to the restrictions imposed on account of COVID-19.</p> <p>Refer Note 11 of the financial statements</p>	<p>We have carried out following procedures with respect to the existence of tea and salt as at the year-end:</p> <ul style="list-style-type: none"> <li>Evaluated the design and implementation of the controls over physical verification of inventory and tested the operating effectiveness of these controls during the interim periods.</li> <li>Management had carried out the physical verification of inventory on February 29, 2020. On account of COVID – 19 related nationwide lockdown, we were unable to carry out inventory verification at the year end. Consequently, we have performed the following alternate procedures to audit the existence of inventory: <ul style="list-style-type: none"> <li>Participated in the physical verification of inventory of tea and salt conducted by the management subsequent to the year end, through video calls and performed roll back procedures.</li> <li>In case of tea and salt, for the stock held at third party locations, obtained direct confirmation of the inventory held by third party locations subsequent to the year end and performed roll back procedures.</li> <li>Obtained verification reports of the independent chartered accountant firms which were engaged by the Company for the Management inventory verification process. Verified the instructions provided by the management to those independent firms. Evaluated the differences identified by these independent firms during their physical verification of inventories and it was noted that there were no major deviations found.</li> </ul> </li> </ul>
4	<p><b>Inventory of raw / cured coffee beans ("green coffee beans"), tea and pepper (Existence and Valuation)</b> – Tata Coffee Limited - Physical verification of green coffee beans, tea and pepper was performed by the management subsequent to the year-end due to the restrictions imposed on account of COVID-19.</p> <p>Finished goods inventory are valued at lower of cost and net realizable value (estimated selling price less estimated cost to sell). Considering that there is always a volatility in the selling price of green coffee beans, tea and pepper, which is dependent upon various market conditions and the possible impact of COVID-19, determination of the net realizable value for green coffee beans, tea and pepper involves significant management judgement and therefore has been considered as a key audit matter.</p>	<p>This matter is in respect of the Tata Coffee Limited component. The Principal Auditors have used the work of Component Auditors. The Component Auditor has reported that they have performed the following procedures:</p> <p>With respect to the existence of green coffee beans, tea and pepper as at the year end:</p> <ul style="list-style-type: none"> <li>Evaluated the design and implementation of the controls over physical verification of inventory and tested the operating effectiveness of these controls during the interim periods.</li> <li>Due to the COVID-19 related lock-down we were not able to participate in the physical verification of inventory that was carried out by the management subsequent to the year end. Consequently, we have performed the following alternate procedures to audit the existence of inventory:</li> </ul>

Sr. No.	Key Audit Matter	Auditor's Response
	<p>The total value of finished goods (commodities) as at 31 March, 2020 is Rs.114.76 crore.</p>	<ul style="list-style-type: none"> <li>• Participated in the physical verification of inventory of green coffee beans, tea and pepper conducted by the management subsequent to the year end, through video calls and performed roll back procedures.</li> <li>• Compared the sum of disaggregated data of quantity of fruit coffee and pepper that was picked by the workers during the season ongoing as at the balance sheet date, with the aggregate quantity of harvested produce of fruit coffee and pepper considered by the management and obtained and tested the explanations for material differences, if any, between the two sets of data.</li> <li>• Compared the sum of disaggregated data of quantity of raw coffee transferred by the plantations to the curing unit and obtained and tested the explanations for material differences, if any, between such data and the quantity considered as physical inventory as at the Balance Sheet date.</li> <li>• Verified the following conversions: (a) the quantity of fruit coffee picked into raw coffee and (b) the raw coffee received at curing unit into cured coffee and (c) the quantity of fruit coffee into cured coffee, each by applying the established conversion norms and ensured that the quantity of coffee considered as inventory by the management agreed with such converted quantities.</li> <li>• In case of pepper, verified the management estimate of grades of the harvested produce of pepper and compared the same with the historical pattern of grades of harvested pepper and developed a sensitivity analysis to understand whether a material variation to the value of inventory would be caused due to changes in grades.</li> <li>• In case of tea, for the stock held at estates, which have been subsequently despatched to third party warehouses, obtained direct confirmation of the inventory held by third party warehouses subsequent to the year end and performed roll back procedures.</li> <li>• For stock held at third party warehouses, obtained direct confirmation of the inventory held by them as at the year end.</li> </ul> <p>With respect to the net realisable value:</p> <ul style="list-style-type: none"> <li>• Obtained an understanding of the determination of the net realizable values of green coffee beans, tea and pepper and assessed and tested the reasonableness of the significant judgements applied by the management.</li> <li>• Evaluated the design of internal controls relating to the valuation of green coffee beans, tea and pepper and also tested the operating effectiveness of the aforesaid controls.</li> <li>• To assess the reasonableness of the net realisable value that was estimated and considered by the management:</li> <li>• With respect to the committed stock of green coffee beans for which the Company has entered into contracts with the respective customers, on a sample basis, compared the net realisable value with the rates as per the said contracts;</li> <li>• With respect to the uncommitted stock of green coffee beans, obtained the market information relating to coffee prices and assessed the reasonableness of the adjustments that were made to such market prices to estimate the net realisable value;</li> </ul>

## Information Other than the Financial Statements and Auditor's Report Thereon

- The Parent's Board of Directors is responsible for the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Management Discussion and Analysis Report and Business Responsibility Report, but does not include the consolidated financial statements, standalone financial statements and our auditor's report thereon.
- Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the consolidated financial statements, our responsibility is to read the other information, compare with the financial statements of the subsidiaries and joint ventures audited by the other auditors, to the extent it relates to these entities and, in doing so, place reliance on the work of the other auditors and consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. Other information so far as it relates to the subsidiaries and joint ventures is traced from their financial statements audited by the other auditors.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Management's Responsibility for the Consolidated Financial Statements

The Parent's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated changes in equity and consolidated cash flows of the Group including its associates and joint ventures in accordance with the Ind AS and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group and of its associates and joint ventures are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and its associates and its joint ventures and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Parent, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates and joint ventures are responsible for assessing the ability of the Group and of its associates

and joint ventures to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate or cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates and joint ventures are also responsible for overseeing the financial reporting process of the Group and of its associates and joint ventures.

### Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Parent has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associates and joint ventures to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and its associates and joint ventures to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the business activities within the Group and its associates and joint ventures to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such business activities included in the consolidated financial statements of which we are the independent auditors. For the business activities included in the consolidated financial statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.

## Independent Auditor's Report (continued)

We communicate with those charged with governance of the Parent and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### Other Matters

We did not audit the financial statements of 37 subsidiaries whose financial statements reflect total assets of Rs. 9,965.64 crore as at March 31, 2020, total revenues of Rs. 3,479.23 crore and net cash inflows amounting to Rs. 273.54 crore for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net profit of Rs. 2.91 crore for the year ended March 31, 2020, as considered in the consolidated financial statements, in respect of 4 joint ventures, whose financial statements have not been audited by us. These financial statements have been audited by the other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and joint ventures, and our report in terms of subsection (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries and joint ventures is based solely on the reports of the other auditors.

Our opinion on the consolidated financial statements above and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with

respect to our reliance on the work done and the reports of the other auditors.

### Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit and on the consideration of the reports of the other auditors on the financial statements of the subsidiaries and joint ventures referred to in the Other Matters section above we report, to the extent applicable that:
  - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
  - b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books, returns and the reports of the other auditors.
  - c) The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flow dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements.
  - d) In our opinion, the aforesaid consolidated financial statements comply with the Ind AS specified under Section 133 of the Act.
  - e) On the basis of the written representations received from the directors of the Parent as on March 31, 2020 taken on record by the Board of Directors of the Company and the reports of the statutory auditors of its subsidiary companies, associate companies and joint venture companies incorporated in India, none of the directors of the Group companies, its associate companies and joint venture companies incorporated in India is disqualified as on March 31, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.
  - f) With respect to the adequacy of the internal financial controls over financial reporting and the operating effectiveness of such controls, refer to our separate Report in "Annexure A" which

is based on the auditors' reports of the Parent, subsidiary companies, associate companies and joint venture companies incorporated in India. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of internal financial controls over financial reporting of those companies.

- g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Parent to its directors during the year is in accordance with the provisions of section 197 of the Act.
- h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:
  - i) The consolidated financial statements disclose the impact of pending litigations on the

consolidated financial position of the Group, its associates and joint ventures.

- ii) Provision has been made in the consolidated financial statements, as required under the applicable law or accounting standards, for material foreseeable losses on long-term contracts including derivative contracts.
- iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Parent and its subsidiary companies, associate companies and joint venture companies incorporated in India.

## ANNEXURE “A” TO THE INDEPENDENT AUDITOR’S REPORT

(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date)

### Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (the “Act”)

In conjunction with our audit of the consolidated financial statements of the Company as of and for the year ended March 31, 2020, we have audited the internal financial controls over financial reporting of Tata Consumer Products Limited (hereinafter referred to as the “Parent”) and its subsidiary companies, its associate companies and joint ventures, which are companies incorporated in India, as of that date.

### Management’s Responsibility for Internal Financial Controls

The respective Board of Directors of the Parent, its subsidiary companies, its associate companies and joint ventures, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

### Auditor’s Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Parent, its subsidiary companies, its associate companies and its joint ventures, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing, prescribed under Section 143(10) of the

Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls system over financial reporting of the Parent, its subsidiary companies, its associate companies and its joint ventures, which are companies incorporated in India.

### Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Opinion

In our opinion to the best of our information and according to the explanations given to us, the Parent, its subsidiary companies, its associate companies and joint ventures, which are companies incorporated in India, have, in all material

respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the criteria for internal financial control over financial reporting established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The financial statements for the year ended March 31, 2020 were approved for issue by Company's Board of Directors on May 14, 2020.

## 2. Preparation and Presentation of Consolidated Financial Statement

### 2.1 Basis of preparation and measurement

#### (a) Basis of preparation

The consolidated financial statements are prepared in accordance with and in compliance, in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) read along with Companies (Indian Accounting Standards) Rules, as amended and other relevant provisions of the Act. The presentation of the Consolidated Financial Statements is based on Ind AS Schedule III of the Companies Act, 2013.

#### (b) Basis of measurement

The consolidated financial statements have been prepared on an accrual basis and in accordance with the historical cost convention, unless otherwise stated. All assets and liabilities are classified into current and non-current generally based on the

criteria of realisation/settlement within a twelve month period from the balance sheet date.

