 Building 12, first floor
 Guru Hargovindji Road, Chakala,
 Andheri East, Mumbai,
 Maharashtra 400053

Median Research & Consulting Pvt Ltd. had conducted an independent Claim Test study (a Laboratory Product Test) with the following specifications:

| | |
|--|---|
| Project name : | Superiority Claim Test |
| No. of Salt Brands Tested : | Tata Salt tested against 101 competition salt brands |
| The Laboratory where the brands were tested : | TÜV SÜD South Asia, Bengaluru |
| SKU used for evaluation : | Available SKUs of Brands (Pan India) * |
| Evaluating Parameter : | Moisture Content & Water Insoluble Matter % (on DB)] |
| Protocols/ process followed for testing: | The standard protocol as per FSSAI-prescribed methods |
| Duration of Laboratory Test : | 21 st July to 28 th Sept, 2023 |

*Refer Methodology for more details

Background:

- Tata Salt, one of the flagship brands from the house of Tatas, has enjoyed significant consumer reach and popularity pan India. Tata Salt's mission is to be the 'Salt' of the nation by ensuring that each & every family is catered with salt having utmost refinement and the right amount of iodine. While the brand has always spoken about its vacuum evaporated iodised salt, the endeavour was to bring to consumers a tangible claim that differentiates the refinement of Tata Salt from others.
- Hence, the Client decided to embark on a Conclusive Research (in the form of Laboratory Tests) which would provide tangible and credible justification for Tata Salt's claims of superiority.
- The insights and results are expected to enable Tata Consumer Products Limited (TCPL) to develop strong communication messages for the target audience.

Key Objective :

To identify compelling information (from laboratory tests) that may be used to build consumer claims on the superiority of Tata Salt

Activity Conducted

- Tata Salt was tested along with **101 competition brands**, on key parameters which included Insoluble matter content & Moisture%. The tests were conducted in an NABL accredited lab in Bangalore (TUV Sud)
- Median Research & Consulting facilitated procuring various salt brands across different cities. These products were then handed over to the lab for the tests.
- The data from the Lab would be used by Median Research to suggest claims that substantiate the superior quality of Tata Salt on the parameters tested.

Methodology

- The performance of superiority of the Tata Salt vis-à-vis the competitions was conducted on the basis of Insoluble matter content
- To maintain like to like comparison, Median Research & Consulting, in consultation with the client, decided to compare the branded powdered salts

The products were tested by the lab following the standard methods prescribed in India

What is the powdered salt category like?

As per Kantar HHP report (MAT May23), the total branded white salt is 88% of total salt universe. The salt category is extremely fragmented with only 11 salts (65% of the branded powdered salt universe) having more than 1% market share. There are 400+ brands that make up the remaining category which are extremely small (<1% market share).

What did we do?

Built a database for testing that covers:

- (1) a sizeable portion of the market by volume - so collection of samples done as many as possible!
- (2) definitely cover all key brands (more than 1% share).

What did we achieve?

Collected 102 salts including Tata Salt (78% of all branded white salt) including all 11 brands more than 1% + many smaller brands.

The Lab Test results yielded the following results for Water Insoluble matter content:

- a) Refinement of the salt was judged based on the low level of insoluble matter per unit weight of the product. This is what the consumer gets as part of the salt purchased.
- b) **Tata Salt found to have the least water insoluble content** amongst all the brands tested – So based on the samples tested & mentioned in this report, highest level of refinement can be claimed on Tata Salt.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Swati Sasmal".

SWATI SASMAL

Director, Median Research & Consulting Pvt Ltd. [India]

ANNEXURE :

All brands tested for Water Insoluble Matter & Moisture%:
