1. We have reviewed the accompanying Statement of Unaudited Standalone Financial Results of Tata Consumer Products Limited (the "Company") for the quarter ended June 30, 2022 (the "Statement"), being submitted by the Company pursuant to the requirement of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (the "Listing Regulations").
2. This Statement, which is the responsibility of the Company's Management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements ("SRE") 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India ("ICAI"). A review of interim financial information consists of making inquiries, primarily of the Company's personnel responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing specified under section 143(10) of the Companies Act, 2013 and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

Profit before tax at Rs 307 Crores is lower by 19% as compared to corresponding quarter of previous year mainly on account of lower other income (previous year had higher dividend from subsidiaries) and higher spends behind brands which has been partly offset by revenue growth and improved gross margins. The Scheme inter alia provides for the demerger of the Plantation Business (as defined in the Scheme) of TCL into TBFL and as consideration, issue equity shares of the Company to all the shareholders of TCL (other than to itself) in accordance with the Share Entitlement Ratio mentioned in the Scheme. This would be followed immediately by the amalgamation of the TCL comprising of the Remaining Business (as defined in the Scheme) with the Company and as consideration, issue equity shares of the Company to all the shareholders of TCL (other than to itself) in accordance with the Share Exchange Ratio mentioned in the Scheme.

The Scheme would become effective after receipt of all requisite approvals as mentioned in the Scheme. Pending receipt of necessary approvals, no effect of the Scheme has been given in the financial results for the quarter ended June 30, 2022.

3. Exceptional item for the current quarter represent costs relating to the business restructure and reorganisation of Rs 10 Crores and cost pertaining to Scheme of arrangement of Rs 1 Crore.
4. In accordance with Ind AS 108 "Operating Segments", segment information has been given in the consolidated financial results, and therefore, no separate disclosure on segment information is given in these standalone financial results.

# Concluding remarks

# To conclude

---

## Macros

- Broad-based inflation continues to be a challenge across markets– however, its impact would vary across product categories/consumers/regions.
- The impact of inflation and monetary tightening on the economies of our major markets is a key monitorable.

## Business

- We continue to stay focused on driving growth and balancing margins, within the contours of the volatile macro environment.
- Given the volatility of the last 2 years, the growth rates have varied across periods, however the India Beverages business (including RTDs) has delivered a 3-year CAGR of 14%, and the India Foods business a 3-year CAGR of 19% (as of Q1FY23)
- We have continued to see significant inflation in salt costs driven primarily by energy costs and have taken judicious pricing to partly offset that.
- Our “growth businesses” are on a strong trajectory and we will continue to drive them further.
- Our Out of Home businesses i.e. both NourishCo & Starbucks have delivered robust growth during the quarter and we expect continued momentum.
- Tata Soufull has seen strong momentum and we are driving portfolio expansion to create new vectors of growth.
- In the international business, we have taken pricing actions to offset inflationary pressures while delivering competitive growth.
- Given the inflationary environment and investments required for some of the new businesses, we will continue to optimize margins at the company level while remaining focused on growth.