#### (c) Basis of consolidation

The consolidated financial statements have been prepared on the following basis:

##### Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group and ceases to be consolidated when the Group loses control of the subsidiary. Fully consolidated means recognition of like items of assets, liabilities, equity, income and expense. Thereafter the portion of net profit or loss and equity is segregated between the Group's share and share of non-controlling stake holders.

Inter-company transactions, balances and unrealised gains on transactions between the Group companies are eliminated. Unrealised losses are also eliminated if there is a profit on ultimate sale of goods. When necessary, amounts reported by subsidiaries have been adjusted to conform to the Group's accounting policies.

##### Investment in Associates and Joint Ventures

Associates include all entities where the Group has the power to exercise a significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control of those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint ventures. Joint control is the contractually agreed sharing of control of an arrangement, which exist only when decisions about the relevant activities required unanimous consent of parties sharing control. Investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor.

## Notes to Consolidated Financial Statements (continued)

The Group's investment in associates and joint Ventures are accounted using the equity method. Goodwill relating to associate or a joint Venture is included in the carrying value of the investments and is not tested for impairment separately. Under equity method of accounting, the investments are initially recorded at cost and adjusted thereafter to recognise the Group's share of post-acquisition profit and loss, and the Group's share of other comprehensive income. Dividend received from associates and joint ventures are recognised as a reduction in the carrying amount of the investments. Unrealised gains on transactions between the Group and its associate and joint Ventures are eliminated to the extent of the Group's interest in these entities. Unrealised losses are also eliminated if there is a profit on ultimate sale of goods.

At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or a joint Venture is impaired. If there is such evidence, the carrying amount is tested for impairment by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount and impairment, if any, is recognised as 'Share of profit/(loss) in Associates and Joint Ventures' in the consolidated statement of profit and loss.

## 2.2 Significant Accounting Policies

The principal accounting policies applied in the preparation of the consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

### (a) Business Combinations

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary comprises of the,

- fair values of the assets transferred,
- liabilities incurred to the former owners of the acquired business,
- equity interests issued by the Group, and
- fair value of any asset or liability resulting from a contingent consideration arrangement

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business

combination are measured initially at their fair values at the acquisition date. The excess of the fair value of consideration over the identifiable net asset acquired is recorded as goodwill, if the consideration is lower, the gain is recognised directly in equity as capital reserve. In case, business acquisition is classified as bargain purchase, the aforementioned gain is recognised in the other comprehensive income and accumulated in equity as capital reserve. The Group recognises any non-controlling interest in the acquired entity at fair value.

Changes in ownership that do not result in a change of control are accounted for as equity transactions and therefore do not have any impact on goodwill. The difference between consideration and the non-controlling share of net assets acquired is recognised within equity.

Business combinations involving entities or businesses under common control are accounted for using the pooling of interest method. Under pooling of interest method, the assets and liabilities of the combining entities are reflected at their carrying amounts, with adjustments only to harmonise accounting policies.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss or other comprehensive income, as appropriate.

If the initial accounting for a business combination can be determined only provisionally by the end of the first reporting period, the business combination is accounted for using provisional amounts. Adjustments to provisional amounts, and the recognition of newly identified asset and liabilities, must be made within the 'measurement period' where they reflect new information obtained about facts and circumstances that were in existence at the acquisition date. The measurement period cannot exceed one year from the acquisition date and no adjustments are permitted after one year except to correct an error.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition

date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in the statement of profit and loss. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

## (b) Property, Plant and Equipment

- i) Recognition and measurement: Property, plant and equipment including bearer assets are carried at historical cost of acquisition less accumulated depreciation and accumulated impairment losses, if any. Historical cost includes expenditure directly attributable to the acquisition of the items. Subsequent expenditure related to an asset is added to its book value only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amounts of replacements are derecognised. All repairs and maintenance are charged to the statement of profit and loss during the financial year in which they are incurred.
- ii) Depreciation: Depreciation is provided on assets to get the initial cost down to the residual value, including on asset created on lands under lease and recognised in the statement of profit and loss. Land is not depreciated. Depreciation is provided on a straight line basis over the estimated useful life of the asset as prescribed in Schedule II to the Companies Act, 2013 or based on a technical evaluation of the asset.
- iii) Cost incurred on assets under development are disclosed under capital work in progress and not depreciated till asset is ready to use.

The residual values and useful lives for depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Recoverable amount is higher of the value in use or exchange.

Gains and losses on disposals are determined by comparing the sale proceeds with the carrying amount and are recognised in the statement of profit and loss.

- iv) Estimated useful lives of items of property, plant and equipment are as follows:

Category	Useful life
Leasehold buildings / improvements	Lower of lease term or useful life
Buildings	28 to 60 years
Plant and Machinery	3 to 25 years
Furniture and Fixtures	5 to 16 years
Office Equipment	2 to 16 years
Motor vehicles	4 to 10 years

## (c) Biological Assets

Biological assets are classified as bearer biological assets and consumable biological assets. Consumable biological assets are those that are to be harvested as agricultural produce. Bearer biological assets which are held to bear agricultural produce are classified as Bearer plants. The Group recognises tea bushes, coffee bushes, pepper vines and shade trees as bearer assets, with further classification as mature bearer assets and immature bearer assets. Mature bearer plants are those that have attained harvestable stage.

Bearer assets are carried at historical cost of acquisition less accumulated depreciation and accumulated impairment losses, if any. Subsequent expenditure on bearer assets are added to its book value only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Cost incurred for new plantations and immature areas are capitalised. The cost of immature areas coming into bearing is transferred to mature plantations and depreciated over their estimated useful life which has been ascribed to be within the range of 30 – 65 years.

Tea, Coffee, Pepper and minor crops are designated as agricultural produce at the point of harvest and are measured at their fair value less cost to sell. Any

## Notes to Consolidated Financial Statements (continued)

changes in fair value upto the point of harvest are recognised in the statement of profit and loss in the year in which they arise.

**(d) Investment Property**

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the Group, are classified as investment property. Investment property is measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure related to investment properties are added to its book value only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. Investment properties are depreciated using the straight line method over the useful lives. Depreciable investment properties have been ascribed a useful life in the range of 60 years.

**(e) Intangible Assets****(i) Goodwill**

Goodwill arising on a business combination represents the excess of the fair value of consideration over the identifiable net asset acquired. Fair value of consideration represents the aggregate of the consideration transferred, a reliable estimate of contingent consideration payable, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree on the acquisition date. Net assets acquired represents the fair value of the identifiable assets acquired and liabilities assumed.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Cash generating units (CGUs), or groups of CGUs, that is expected to benefit from the acquisition itself or from the synergies of the combination or both. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes.

Goodwill is not amortised but is tested for impairment. Goodwill impairment reviews are

generally undertaken annually. The carrying value of the CGU containing the goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognised immediately as an expense and is not subsequently reversed unless the CGU is classified as "Asset held for sale" and there is evidence of reversal. Goodwill is subsequently measured at cost less amounts provided for impairment.

**(ii) Brands and Trademarks**

Brands/trademarks acquired separately are measured on initial recognition at the fair value of consideration paid. Following initial recognition, brands/trademarks are carried at cost less any accumulated amortisation and impairment losses if any. A brand/trademark acquired as part of a business combination is recognised outside goodwill, at fair value at the date of acquisition, if the asset is separable or arises from contractual or other legal rights and its fair value can be measured reliably.

The useful lives of brands/trademarks are assessed to be either finite or indefinite. The assessment includes whether the brand/trademark name will continue to trade and the expected lifetime of the brand/trademark. Amortisation is charged on assets with finite lives on a straight-line basis over a period appropriate to the asset's useful life. The carrying values of brands/trademarks with finite and indefinite lives are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Brands/trademark with indefinite useful lives are also tested for impairment annually either individually or, if the intangible asset does not generate cash flows that are largely independent of those from other assets or groups of assets, as part of the cash-generating unit to which it belongs. Such intangibles are not amortised. The useful life of a brand with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

Brands and trademarks having finite lives have been ascribed a useful life within a range of 3 – 35 years.

**(iii) Customer relationships**

Customer relationships acquired in a business combination are recognised at fair value at the acquisition date. The customer relationships have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method over the estimated useful life of the customer relationship. Customer intangibles have been ascribed a useful life within a range of 7 – 30 years.

**(iv) Distribution network**

Distribution network acquired in a business combination are recognised at fair value at the acquisition date. The distribution networks have a finite useful life and are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method over the estimated useful life of the distribution network. Distribution networks have been ascribed a useful life within a range of 8 – 10 years.

**(v) Patent / knowhow**

Product development cost incurred on new products having enduring benefits is recognised as Intangible Assets and are amortised over a period of 10 years.

**(vi) Computer software / Website**

Software development costs are expensed unless technical and commercial feasibility of the project is demonstrated, future economic benefits are probable, the Group has an intention and ability to develop and sell or use the software and the costs can be measured reliably. Directly attributable costs that are capitalised as part of the software product include the software development cost, related employee costs and an appropriate portion of relevant overheads. Other expenditure that do not meet these criteria are recognised as an expense as and when incurred, costs previously recognised as an expense are not recognised as an asset in a subsequent period. The cost incurred for acquisition of website is capitalised.

In case of internally generated website, the cost is capitalised only if the future economic benefits are expected to flow to the entity and if the asset can be controlled by entity as a result of past events.

Computer software development costs recognised as assets are amortised over their estimated useful lives, which range between 3 to 5 years. Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and put to use the specific software. These costs are amortised over their estimated useful lives of 3 to 5 years. Website costs are amortised over a period of 5 years.

**(vii) Research and Development**

Research expenditure is recognised in the statement of profit and loss as and when incurred. Development expenditure is capitalised only if the costs can be reliably measured, future economic benefits are probable, the product is technically feasible and the Group has the intent and the resources to complete the project. Development assets are amortised based on the estimated useful life, as appropriate.

**(f) Impairment of tangible and intangible assets**

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest possible levels for which there are independent cash inflows (cash-generating units). Prior impairment of non-financial assets (other than goodwill) are reviewed for possible reversal of impairment losses at each reporting date. Intangible assets that have an indefinite useful life or intangible assets not ready to use are not subject to amortisation and are tested annually for impairment.

**(g) Assets held for sale and disposal groups**

Non-current assets held for sale and disposal groups are presented separately in the balance sheet when the following criteria are met:

## Notes to Consolidated Financial Statements (continued)

- the Group is committed to selling the asset or disposal group;
- the assets are available for sale immediately;
- an active plan of sale has commenced; and
- sale is expected to be completed within 12 months.

Assets held for sale and disposal groups are measured at the lower of their carrying amount and fair value less cost to sell. Assets held for sale are no longer amortised or depreciated.

### (h) Financial Instruments

#### Financial assets

The Group classifies its financial assets in the following categories:

- i) **Financial assets at amortised cost-** Assets that are held for collection of contractual cash flows on specified dates where those cash flows represent solely payments of principal and interest are measured at amortised cost.

These are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. Financial assets are measured initially at fair value plus transaction costs and subsequently, if maturing after 12 months period, using the effective interest method, less any impairment loss.

Debt instruments which do not meet the criteria of amortised cost are measured at fair value and classified as fair value through profit and loss or through other comprehensive income, as applicable.

Financial assets at amortised cost are represented by trade receivables, security deposits, cash and cash equivalent, employee and other advances.

- ii) **Financial assets at fair value through other comprehensive income (FVTOCI)** - All equity investments and unquoted debentures are measured at fair values. Investments which are not held for trading purposes and where the Group has exercised the option to classify the

investment as at FVTOCI, all fair value changes on the investment are recognised in OCI. The accumulated gains or losses recognised in OCI are reclassified to retained earnings on sale of such investments.

Debt instruments that are held within a business model whose objectives are achieved by both, collecting contractual cash flows and selling the debt instruments and the contractual terms of which give rise to cash flows that are solely payment of principal and interest on specified dates are subsequently measured at fair value through other comprehensive income. All other debt instruments are measured at fair value and classified as fair value through profit or loss.

- iii) **Financial assets at fair value through profit or loss (FVTPL)** - Financial assets which are not classified in any of the categories above are FVTPL.

- iv) **Impairment of financial assets** - The Group assesses expected credit losses associated with its assets carried at amortised cost and fair value through other comprehensive income based on Group's past history of recovery, credit-worthiness of the counter party and existing market conditions. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables, the Group applies the simplified approach for recognition of impairment allowance as provided in Ind AS 109 – Financial Instruments, which requires expected lifetime losses to be recognised on initial recognition of the receivables.

#### Financial liabilities

##### Initial recognition and measurement

All financial liabilities are recognised initially at fair value and in case of loans and borrowings net of directly attributable costs.

Financial liabilities are subsequently measured at amortised cost using effective interest method. For trade and other payable maturing within one year from the balance sheet date, the carrying value approximates fair value due to short maturity of these investments.

**Derivative financial instruments and hedging activities**

A derivative is a financial instrument which changes value in response to changes in an underlying asset and is settled at a future date. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

The Group designates certain derivatives as either:

- (a) hedges of the fair value of recognised assets or liabilities (fair value hedge); or
- (b) hedges of a particular risk associated with a firm commitment or a highly probable forecasted transaction (cash flow hedge);

The Group documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an on-going basis, of whether the derivatives that are used in hedging transactions are effective in offsetting changes in cash flows of hedged items.

Movements in the hedging reserve are accounted in other comprehensive income and are reported within the statement of changes in equity. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of hedged item is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives are classified as a current asset or liability.

**(a) Fair value hedge**

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the statement of profit and loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Group only applies fair value hedge accounting for hedging foreign exchange risk on recognised assets and liabilities.

**(b) Cash flow hedge**

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income. The ineffective portion of changes in the fair value of the derivative is recognised in the statement of profit and loss.

Gains or losses accumulated in equity are reclassified to the statement of profit and loss in the periods when the hedged item affects the statement of profit and loss.

When a hedging instrument expires or is swapped or unwound, or when a hedge no longer meets the criteria for hedge accounting, any accumulated gain or loss in other equity remains there and is reclassified to statement of profit and loss when the forecasted cash flows affect profit or loss.

When a forecasted transaction is no longer expected to occur, the cumulative gains/losses that were reported in equity are immediately transferred to the statement of profit and loss.

**Fair value measurement**

The Group classifies the fair value of its financial instruments in the following hierarchy, based on the inputs used in their valuation:

- i) Level 1 - The fair value of financial instruments quoted in active markets is based on their quoted closing price at the balance sheet date.
- ii) Level 2 - The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques using observable market data. Such valuation techniques include discounted cash flows, standard valuation models based on market parameters for interest rates, yield curves or foreign exchange rates, dealer quotes for similar instruments and use of comparable arm's length transactions.
- iii) Level 3 - The fair value of financial instruments that are measured on the basis of entity specific valuations using inputs that are not based on observable market data (unobservable inputs).

## Notes to Consolidated Financial Statements (continued)

**Interest and dividend income**

Interest income is recognised within finance income using the effective interest method. When a loan and receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables is recognised using the original effective interest rate.

Dividend income is recognised when the right to receive payment is established. Incomes from investments are accounted on an accrual basis.

**(i) Inventories**

Raw materials, work in progress, traded and finished goods are stated at the lower of cost and net realisable value. Net realisable value represents the estimated selling price less all estimated cost of completion and selling expenses. Stores and spares are carried at cost. Provision is made for obsolete, slow-moving and defective stocks, where necessary.

Cost is determined on weighted average method for all categories of inventories other than for auction/privately bought teas wherein cost is measured at actual cost of each lot. Cost comprises expenditure incurred in the normal course of business in bringing such inventories to its present location and condition, where applicable, include appropriate overheads based on normal level of activity. Agricultural produce included within inventory largely comprises stock of tea and coffee and in accordance with Ind AS 41, on initial recognition, agricultural produce are measured at fair value less estimated point of sale costs.

**(j) Employee Benefits**

The Group operates various post-employment schemes, including both defined benefit and defined contribution plans and post-employment medical plans. Short term employee benefits are recognised on an undiscounted basis whereas Long term employee benefits are recognised on a discounted basis.

**i) Post retirement employee benefits:**

Contribution to post retirement defined benefit and contribution schemes like Provident Fund (PF), Superannuation Schemes and other such

schemes are accounted for on accrual basis by the Group. With regard to PF contribution made by the Group to a Self-Administered Trust, the Group is generally liable for annual contributions and for any shortfall in the fund assets based on the government specified minimum rates of return. Such contributions and shortfalls are recognised as an expense in the year incurred.

Post retirement defined benefits including gratuity, pension and medical benefits for qualifying executives/whole time directors as provided by the Group are determined through independent actuarial valuation at year end and charge recognised in the statement of profit and loss. Interest costs on employee benefit schemes have been classified within finance cost. For schemes, where funds have been set up, annual contributions determined as payable in the actuarial valuation report are contributed. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income. Such accumulated re-measurement balances are never reclassified into the statement of profit and loss.

The Group recognises in the statement of profit and loss, gains or losses on curtailment or settlement of a defined benefit plan as and when the curtailment or settlement occurs.

**ii) Other employee benefits:**

Other employee benefits are accounted for on accrual basis. Liabilities for compensated absences are determined based on independent actuarial valuation at year end and charge is recognised in the statement of profit and loss.

**iii) Employee termination benefits:**

Payments to employees on termination along with additional liabilities towards retirement benefits arising pursuant to the termination are charged to the statement of profit and loss in the year in which it is incurred.

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group

recognises termination benefits at the earlier of the following dates: (a) when the Group can no longer withdraw the offer of those benefits; and (b) when the Group recognises costs for a restructuring that is within the scope of "Ind AS 37 – Provisions, Contingent Liabilities and Contingent Assets" and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

**(k) Provisions, Contingent Liabilities and Contingent Assets**

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. If the effect of the time value of money is material, provisions are discounted. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liabilities exist when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group, or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required or the amount cannot be reliably estimated. Contingent liabilities are appropriately disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is a possible asset arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. Contingent assets are not recognised till the realisation of the income is virtually certain. However the same are disclosed in the financial statements where an inflow of economic benefit is possible.

**(l) Income Tax**

**i) Current Income Tax:**

Current Income Tax is measured at the amount expected to be paid to the tax authorities in accordance with local laws of various jurisdiction where the Group operates.

**ii) Deferred Tax:**

Deferred tax is provided using the balance sheet approach on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The tax rates and tax laws used to compute the tax are those that are enacted or substantively enacted at the reporting date. Current income tax and deferred tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss.

Deferred tax liabilities are provided on taxable temporary differences arising from investments in subsidiaries except for deferred income tax liabilities where the timing of the reversal of the temporary differences is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Only where there is an agreement in place that gives the Group the ability to control the reversal, the temporary difference is not recognised. Deferred tax assets are recognised on deductible temporary differences arising from investments in subsidiaries and joint arrangements only to the extent that it is probable the temporary difference will reverse in the future and there is

## Notes to Consolidated Financial Statements (continued)

sufficient taxable profit available against which the temporary difference can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

**iii) Minimum Alternate Tax:**

According to section 115JAA of the Income Tax Act, 1961, Minimum Alternative Tax ('MAT') paid over and above the normal income tax in a subject year is eligible for carry forward for fifteen succeeding assessment years for set-off against normal income tax liability. The MAT credit asset is assessed against the relevant entities' normal income tax during the specified period.

**(m) Foreign Currency and translations**

**i) Functional and presentation currency**

Items included in the consolidated financial statements of the Group's and its associates and joint ventures are measured using the currency of the primary economic environment in which each entity operates ("functional currency"). The consolidated financial statements are presented in Indian Rupees (INR), which is the functional currency of the Parent Company.

**ii) Foreign currency transactions and balances**

In standalone entities, transactions in foreign currencies are recorded at the exchange rate at the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at the year-end rate. Any resultant exchange differences are taken to the statement of profit and loss, except when deferred in other comprehensive income as qualifying cash flow hedges. Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

**iii) Group entities**

The results and financial position of all the Group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency of the Group are translated as follows:

- assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- income and expenses for each statement of profit and loss are translated at monthly exchange rates, and
- all resulting exchange differences are recognised in other comprehensive income.

On disposal of a foreign operation, the associated exchange differences are reclassified to the statement of profit and loss, as part of the gain or loss on disposal.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

**(n) Revenue from contracts with customer**

Revenue from contract with customers is recognised when the Group satisfies performance obligation by transferring promised goods and services to the customer. Performance obligations maybe satisfied at a point of time or over a period of time. Performance obligations satisfied over a period of time are recognised as per the terms of relevant contractual agreements/ arrangements. Performance obligations are said to be satisfied at a point of time when the customer obtains controls of the asset or when services are rendered.

Revenue is measured based on transaction price, which is the fair value of the consideration received or receivable, stated net of discounts, returns and value added tax. Transaction price is recognised based on the price specified in the contract, net of the estimated sales incentives/ discounts. Accumulated experience is used to estimate and provide for the discounts/ right of return, using the expected value method.

A refund liability is recognised for expected sale returns and corresponding assets are recognised for the products expected to be returned.

The Group recognises as an asset, the incremental costs of obtaining a contract with a customer, if the Group expects to recover those costs. The said asset is amortised on a systematic basis consistent with the transfer of goods or services to the customer.

#### (o) Government Grant

Government grants including any non-monetary grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. Government grants are recognised in the statement of profit and loss on a systematic basis over the periods in which the related costs, which the grants are intended to compensate, are recognised as expenses. Government grants related to property, plant and equipment are presented at fair value and grants are recognised as deferred income.

#### (p) Leases

##### As a lessee

At inception of a contract, the group assesses whether a contract is or contains a lease. A contract is, or contains, a lease if a contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the group assesses whether:

- the contract conveys the right to use an identified asset;
- the Group has the right to obtain substantially all the economic benefits from use of the asset throughout the period of use; and
- the Group has the right to direct the use of the identified asset.

At the date of commencement of a lease, the Group recognises a right-of-use asset ("ROU assets") and a corresponding lease liability for all leases, except for leases with a term of twelve months or less (short-term leases) and low value leases. For short-

term and low value leases, the Group recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease. Group has considered all leases where the value of an underlying asset does not individually exceed Rs.0.05 Crores or equivalent as a lease of low value assets.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. Lease payments to be made under such reasonably certain extension options are included in the measurement of ROU assets and lease liabilities.

Lease liability is measured by discounting the lease payments using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of the leases. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Group changes its assessment of whether it will exercise an extension or a termination option.

Lease payments are allocated between principal and finance cost. The finance cost is charged to statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

The ROU assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives and restoration costs. These are subsequently measured at cost less accumulated depreciation and impairment losses. ROU assets are depreciated on a straight-line basis over the asset's useful life (refer 2.2(b)) or the lease term whichever is shorter.

Impairment of ROU assets is in accordance with the Group's accounting policy for impairment of tangible and intangible assets.

##### As a lessor

Lease income from operating leases where the group is a lessor is recognised in the statement of profit and loss on a straight- line basis over the lease term.

## Notes to Consolidated Financial Statements (continued)

**(q) Borrowing Costs**

Borrowing costs consist of interest, ancillary and other costs that the Group incurs in connection with the borrowing of funds and interest relating to other financial liabilities. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

**(r) Exceptional Items**

Exceptional items are disclosed separately in the financial statements where it is necessary to do so to provide further understanding of the financial performance of the Group. These are material items of income or expense that have to be shown separately due to their nature or incidence.

**(s) Earnings per share**

The Group presents basic and diluted earnings per share data for its ordinary shares. Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the parent company by the weighted average number of ordinary shares outstanding during the year. Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, adjusted for own shares held, for the effects of all dilutive potential ordinary shares.

**(t) Segment Reporting**

Segments are identified based on the manner in which the Group's Chief Operating Decision Maker ('CODM') decides about resource allocation and reviews performance.

Segment results that are reported to the CODM include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Segment capital expenditure is the total cost incurred during the period to acquire property and

equipment and intangible assets including goodwill.

**(u) Cash and Cash equivalents**

Cash and cash equivalents for the purpose of presentation in the statement of cash flows comprises of cash at bank and in hand, bank overdraft and short term highly liquid investments/ bank deposits with an original maturity of three months or less that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

**(v) Offsetting instruments**

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

**(w) Events after the reporting period**

Adjusting events are events that provide further evidence of conditions that existed at the end of the reporting period. The financial statements are adjusted for such events before authorisation for issue.

Non-adjusting events are events that are indicative of conditions that arose after the end of the reporting period. Non-adjusting events after the reporting date are not accounted, but disclosed, if material.

**2.3 Key accounting judgement, estimates and assumptions**

The preparation of the consolidated financial statements requires Group management to exercise judgment and to make estimates and assumptions. These estimates and associated assumptions are based on historical experiences and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an on-going basis. Revision to accounting estimates are recognised in the period in which the estimate is revised if the revision

affect only that period, or in the period of the revision and future periods if the revision affects both current and future period.

The areas involving critical estimates or judgements are:

### **Goodwill and Intangibles**

The Group records all intangible assets acquired including goodwill as part of a business combination at fair values. In relation to business combinations, judgement is required to be exercised on determining the fair values, identification and measurement of assets acquired and liabilities assumed, in allocation of purchase consideration, in deciding the amortisation policy and on tax treatment of Goodwill and intangible assets acquired. Appropriate independent professional advice is also obtained, as necessary. Goodwill is assigned an indefinite useful life whilst intangible assets are assigned an indefinite or finite useful life. Goodwill and intangible assets assigned an indefinite useful life are as a minimum subject to annual tests of impairment in line with the accounting policy whereas all other intangible assets are amortised. (Refer Note 6).

### **Depreciation and amortisation**

Depreciation and amortisation is based on management estimates of the future useful lives of the property, plant and equipment and intangible assets. Estimates may change due to technological developments, competition, changes in market conditions and other factors and may result in changes in the estimated useful life and in the depreciation and amortisation charges. (Refer Note 3, 4, 5 and 6)

### **Taxation**

The Group is subject to taxes in numerous jurisdictions. Significant judgement is required in examining applicability and determining the provision required for taxes. (Refer Note 20).

### **Employee Benefits**

The present value of the defined benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The

assumptions used in determining the net cost/(income) for pensions include the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations.

The Group determines the appropriate discount rate at the end of each year. This is the interest rate that is used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Group considers the interest rates of high-quality corporate bonds/Government securities that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension obligation. Other key assumptions for pension obligations are based in part on current market conditions. (Refer Note 37)

### **Carrying value of derivatives and other financial instruments**

All financial instruments are required to be fair valued as at the balance sheet date, as provided in Ind AS 109 and Ind AS 113. Being a critical estimate, judgement is exercised to determine the carrying values. The fair value of financial instruments that are unlisted and not traded in an active market is determined at fair values assessed based on recent transactions entered into with third parties, based on valuation done by external appraisers etc., as applicable. (Refer Note 36)

### **Revenue recognition and marketing accrual**

Generally in the International markets, products are often sold with sales related discounts, rebate, trade support etc. Sales are recorded based on the price specified in the sales contract, however simultaneously amount of sales promotions expenditure that would need to be incurred are also estimated and netted off from sales. Judgement is required to be exercised in determining the level of provisions that would need to be accrued. Accumulated experience is used for estimating and providing for such expenditure.

Brands acquired during the year include an amount of Rs 2093.33 Crores which has been categorised as brand with indefinite life and will be annually tested for impairment. Based on analysis of all relevant factors such as market share, stability, potential obsolescence, profitability etc, the brand is expected to provide cash inflows to the Group over an indefinite period.

## Notes to Consolidated Financial Statements (continued)

**Impairment of Goodwill and intangible assets**

Management reviews the carrying value of goodwill and indefinite life intangibles annually to determine whether there has been any impairment. This involves making an assessment of the value of goodwill for each cash generating unit (CGU) and comparing it to the carrying value. If the assessed value is lower than the carrying value, then an impairment charge is recognised to reduce the carrying value to this amount. Management reviews the business performance based on the geography and type of business. The Group has identified businesses within each country as its main CGU for the purpose of allocation and monitoring of goodwill.

The following is a summary of the goodwill allocation to each CGU as mentioned above:

Value in use i.e. the enterprise value for each CGU is calculated using cash flow projections over a period of 3 - 5 years, with amounts based on medium term strategic plans. Variations to strategic plan are incorporated in the calculations based on past experience. Cash flows beyond the 3 – 5 year period are extrapolated using a long term growth rate.

Key assumptions in the business plans include future revenue, associated future levels of marketing support and other relevant costs. These assumptions are based on historical trends and future market expectations specific to each CGU and the markets and geographies in which they operate.

Other key assumptions applied in determining value in use are:

- Long term growth rate – Cash flows beyond the 3 - 5 year period are extrapolated using the estimated long-term growth rate applicable for the geographies in which the CGUs operate.
- Discount rate – The discount rate is based on a Weighted Average Cost of Capital (WACC) for comparable companies operating in similar markets and geographies adjusted for country specific risk affecting where each CGU operates.

The long term growth rates and discount rates applied in the value in use calculations as at March 31, 2020 are given below:

	Pre-tax discount rate	Long-term growth rate
UK & Europe	9.05%	1.75%
US	8.70% - 13.10%	2.2% - 3.60%
Canada	8.97%	3.70%
Australia	9.74%	1.70% - 3.40%
India	13.40%	5.00% - 6.00%

### Impairment charges

During the year, the group recognised a non-cash impairment loss on goodwill relating to its tea business in the US and to its business in Australia. The accounting impairment has been recognised due to a combination of factors like Covid related impact on specific out of home business segments, changes to discount rates due to market conditions and revision in business plan sensitivities.

Resultantly, an impairment charge of Rs 222.94 Crores has been charged to the Statement of Profit and Loss under 'Exceptional Items'. These CGUs have a pre-tax discount rate within a range of 8.70% to 9.74%.

### Sensitivity Analysis

We have performed sensitivity analysis around the base assumptions and have concluded that no reasonable possible changes in key assumptions based on current recent trends would cause the recoverable amount of the CGUs to be less than the carrying value.

The Group offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities, and the deferred tax assets and deferred tax liabilities only if they relate to income taxes levied by the same authority.

**(f) Unrecognised tax items**

As at March 31, 2020, unrecognised deferred tax assets on account of tax losses amount to Rs 117.58 Crores (Rs 129.62 Crores) in various jurisdictions, which can be carried forward up to a specified period or indefinitely. The deferred tax asset has not been recognised on the basis that its recovery is not probable in the foreseeable future.

