Creation of Tata Consumer Products

Merger of consumer products business of TCL with TGBL has led to creation of Tata Consumer Products Limited (TCPL)

Genesis for creation of TCPL

- Creation of a sizeable Consumer company with enhanced scale and financial strength
- Tap the larger opportunity available in Foods & Beverages segment and not be limited only to beverages category
- Leverage the experience of operating in both Indian and International markets
- Potential to unlock significant synergies across distribution, marketing, innovation and supply chain
- Create a consumer company with a diversified portfolio of leading Indian and International brands like Tata Salt, Tata Tea, Tetley, Eight O’ Clock and high growth potential brands like Tata Sampann and Tata Starbucks

Update on integration

- Merger consummated in ~9 months. Scheme effective and operational from February 7, 2020 and the company name changed on February 10, 2020
- Received approval to list the new shares from BSE, NSE and CSE on March 18, 19 and 20 respectively
- Team created to managed the transition following the merger announcement; seamless Day 1 transition effected
- Dedicated team focused to ensure successful integration of businesses including the creation of a unified way of working and realization of synergies have been created

Note: Merger completed w.e.f 7th February 2020. TCL shareholders entitled to receive 114 shares of TGBL for every 100 shares of TCL.
India’s Consumption Story

₹30 lakh crore market opportunity
Market skewed towards in-the-kitchen segment

- In-the-Kitchen, the largest category in F&B basket is still untapped by organized players (Market share <10%)
- On-the-Go and On-the-Table categories are dominated by indulgent snacking offerings by national & local players
- All 3 categories are witnessing demand for healthy and better quality products, which represents a large opportunity for TCPL
- We aim to become a formidable player across the 3 categories, while focusing on offering products that are high in quality, innovative, delightful and made with goodness and care

Market Context

Muted FMCG industry growth

- FMCG industry growth has witnessed decline since the last 4 quarters in-line with GDP growth
- Decline being led by weakening of rural demand, increase in unemployment and higher consumer inflation (4.62% in Oct’19 vs. 7.59% in Jan’20)
- As a result the household spending growth rate has declined to ~4.8% in Q4’20 vs. ~7.2% in Q4’19
- Industry growth in Q4’FY20 further decelerated due to COVID-19 impacted in March (3.3% growth in March)
- We expect higher demand for staple products category in the short term as compared to other discretionary items, which will further get intensified due to COVID-19

Source: *Nielsen, NSO & tradingeconomics.com

Depreciation in Indian Rupee

- In Q4’FY20, Rupee depreciated against USD by 1.6% Y-o-Y, as compared to Q4’FY19 (average of 71.6 vs. 70.5). This sharp dip was primary due to sharp market sell off in the backdrop of COVID-19 impact
- Rupee also depreciated against GBP by 1.5% during the same period (93.5 vs. 92.2). However, there was an appreciation of Rupee against GBP of 1.3% in Mar’20, due to COVID-19 impact
Market Context

Declining commodity costs

- Tea prices in India have seen a decline for some time, largely due to over supply from small tea growers
- However, there has been a sharp increase in prices due to temporary closure of tea estates in India due to COVID-19 impact
- The prices will continue to be strong till the time operations are back to normal
- Fall in Kenyan tea prices has arrested, and prices have stabilized, however might also see an uptrend in the short term
- Coffee prices continue to decline, especially for Robusta coffee

Source: North India and South India tea auction (Tea Board of India) | Mombasa tea auction (EATTA) | International Coffee Exchange
• Regular black tea continues to be the largest category share in the overall global tea market, it has been witnessing slow / declining growth across the markets
• Non-black tea (Fruit & Herbal, Specialty, Decaf, Cold Infusions, etc.) is witnessing strong growth in the International markets, led by shift in consumer preference for health & wellness products
• Indian market has witnessed growth of ~6% in Branded tea. Indian consumers continue to prefer Regular black Tea (predominant sub-category)
• Increasing number of tea cafes in Indian urban centres is helping reinvent the tea culture and growing the potential base of customers
• There has been panic buying due to the Covid crisis, leading to upsurge in tea and coffee demand in International Markets in Qtr 4

COVID-19: Business Update

International operations

• All our factories have been running flat out, and we continue to see high demand, with significant increase in in-home consumption with offices, bars and restaurants closed during the lockdowns.
• While the tea and coffee sales to our retail customers has increased 20-25% during this period, the B2B businesses we have in USA and Australia have suffered a sharp decline
• Preparations for normal business, post the lockdown are underway, including safety protocols, business plans, identifying growth opportunities, NPD launches, capacity build up, raw material supply continuity etc.
• We do expect contraction in demand gradually as consumers draw down on pantry stocks.

India operations

• Almost all our Tea packaging units, Salt/Pulses packing centres and 3P Spices units are now operational with prescribed operating norms.
• Almost all our warehouses are now operational with a few operating with limited working hours and manpower. FG stock holding across depots are at a healthy levels
• New safety protocols have been rolled out basis notifications issued by various Govt Dept, and also FSSAI (Food Safety and Standards authority of India)
• To enable delivery to consumers , we have tied-up with E-commerce & Food Delivery providers
• Preparations for the end of lockdown are underway; including alternate capacities, extended working hours, hardship allowance, insurance cover for frontline workforce (own & contract)

India – JVs and plantations

Tata Starbucks
• All the stores in India were closed wef 22nd March, till mid of April
• We have now been able open ~30 outlets for delivery only

NourishCo
• As most of the liquid products are consumed out of home, the impact has been quite significant
• As the shops are opening gradually, the revenues are crawling back to normalcy

Plantations
• All the tea and coffee plantations in India were also shut till mid of April
• They are now operating albeit with lower work force

*This reflects the recent impact, which might change depending on further developments and economic conditions which is difficult to ascertain at this stage

### Standalone Net Profits for the year

- Higher EBIT - addition of India Foods business and higher operating profits from India beverages business (excluding one-off items of ₹ 25 Cr. in FY19)
- Lower taxation rate (adoption of lower tax rates)

Partly offset by:
- Higher exceptional items (mainly costs related to merger of India Foods business)
## Financials: Consolidated

### Changes in FY20 vs FY19

- **Revenue from operations**: 9.637 Cr vs 7.251 Cr (33%)
- **EBITDA**: 1,310 Cr vs 838 Cr (56%)
- **EBIT**: 1,069 Cr vs 715 Cr (49%)
- **PBT before exceptional items**: 1,084 Cr vs 768 Cr (41%)
- **PAT**: 535 Cr vs 474 Cr (13%)
- **Group Net Profit**: 460 Cr vs 457 Cr (1%)

### Group Consolidated Net Profits for the year grew by ~1% against previous year on account of following:

- Increase in EBITDA - addition of India Foods business and higher operating profits from base business (higher by 12% excluding impact of INDAS 116)
- Lower taxation rate (adoption of lower tax rates in India)
- Higher losses from Associates and JV’s due to business disruptions caused due to COVID-19 outbreak in India

# Higher exceptional items mainly includes costs related to merger of India foods business and non-cash impairment loss on goodwill relating to the business in Australia and tea business in the US. The accounting impairment has been recognised due to a combination of factors like COVID related impact on specific out of home business segments, changes to discount rates due to market conditions and revision in business plan sensitivities.

- Higher losses from Associates and JV’s due to business disruptions caused due to COVID-19 outbreak in India.