**(g) Deferred tax of unremitted earnings**

As at March 31, 2020, deferred tax liability amounting to Nil (Rs 11.21 Crores) was recognised for taxes that would be payable on the unremitted earnings of certain of the Group's subsidiaries, associate and joint venture. The deferred tax liability is based on Group's estimate of distribution of the profits in the foreseeable future and the tax incidence on the same.

**33. Litigations**

- i) Commercial liability claims not established – amounts not ascertainable
- ii) Parent Company's overseas subsidiary in US along with several other coffee companies that roast, package, market and/or sell coffee in the State of California are defendants in public interest litigation filed by an organisation named Council of Education and Research on Toxics (CERT). The litigation contends that since coffee contains the chemical acrylamide, warning have to be included for coffee sold in that state pursuant to California state law. Acrylamide is not added to coffee but forms in trace amounts as part of a chemical reaction that occurs in coffee beans when they are roasted. The subsidiary is part of a Joint Defense Group (JDG) that is arguing the case on behalf of several leading coffee companies as defendants. During 2018 the California Office of Environmental Health Hazard Assessment (OEHHA) proposed a new regulation clarifying that cancer warnings are not required for coffee under Proposition 65 list and subsequently in June 2019, the proposed regulation was adopted by the Office of Administrative law which became law on October 1, 2019. The JDG has filed a motion for summary judgment in January, 2020 which is yet to be heard. At this stage of the proceedings, the outcome and potential liability, if any, to the subsidiary on account of their sales in the State of California is not determinable at present till the receipt of judgment, if any, which is appealable in higher courts.

**34. Leases**

Group's leasing arrangements are for premises (residential, office, factory, godown and Stores), equipment and vehicles, these ranges between 5 months to 60 years and are usually renewable on mutually agreed terms.

<b>Total</b>	<b>509.37</b>

Expenses recognised on account of short-term and low value leases are disclosed under Rent in Other Expense (Refer Note 27).

**Extension and termination options**

Extension and termination options are included in a number of property and equipment leases across the Group. These are expected to maximise operational flexibility in terms of managing the assets used in Group's operation. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor.

**Adoption of Ind AS 116 - Leases**

The Group has adopted Ind AS 116, effective from April 1, 2019 and applied the standard to its leases, retrospectively. The cumulative effect of initially applying the standard was recognised on April 1, 2019 as an adjustment to the retained earnings. The Group has not restated comparative for the year ended March 31, 2019.

On transition, the adoption of new standard resulted in recognition of Right of Use Asset of Rs. 255.62 Crores, Net-investment in sublease of ROU asset of Rs. 7.35 Crores and a lease liability of Rs. 282.29 Crores. The cumulative effect of applying the standard, amounting to Rs. 63.29 Crores including share of transitional adjustment of Joint Venture and Associates was debited to retained earnings, net of deferred tax. The effect of this adoption is insignificant on profit for the year.

## Notes to Consolidated Financial Statements (continued)

The principle portion of the lease payments have been disclosed under cash flow from financing activities. The lease payments for operating leases as per Ind AS 17 - Leases, were earlier reported under cash flow from operating activities. On application of Ind AS 116, the nature of expenses has changed from lease rent in previous periods to depreciation cost for the right-of-use asset, and finance cost for interest accrued on lease liability.

The difference between the future minimum lease rental commitments towards non-cancellable operating leases as at March 31, 2019 compared to the lease liability as accounted as at April 1, 2019 is primarily due to inclusion of present value of the lease payments for the cancellable term of the leases and reduction due to discounting of the lease liabilities as per the requirement of Ind AS 116.

\* For certain investments categorised under Level 3, cost has been considered as an appropriate estimate of fair value because of a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range.

## Notes to Consolidated Financial Statements (continued)

### Measurement of fair values

The basis of measurement in respect to each class of financial asset / liability is disclosed in Note 2.2(h) of the financial statement.

The fair value of liquid mutual funds and long term equity investment is based on active market. Fair values of certain non-current investment are valued based on discounted cash flow/book value / EBITDA multiple approach. Derivative financial instruments are generally valued based on Black-Scholes-Merton approach and Dollar offset principles.

### B. Financial risk management

The Group has exposure to the following risks arising from financial instruments:

- Credit risk
- Liquidity risk
- Market risk

Covid 19 pandemic- Commencing from the second half of March 2020, Covid 19 pandemic had an impact on the Indian and International business environment. The Group continued to manufacture and supply essential food and beverage items in the relevant markets. The demand for the Group's products for in home consumption continues with some short term stocking up. However, extended lock down conditions have caused some adverse impact on sales due to disruptions in market openings and supply chain with impact being more pronounced in out of home sectors. Impact on future operations would to a large extent depend on how the pandemic develops and the resultant impact on businesses. Assessment of impact of Covid 19 pandemic on various elements of the risk management framework has been dealt with in the relevant sections below.

#### i. Risk management framework

The Risk Management Committee of the Board is entrusted with the responsibility to assist the Board in overseeing and approving the Group's risk management framework. The Group has a comprehensive risk policy relating to the risks that the Group faces under various categories like strategic, operational, reputational and other risks and these have been identified and suitable mitigation measures have also been formulated. The Risk Management Committee reviews the key risks and the mitigation measures periodically. The Audit Committee has additional oversight in the area of financial risks and control.

#### ii. Credit risk

Credit risk is the risk that counterparty will not meet its obligations leading to a financial loss. The Group's credit risk are spread both geographically as well as across customers. Majority of our customers in the developed markets have good credit rating. In addition, Group has an established credit policy and a credit review mechanism. The Group also covers certain category of its debtors through a credit insurance policy. The insurance provider sets an individual credit limit and also monitors the credit risk of the consumer. The Group establishes an allowance for impairment that represents its estimate of expected losses in respect of financial assets. Financial assets are classified into performing, under-performing and non-performing. All financial assets are initially considered performing and evaluated periodically for expected credit loss. A default on a financial asset is when there is a significant increase in the credit risk which is evaluated based on the business environment. The assets are written off when the Group is certain about the non-recovery.

**(a) Trade receivables**

The credit worthiness of trade debtors and the credit terms set are determined in individual regions and countries. There are no particular concentrations of credit risk as the Group's customer base is large. Trade receivables are considered a single class of financial assets, and based on the Group's experience of collecting receivables and associated defaults there is a low credit risk across regions and countries. In certain regions adequate insurance cover has been taken on trade receivables to further reduce the risk of default.

The fair values of trade and other receivables, deposits or bank guarantees are not considered to be significantly different from their carrying values, given their generally short period to maturity, with impairment reviews considered on an individual basis rather than when they become overdue. Management believes that the unimpaired amounts that are past due are collectible in full, based on historical payment pattern and analysis of customer credit risk.

Movement of allowance for impairments of trade receivables are as follows:

	Rs in Crores	
	2020	2019
As at April 1	6.88	4.84
Acquired on Acquisition	11.43	-
Impairment loss recognised	0.38	2.03
Unused amounts reversed	(3.84)	(0.05)
Translation exchange difference	0.07	0.06
<b>As at March 31</b>	<b>14.92</b>	<b>6.88</b>

Impact of Covid 19 pandemic- Based on recent trends observed, collection pattern and insurance covers in place, the Group does not envisage any material risks. Future outlook will depend on how the pandemic develops and the resultant impact on businesses.

**(b) Financial instruments and cash deposits**

The credit risk from balances / deposits with banks, other financial assets and current investments are managed in accordance with the Group's approved policy. Investments of surplus funds are made only with approved counterparties and within the limits assigned to each counterparties. The limits are assigned to mitigate the concentration risks. These limits are actively monitored by the treasury department.

Impact of Covid 19 pandemic- Based on the recent trends observed, type of instruments and strength of the counterparties, the Group does not envisage any material risks. Wherever the underlying assets/ instruments are subject to market risks, the same have been marked to market as at the Balance Sheet date. Future outlook will depend on how the pandemic develops and the resultant impact on businesses.

**iii. Liquidity risk**

Liquidity risk is the risk that the Group may encounter difficulty in meeting its obligations. The Group's approach is to ensure that it has sufficient liquidity or borrowing headroom to meet its obligations at all point in time.

## Notes to Consolidated Financial Statements (continued)

The Group ensures that there is adequate finance available to fund growth and has adequate capacity to fund its obligations. The Group monitors rolling forecasts of its liquidity positions on the basis of expected cash flows to ensure sufficient liquidity through its cash reserves and various undrawn third party borrowing arrangements in place. The Group is also confident that if the need arises debt can be raised from the market at attractive terms. The Parent Company carries highest credit rating quality for its short term fund based lines from a reputed rating agency.

Impact of Covid 19 pandemic- Based on recent trends observed, profitability, cash generation, cash surpluses held by the Group and borrowing lines available, the Group does not envisage any material liquidity risks. Future outlook will depend on how the pandemic develops and the resultant impact on businesses.

**iv. Market risk**

Market risk is the risk that the fair value of the future cash flows will fluctuate because of changes in the market prices such as currency risk, interest rates risk and commodity price risk.

**Currency Risk**

The Group operates across various geographies and is exposed to foreign exchange risk on its various currency exposures. The risk of changes in foreign exchange rates relates primarily to the Group's operating activities and translation risk, which arises from recognition of foreign currency assets and liabilities and consolidation of foreign subsidiaries.

The Group uses various derivative financial instruments governed by its board approved policy, such as foreign exchange forward and option contracts to mitigate the said risk. The counterparty for these contracts is generally a bank. The Group reports periodically to the Audit Committee of the board, the various foreign exchange risk and policies implemented to manage its foreign exchange exposures.

During the year ended March 31, 2020, the Group has designated certain foreign exchange forward contracts and option contracts as cash flow hedges to mitigate the risk of foreign currency exposure on highly probable forecasted transactions. Hedge effectiveness is determined at inception and periodic prospective effectiveness testing is done to ensure the relationship exist between the hedged items and hedging instruments, including whether the hedging instruments is expected to offset changes in cash flows of hedge items.

Impact of Covid 19 pandemic- The pandemic can cause continuing volatility in the currency market and this risk would be mitigated through effective hedging policies. Further, the Group basis the recent trends believe that the probability of the non- occurrence of forecasted transactions is minimal. The Group also does not expect any material deterioration in both counterparty credit risk and own credit risk. Accordingly, the Group continues to believe that there is no impact on effectiveness of its hedges. Future outlook will depend on how the pandemic develops and the resultant impact on the businesses.

## Notes to Consolidated Financial Statements (continued)

Following table summarises approximate gain / (loss) on the Group's profit before tax and pre-tax equity on account of appreciation / depreciation of underlying foreign currencies:

Details	Rs in Crores			
	2020		2019	
	Effect on Profit before tax	Effect on Pre-tax Equity	Effect on Profit before tax	Effect on Pre-tax Equity
5% appreciation of the underlying foreign currencies	2.35	(16.94)	5.00	(10.25)
5% depreciation of the underlying foreign currencies	(2.35)	17.35	(5.00)	15.44

**Interest rate risk**

The Group's exposure to the risk of changes in market interest rates relates primarily to its debt obligations with floating interest rates. The Group uses interest rate swap contracts to manage interest rate exposure on its long term debt obligations. The Group has entered into an interest rate swap whereby the Group pays a fixed rate of interest and receives a floating rate of interest on approximately half of the balance of term debt. These derivatives have been designated as cash flow hedges. In addition, the interest rate risk, can also impact the provision for retiral benefits.

Details of Interest rate swap which the Group has entered into for hedging its interest rate exposure on borrowing:

Details of Borrowings	Currency	2020			2019

## Price Risk

### Commodity Price risk

The Group is exposed to fluctuations in price of certain commodities mainly tea, salt, pulses and coffee. Mismatch in demand and supply, adverse weather conditions, market expectations etc, can lead to price fluctuations. For tea, these fluctuations are managed through active sourcing, distribution of source of supply, private purchases and alternate blending strategies without impacting the quality of the blend. For Salt and pulses, these fluctuations are managed through active sourcing and commercial negotiation with customers and suppliers.

Further, the Group uses coffee futures and option contracts for US coffee operations, to reduce the price risk associated with forecasted purchases of coffee beans.

The Group enters into coffee futures based on market price and anticipated production requirements. These coffee futures have been designated as cash flow hedges and the unrealised gain / (loss) or fair value is recorded in other comprehensive income (OCI). The Group also enters into various call and put option contract to protect the price. The fair value of the unsettled contracts is recorded in other current assets or other current liabilities. The realised and unrealised gains and losses on these contracts are included in Statement of Profit and Loss as a part of Cost of Materials Consumed.

Outstanding position for various commodity derivatives financial instruments:

Commodity	Futures & Options	2020			2019

Fair value represents impact of mark to market value as at year end.

Impact of Covid 19 pandemic- Based on recent trends, the Group believes that depending on prevalence of lockdown conditions in regions from where raw materials are sourced, disruptions to the supply chain cannot be ruled out. This is an area which will be dynamically reviewed and managed by the Group. Future outlook will depend on how the pandemic develops and the resultant impact on businesses.

### Equity investment Price risk

The price risk is the risk arising from investments held by the Group and classified in the balance sheet either as fair value through other comprehensive income or at fair value through profit or loss.

The Group's equity investments are mainly strategic in nature and are generally held on a long term basis. Further, the current investments are all in units of overnight and liquid mutual funds and these are not exposed to significant price risk.

**Capital Management**

The Group's objective for capital management is to maximise shareholder wealth, safeguard business continuity and support the growth of the Group. The Group determines the capital management requirement based on annual operating plans and long term and other strategic investment plans. The funding requirements are met through equity, borrowings and operating cash flows.

The Group's adjusted net debt and equity position as at March 31, 2020 was as follows:

	Rs in Crores	
	2020	2019
Total Borrowings	1256.39	1141.10
Less : Cash and cash equivalent including bank deposits	1610.20	1022.02

<b>Adjusted net (cash) / debt</b>	<b>(1321.30)</b>	<b>(720.61)</b>
<b>Total Equity</b>	<b>14907.33</b>	<b>8359.37</b>

**37. Employee Benefits Obligation****i) Defined contribution plans**

The Group operates certain defined contribution schemes like provident fund and defined contribution superannuation schemes. Contributions are made by the Group, based on current salaries, to funds maintained by the Group and, for certain categories contributions are made to State Plans. For certain schemes, contributions are also made by the employees. Amount recognised in the statement of profit and loss on account of defined contribution schemes is Rs 41.82 Crores (Rs 36.26 Crores).

**ii) Defined benefit plans****(a) Pension benefits**

The Group also operates defined benefits pension plans in India and UK. The defined benefit schemes in India, which are closed to future accruals, offer specified benefits to the employees on retirement. Annual actuarial valuations are carried out by independent actuaries. Wherever funds have been set up, annual contributions are also made by the Group. Employees are not required to make any contribution.

The Group sponsors a defined benefit pension plan, the Tetley GB Final Salary Scheme (the "Scheme"), in the UK with benefits based on final salary. The Group closed the Scheme to future accrual with effect from 6 April 2005. The final salary pension plans provides benefits to members in the form of a guaranteed level of pension payable for life. The level of benefits provided depends on the members' length of service and their salary in the schemes final year. Payments from the scheme are generally indexed in line with the retail price index. The benefit payments are from trustee-administered funds. Responsibility for governance of the plan including investment decisions lies with the board of trustees. Contribution schedules are triennially agreed between the Group and the board of trustees. The board of trustees comprise of representatives of the Group and plan participants in accordance with the plan's regulations.

**(b) Gratuity**

The Group provides for gratuity for employees in India covering eligible employees. The gratuity plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days' salary payable for each completed year of service. Vesting occurs upon completion of five continuous years of service.

**(c) Post-employment medical benefits**

The Group operates post-employment medical benefits scheme to eligible employees in India and to former employees in the UK and the US. These plans are unfunded and the valuation method is similar to those used for defined benefit pension schemes.

**d) Others**

There are other superannuation benefits restricted to certain categories of employees/directors in the form of pension, medical and other benefits in terms of a specific policy.

**(e) Post-employment life assurance benefits**

The Group operates post-employment life assurance benefits to former employees in the US. These plans are unfunded and the valuation method is similar to those used for defined benefit pension schemes.

**(f) Leave obligation**

The Group has a policy on compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by actuarial valuation performed by an independent actuary at each balance sheet date using projected unit credit method.

The table below outlines the net position of the Group's post-employment benefits plan:

Sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. In presenting the above sensitivity analysis, the present value of the defined benefit obligations has been calculated using the Projected Unit Credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the balance sheet. For the overseas pension fund, interest rate and inflation risks have been hedged, as explained in the section on risk hereunder.

**Risks****India**

The Group contributes all its ascertained liabilities towards gratuity to the trust set up for the same. Trustees administer the contributions made to the trust. As at March 31, 2020 and March 31, 2019, the plan assets have been primarily invested in insurer managed funds.

**Overseas**

The nature of the Scheme exposes the Group to the risk of paying unanticipated additional contributions to the Scheme in times of adverse experience. The most financially significant risks are likely to be:

- **Asset volatility**  
The Scheme's liabilities are calculated using a discount rate set with reference to corporate bond yields in line with the requirements of Ind AS 19. If the Scheme assets underperform this yield, it will increase the deficit. The plan holds investments across a range of asset classes which are expected to outperform corporate bonds in the long term but have volatility and risks in the short term.
- **Changes in bond yields**  
A decrease in corporate bond yields will increase plan liabilities. In the event of a reduction in the corporate bond yields there will be an increase in the value of the Scheme's interest rate swaps and derivatives held which reduce exposure to this risk by approximately 90%.
- **Inflation risk**  
The Group pension obligations are linked to inflation, and higher inflation will lead to higher liabilities. The hedging strategy in place means through the use of inflation swaps and derivatives the scheme assets hedge approximately 90% of this risk.
- **Life expectancy**  
The Scheme's obligation is to provide benefits for the life of the members. An increase in life expectancy will result in an increase in the Scheme's liabilities.

**Asset-liability matching strategies used by the overseas scheme**

The Scheme's investment strategy includes holding a 40% allocation to liability-driven investments which involves hedging the fund's exposure to changes in interest rates and inflation through use of liability driven investments (LDI) which typically involves swaps and derivatives, 15% exposure to multi-asset credit and a 7.5% holding in corporate bonds, the remaining portfolio invested across a diversified range of growth assets which includes equity, diversified growth funds and secured income assets.

## Notes to Consolidated Financial Statements (continued)

**Expected contributions over the next financial year:**

The Group expects to contribute approximately Rs 62.95 Crores to the Schemes in the year ending March 31, 2021.

**Maturity Profile of defined benefit obligation (undiscounted basis):**

**Post-employment life assurance benefits - Overseas**

The Group operates post-employment life assurance benefits to former employees in the US. These plans are unfunded and the valuation method is similar to those used for defined benefit pension schemes. The liability recognised in the balance sheet as at March 31, 2020 was Rs 4.12 Crores (Rs 3.89 Crores).

**Post-employment medical benefits - Overseas**

The Group operates post-employment medical benefits scheme to eligible former employees in the UK and the US. These plans are unfunded and the valuation method is similar to those used for defined benefit pension schemes with the addition of actuarial assumptions relating to the long-term increase in healthcare costs in the US of 5.0% p.a. and in the UK of 5.4% p.a. The liability recognised in the balance sheet as at March 31, 2020 was Rs 6.31 Crores (Rs 6.25 Crores).

**iii) Provident Fund**

The Parent Company and its Indian subsidiary operate Provident Fund Schemes and the contributions are made to recognised funds maintained by the Parent Company and an Indian subsidiary and for certain categories contributions are made to State Plans. The said companies have an obligation to fund any shortfall on the yield of the trust's investments over the administered rates on an annual basis. The Actuary has provided a valuation for provident fund liabilities on the basis of guidance issued by Actuarial Society of India and based on the below provided assumption.

**RESOLVED FURTHER THAT** the Board (which term shall be deemed to include any Committee of the Board constituted to exercise its powers, including the powers conferred by this Resolution) be and is hereby authorized to take such steps as may be necessary for obtaining necessary approvals - statutory, contractual or otherwise, in relation to the above and to settle all matters arising out of and incidental thereto and to sign and execute deeds, applications, documents and writings that may be required, on behalf of the Company and generally to do all such other acts, deeds, matters and things as may be necessary, proper, expedient or incidental for giving effect to this Resolution."

**NOTES:**

1. In view of the massive outbreak of the COVID-19 pandemic, social distancing is a norm to be followed. The Annual General Meeting ("AGM") of the Company is scheduled to be held on Monday, July 6, 2020, at 10:30 a.m. (IST) through two-way Video Conferencing ("VC") or Other Audio Visual Means ("OAVM") and the voting for items to be transacted in the Notice to this AGM shall be only through remote electronic voting process or electronic voting during the AGM, in compliance with applicable provisions of the Companies Act, 2013 (**the "Act"**) (including any statutory modification or re-enactment thereof for the time being in force) read with Rule 22 of the Companies (Management and Administration) Rules, 2014 (**the "Rules"**), as amended from time to time, and the General Circular No. 14/ 2020 dated April 8, 2020, the General Circular No. 17/ 2020 dated April 13, 2020, in relation to "Clarification on passing of ordinary and special resolutions by companies under the Companies Act, 2013 and the rules made thereunder on account of the threat posed by COVID-19" and General Circular No. 20/ 2020 dated May 5, 2020, in relation to "Clarification on holding of Annual General Meeting (AGM) through video Conferencing (VC) or Other Audio Visual Means (OAVM)" all issued by the Ministry of Corporate Affairs, Government of India (the "MCA Circulars") and Regulation 44 of the SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015 (**"Listing Regulations"**) read with Circular dated May 12, 2020, in relation to "Additional relaxation in relation to compliance with certain provisions of Listing Regulations - COVID-19 pandemic". The deemed venue for the AGM will be the place from where the Chairman of the Board conducts the meeting.
2. Further, pursuant to the MCA and SEBI Circulars, the Notice of the AGM along with the Annual Report for FY 2019-20 is sent in electronic form only to those Members whose email addresses are registered with the Company/ Depositories. The Notice calling the 57th AGM has been uploaded on the website of the Company at [www.tataconsumer.com](http://www.tataconsumer.com). The Notice can also be accessed from the websites of the Stock Exchanges i.e. BSE Limited (**"BSE"**) and The National Stock Exchange of India Limited (**"NSE"**) at [www.bseindia.com](http://www.bseindia.com) and [www.nseindia.com](http://www.nseindia.com) respectively and the AGM Notice is also available on the website of National Securities Depository Limited (**"NSDL"**) (agency for providing the Remote e-Voting facility) i.e. [www.evoting.nsdl.com](http://www.evoting.nsdl.com).
3. The relative Explanatory Statement pursuant to Section 102 of the Companies Act, 2013 (**"Act"**) in respect of Item Nos. 5 & 6 are annexed hereto. Information under Regulations 26 (4) and 36 (3) of the Listing Regulations and as required under Secretarial Standard 2 on General Meeting, pursuant to Section 118 (10) of the Act, issued by the Institute of Company Secretaries of India, relating to Directors proposed to be appointed/re-appointed at this Annual General Meeting (**"Meeting" or "AGM"**) is provided in the Annexure to this Notice. Requisite declarations have been received from the Directors for seeking appointment / re-appointment.

4. Pursuant to the provisions of the Companies Act, 2013, a Member entitled to attend and vote at the AGM is entitled to appoint a proxy to attend and vote on his/her behalf and the proxy need not be a Member of the Company. Since this AGM is being held pursuant to the MCA Circulars through VC or OAVM, physical attendance of Members has been dispensed with. Accordingly, in terms of the above-mentioned MCA and SEBI circulars, the facility for appointment of proxies by the Members will not be available for the AGM and hence the Proxy Form and Attendance Slip are not annexed to this Notice.
5. Members attending the meeting through VC or OAVM shall be counted for the purpose of reckoning the quorum under Section 103 of the Companies Act 2013.
6. As per the provisions of Clause 3.A.III. of the General Circular No. 20/ 2020 dated May 5, 2020, the matters of Special Business as appearing at Item Nos. 5 & 6 of the accompanying Notice, are considered to be unavoidable by the Board and hence, forming part of this Notice.
7. The Members are requested to note that the Company is pleased to provide a two-way Video Conferencing Facility (VC) to view the live streaming of the proceedings of the AGM and facilitate participation of Members at the AGM through VC or asking their questions through a Chatbox facility. The Members will be able to view the proceedings on NSDL's e-Voting website [www.evoting.nsdl.com](http://www.evoting.nsdl.com).
8. Members may use this facility by using the same login credentials as provided for remote e-Voting. Members on the day of the AGM will login through their user ID and password on e-Voting website of NSDL. The link will be available in Member login where the EVEN of Company will be displayed. On clicking this link, the Member will be able to view the webcasting of the AGM proceedings. The VC Facility will be available on July 6, 2020 from 10:30 a.m. (IST) onwards till the conclusion of the Meeting.
9. Members seeking any information with regard to any items provided in the AGM Notice including the Annual Accounts and any queries relating to the business / operations of the Company, are requested to write to the Company mentioning their name, DP ID and Client ID number /folio number and mobile number, to reach at least forty-eight hours prior to the AGM i.e. on or before 10.30 a.m. (IST) on July 4, 2020 at **AGM2020@tataconsumer.com** and responses to such queries will be appropriately addressed by the Chairman of the meeting. Due to technical reasons, the length of a question may possibly be limited to a certain number of characters; however, the number of questions a shareholder or its authorized representative can submit will not be affected thereby. The Management will decide, at its due discretion, whether and how it will answer the questions. It can summarize questions and select, in the interest of the other shareholders, meaningful questions. Only questions in the English language will be taken into account. Queries that remain unanswered at the AGM will be appropriately responded by the Company at the earliest post the conclusion of the AGM, with the Company preserving the right to answer frequently asked questions upfront on the Company's website.
10. Corporate members intending to send their authorised representative to attend the AGM through VC or OAVM or to vote through remote e-voting, pursuant to Sections 112 and 113 of the Act, are requested to send a certified copy of the board resolution to the Scrutinizer by e-mail at [asimsecy@gmail.com](mailto:asimsecy@gmail.com) with a copy marked to [evoting@nsdl.co.in](mailto:evoting@nsdl.co.in), authorising their representative to attend and vote on their behalf at the AGM.
11. To prevent fraudulent transactions, Members are advised to exercise due diligence and notify the Company of any change in address or demise of any Member as soon as possible. Members are also advised to not leave their demat account(s) dormant for long. Periodic statement of holdings should be obtained from the concerned Depository Participant and holdings should be verified from time to time.
12. The Members can join the AGM in the VC/OAVM mode 30 minutes before and 15 minutes after the scheduled time of the commencement of the Meeting by following the procedure mentioned in the Notice. The Members will be able to view the proceedings on NSDL's e-Voting website [www.evoting.nsdl.com](http://www.evoting.nsdl.com). The facility of participation at the AGM through VC/OAVM will be made available to at least 1,500 members on first come first served basis. This will not include large Shareholders (Shareholders holding 2% or more shareholding), Promoters, Institutional Investors, Directors, Key Managerial Personnel, the

Members holding shares in electronic form may please note that their bank details as furnished by the respective Depositories to the Company will be considered for remittance of dividend as per the applicable regulations of the Depositories and the Company will not entertain any direct request from such Members for change/deletion in such bank details. Accordingly, the Members holding shares in demat form are requested to update their Electronic Bank Mandate with their respective Depository Participant(s).

Further, please note that instructions, if any, already given by Members in respect of shares held in physical form, will not be automatically applicable to the dividend paid on shares held in electronic form.

17. Shareholders holding shares in physical form are requested to advise any change of correspondence address, email address, bank details immediately to the Company's Registrar and Share Transfer Agents, M/s TSR Darashaw Consultants Private Limited

("TSRD"). Shareholders holding shares in electronic form must advise their respective depository participants about any change in correspondence address, email address and bank details and not to the Company or the Registrars.

The Securities and Exchange Board of India ("SEBI") has mandated the submission of Permanent Account Number ("PAN") by every participant in securities market. Members holding shares in electronic form are, therefore, requested to submit the PAN to their Depository Participants with whom they are maintaining their demat accounts. Members holding shares in physical form can submit their PAN details to the Company or TSRD by clicking at <https://green.tsrdarashaw.com/green/events/login/tf>.

18. Members holding shares in physical form in identical order of names in more than one folio are requested to send to the Company or TSRD, the details of such folios together with the share certificates and self-attested copies of the PAN card of the holders for consolidating their holdings in one folio. A consolidated share certificate will be issued to such Members after making requisite changes thereon.
19. The Members who are unable to receive the dividend directly in their bank accounts through Electronic Clearing Service or any other means, due to non-registration of the Electronic Bank Mandate, the Company shall dispatch the dividend warrant/ Bankers' cheque/ demand draft to such Members, upon normalisation of postal services and other activities.
20. As per the provisions of Section 72 of the Act, the facility for making nomination is available to the Members in respect of the shares held by them. Members who have not yet registered their nomination are requested to register the same by submitting Form No. SH-13. The said form can be downloaded from the Company's website <https://www.tataconsumer.com/investors/share-registration>. Members holding shares in physical form may submit the same to TSRD. Members holding shares in electronic form may submit the same to their respective depository participant.
21. This AGM Notice is being sent, by e-mail, only to those eligible Members who have already registered their e-mail address with the Depositories / the depository

participant / the Company's Registrar and Share Transfer Agents: TSRD / the Company or who will register their e-mail address with RTA, on or before June 22, 2020. The Company has also made special arrangement with TSRD and NSDL for registration of e-mail addresses in terms of the MCA Circulars to receive the Annual Report along with the AGM Notice electronically and to cast the vote electronically.

**Registration with TSRD:** Process to be followed for registration of e-mail address is as follows:

26. Shareholders may note that the bank details registered against their account in physical form will not be applicable to their electronic account and vice versa. The Company or its Registrars cannot act on any request received directly from the shareholders holding shares in electronic form for any change of bank particulars or bank mandate. Such changes are

to be advised only to the Depository Participant of the shareholders.

It is in the interest of shareholders to register their bank details against their account and avail of facility being extended by the Company of receiving the credit of dividend directly to their bank account through electronic means. The facility is available at all bank branches who have registered themselves as participating banks with National Payment Corporation of India and have joined the Core Banking System.

Shareholders may please note that under SEBI instructions, furnishing of bank particulars by the shareholders has become mandatory.

### 27. **Transfer of Unclaimed / Unpaid dividend to the Investor Education and Protection Fund ("IEPF"):**

In accordance with the provisions of Sections 124, 125 and other applicable provisions, if any, of the Act, read with the Investor Education Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 ("IEPF Rules") (including any statutory modification(s) or re-enactment(s) thereof for the time being in force), the amount of dividend remaining unclaimed or unpaid for a period of seven years from the date of transfer to the unpaid dividend account is required to be transferred to the IEPF, maintained by the Central Government. In pursuance of this, the dividend remaining unclaimed or unpaid in respect of dividends declared upto the financial year ended March 31, 2012 have been transferred to the IEPF. The details of the unclaimed dividends so transferred are available on the Company's website, <https://www.tataconsumer.com/investors/investor-information/iepf-related-matters> and on the website of the Ministry of Corporate Affairs at [www.mca.gov.in](http://www.mca.gov.in).

**It may be noted that unclaimed dividend for the financial year 2012-13 declared on July 15, 2013 is due to be transferred to the IEPF by September 2020. The same can, however, be claimed by the members by August 06, 2020.**

Members who have not encashed the dividend warrant(s) from the financial year ended March 31, 2013 may forward their claims online to the Company's Registrar and Share Transfer Agents before they are due to be transferred to the IEPF, details of which are given in the Corporate Governance Report.

In accordance with Section 124(6) of the Act, read with the IEPF Rules, all the shares in respect of which dividend has remained unclaimed or unpaid for seven consecutive years or more are required to be transferred to the Demat Account of the IEPF Authority. Accordingly, all the shares in respect of which dividends were declared upto the financial years ended March 31, 2012 and remained unpaid or unclaimed were transferred to the IEPF. The details of such shares transferred have been uploaded in the Company's website <https://www.tataconsumer.com/investors/investor-information/iepf-related-matters>.

The shares and unclaimed dividend transferred to the IEPF can however be claimed back by the concerned members from IEPF Authority after complying with the procedure prescribed under the IEPF Rules. The Member/Claimant is required to make an online application to the IEPF Authority in Form IEPF-5 (available on [www.iepf.gov.in](http://www.iepf.gov.in)) along with requisite fees as decided by the IEPF Authority from time to time. The Member/Claimant can file only one consolidated claim in a financial year as per the IEPF Rules.

account number, MICR code, IFSC code, etc., to their Depository Participants (DPs) in case the shares are held in electronic form and to the Registrar at [csg-unit@tsrdarashaw.com](mailto:csg-unit@tsrdarashaw.com) in case the shares are held in physical form quoting your folio no.

28. SEBI had vide Notification No. SEBI/LAD-NRO/GN/2018/24 dated June 08, 2018 and SEBI/LAD-NRO/GN/2018/49 dated November 30, 2018 read with BSE circular no. list/comp/15/2018-19 dated July 05, 2018 and NSE circular no. NSE/CML/2018/26 dated July 09, 2018 directed that transfer of securities would be carried out in dematerialised form only with effect from April 1, 2019, except in case of transmission or transposition of securities. In view of this and to eliminate all risks associated with physical shares and for ease of portfolio management, Members holding shares in physical form are requested to consider converting their holdings to dematerialized form. Members can contact the Company's Registrar and Share Transfer Agent, TSR Darashaw Consultants Private Limited ('Registrar' or 'TSRD') at [csg-unit@tsrdarashaw.com](mailto:csg-unit@tsrdarashaw.com) for assistance in this regard. Members may also refer to Frequently Asked Questions ("FAQs") on Company's website [www.tataconsumer.com](http://www.tataconsumer.com).
29. Members are requested to intimate changes, if any, pertaining to their name, postal address, e-mail address, telephone/mobile numbers, Permanent Account Number (PAN), registering of nomination, power of attorney registration, Bank Mandate details such as, name of the bank and branch details, bank account number, MICR code, IFSC code, etc., to their Depository Participants (DPs) in case the shares are held in electronic form and to the Registrar at [csg-unit@tsrdarashaw.com](mailto:csg-unit@tsrdarashaw.com) in case the shares are held in physical form quoting your folio no.
30. The format of the Register of Members prescribed by the Ministry of Corporate Affairs under the Act, requires the Company/Registrars and Share Transfer Agents to record additional details of Members, including their PAN details, e-mail address, bank details for payment of dividend etc. A form for capturing additional details is available on the Company's website under the section 'Investor Relations' as also attached as part of this Report. Members holding shares in physical form are requested to submit the filled in form to the Company at [investor.relations@tataconsumer.com](mailto:investor.relations@tataconsumer.com) or to the Registrar in physical mode, after restoring normalcy or in electronic mode at [csg-unit@tsrdarashaw.com](mailto:csg-unit@tsrdarashaw.com), as per instructions mentioned in the form. Members holding shares in electronic form are requested to submit the details to their respective DP only and not to the Company or TSRD.
31. **Process and manner of voting through electronic means:**
  - i. In compliance with the provisions of Section 108 of the Act, and Rules framed thereunder, as amended from time to time, and Regulation 44 of the SEBI Listing Regulations, the Company is pleased to provide members holding shares either in physical form or in dematerialised form, the facility to exercise their right to vote on the resolutions set forth in the Notice by electronic means and the business may be transacted through e-voting services provided by National Securities Depository Limited ("NSDL"). The members may cast their votes using an electronic voting system from a place other than the venue of the AGM (remote e-voting). The Resolutions passed by remote e-voting are deemed to have been passed as if they have been passed at the AGM. The Notice of the AGM indicating the instructions of remote e-voting process can be downloaded from the NSDL's website [www.evoting.nsdl.com](http://www.evoting.nsdl.com) or the Company's website [www.tataconsumer.com](http://www.tataconsumer.com).

## EXPLANATORY STATEMENT PURSUANT TO SECTION 102 OF THE COMPANIES ACT, 2013 ("THE ACT")

As required by Section 102 of the Act, the following explanatory statement sets out all material facts relating to the businesses mentioned under Item Nos. 5 & 6 of the accompanying Notice.

### Item No. 5:

#### Ratification of the remuneration of Cost Auditors:

The Company is required, under the provisions of Section 148(3) of the Act, read with the Companies (Cost Records and Audit) Rules, 2014 ("the Rules"), as amended from time to time, to have the audit of its cost records conducted by a cost accountant in practice.

The Board, on the recommendation of the Audit Committee, has approved the appointment and remuneration of M/s Shome & Banerjee, Cost Accountants, (Firm Registration Number 000001), as the Cost Auditors to conduct the audit of the cost records of the Company, for the financial year ending March 31, 2021.

In accordance with the provisions of Section 148 of the Act, read with the Companies (Audit and Auditors) Rules, 2014, the remuneration payable to the Cost Auditors as recommended by the Audit Committee and approved by the Board of Directors, has to be ratified by the Members of the Company. Accordingly, consent of the Members is sought for passing an Ordinary Resolution as set out at Item No. 5 of the Notice for approval of the remuneration of Rs 4,00,000/- (Rupees Four Lakh only) payable to the Cost Auditors, for the financial year ending March 31, 2021.

The Board commends the Ordinary Resolution set out at Item No. 5 of the Notice for approval by the Members.

None of the Directors and Key Managerial Personnel of the Company or their respective relatives is, in any way, concerned or interested, in the Resolution set out at Item No. 5 of the Notice.

### Item No. 6:

#### Appointment of Mr. Sunil D'souza (DIN 07194259) as Managing Director and Chief Executive Officer (MD&CEO) and terms of appointment

The Board of Directors, upon the recommendation of the Nomination and Remuneration Committee, at their respective meetings held on December 20, 2019, appointed Mr. Sunil D'souza (DIN 07194259) as an Additional Director and Managing Director & Chief Executive Officer ("MD&CEO") of the Company, not liable to retire by rotation, for a period of five year commencing from April 4, 2020 until April 3, 2025, subject to approval of the Shareholders.

The Board, while appointing Mr. Sunil D'souza as the Managing Director & Chief Executive Officer of the Company, considered his background and wide experience.

The Company has received from Mr. Sunil D'souza (i) consent in writing to act as Director in Form DIR-2 pursuant to Rule 8 of Companies (Appointment & Qualification of Directors) Rules, 2014, (ii) intimation in Form DIR-8 in terms of Companies (Appointment & Qualification of Directors) Rules, 2014, to the effect that he is not disqualified under sub section (2) of Section 164 of the Companies Act, 2013, and (iii) Notice of interest in Form MBP-1 in terms of Section 184(1), and other applicable provisions of the Companies Act, 2013.

Mr. Sunil D'Souza joins the Company from Whirlpool of India Limited, a public listed Company, where he was the Managing Director. He has over 25 years of experience working in various leadership positions in the consumer products and consumer durables sectors. He brings with him a rich and diverse experience in general management, strategy, sales, marketing and innovation in consumer driven industries, with Indian, International and multicultural experience. Prior to joining Whirlpool of India Limited, Mr. D'Souza worked with Pepsico Inc. for 15 years and held various senior level positions across various geographies. His last assignment in Pepsico was in Malaysia as General Manager for the VIMAPS Region - comprising Vietnam, Cambodia, Myanmar, Laos, Malaysia, Singapore, Indonesia, Brunei, Mongolia and Pacific Islands. Prior to his roles in PepsiCo, Mr. D'Souza has worked with Coca Cola, Standard Chartered Bank and Brooke Bond Lipton India Ltd. (now Hindustan Unilever Ltd.) in various capacities.

He holds a Bachelor's degree in Electronics and Communication Engineering from Pondicherry Engineering College, and a post graduate diploma in management from the Indian Institute of Management, Kolkata.

The principal terms and conditions of Mr. Sunil D'Souza appointment as MD&CEO and the main clauses of the agreement to be executed between the Company and the MD&CEO are as follows:

#### A. Tenure of Appointment:

The appointment of MD&CEO is for a period of 5 year commencing from April 4, 2020 to April 3, 2025.

## Notice (continued)

### B. Nature of Duties:

The MD&CEO shall devote his whole time and attention to the business of the Company and carry out such duties as may be entrusted to him by the Board of Directors, and exercise such powers as may be assigned to him, subject to the superintendence, control and directions of the Board in connection with and in the best interest of the business of the Company and the business of any one or more of its associated companies and /or subsidiaries, including performing duties as assigned by the Board from time to time, by serving on the Boards of such associated companies/ subsidiaries or any other executive body or a committee of such a company.

### C. Remuneration:
