#### /s/ SUSAN DONDERO

Susan Dondero VP Finance Date: May 02, 2023

#### Notes to the financial statements for the year ended March 31, 2022

### 1. General Information

Tetley USA, Inc. is engaged in the sale of tea to the grocery, mass, club, dollar, military and convenience channels primarily within the United States. Tetley USA Inc. ("Tetley USA") was incorporated on December 8, 1972, pursuant to the laws of Delaware.

#### 2. Summary of significant accounting policies

The principal accounting policies adopted in the preparation of these financial statements are either set out below or included in the accompanying notes. These policies have been consistently applied to all the years presented, unless otherwise stated.

### a. Function and presentation currency

The company's functional and presentation currency is the United States Dollars (USD).

#### b. Revenue from contracts with customer

Revenue from contract with customers is recognised when the Company satisfies performance obligation by transferring promised goods and services to the customer. Performance obligations are said to be satisfied at a point of time when the customer obtains controls of the asset or when services are rendered.

Revenue is measured based on transaction price (net of variable consideration) allocated to that performance obligation. The transaction price of the goods and services to a customer is based on the price specified in the contract and is net of variable consideration on account of estimated sales incentives / discounts offered by the Company. Accumulated experience is used to estimate and provide for the discounts/right of return, using the expected value method.

### c. Finance income

Finance income is recognised using the effective interest method. When a loan and receivable is impaired, the company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as finance income. Finance income on impaired loan and receivables is recognised using the original effective interest rate.

### d. Royalty Income

Royalty income includes fees generated by licensing the Company's trademark. Licensing fees are recognized when earned, which is generally upon sale of the underlying products by the licensees and are recorded in net sales.

### e. Borrowing Costs

Borrowing costs consist of interest, ancillary and other costs that the Company incurs in connection with the borrowing of funds and interest relating to other financial liabilities. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

#### f. Intangible assets

Goodwill arising on a business combination represents the excess of the fair value of consideration over the identifiable net asset acquired. Fair value of consideration represents the aggregate of the consideration transferred, a reliable estimate of contingent consideration payable, and the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree on the acquisition date. Net assets acquired represents the fair value of the identifiable assets acquired and liabilities assumed.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the Cash generating units (CGUs), or groups of CGUs, that is expected to benefit from the acquisition itself or from the synergies of the combination or both. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes.

Goodwill is not amortised but is tested for impairment. Goodwill impairment reviews are generally undertaken annually. The carrying value of the CGU containing the goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognised immediately as an expense and is not subsequently reversed unless the CGU is classified as "Asset held for sale" and there is evidence of reversal. Goodwill is subsequently measured at cost less amounts provided for impairment.

#### g. Property, plant and equipment

i) Recognition and measurement: Property, plant and equipment are carried at historical cost of acquisition less accumulated depreciation and accumulated impairment losses, if any. Historical cost includes expenditure directly attributable to the acquisition of the item. Subsequent expenditure related to an asset is added to its book value only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amounts of replacements are derecognised. All repairs and maintenance are charged to the statement of profit and loss during the financial year in which they are incurred.

ii) Depreciation: Items of property, plant and equipment are depreciated in a manner that amortizes the cost (or other amount substituted for cost) of the assets after commissioning, less its residual value, over their useful lives on a straight line basis. Land is not depreciated.

iii) Cost incurred on assets under development are disclosed under capital work in progress and not depreciated till asset is ready to use.

The residual values and useful lives for depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Recoverable amount is higher of the value in use or exchange.

Gains and losses on disposals are determined by comparing the sale proceeds with the carrying amount and are recognised in the statement of profit and loss.

iv) Estimated useful lives of items of property, plant and equipment are as follows:

Category	Useful life
Furniture and Fixtures	10 years
Plant and Machinery	3-20 years
Customer Intangibles	1 year

#### h. Other receivables

Other receivables are measured at transaction price, less any impairment. Loans receivable are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method, less any impairment.

#### i. Inventories

Inventories are stated at the lower of cost, or net realizable value, as determined by using the first-in, first-out method. In evaluating whether inventories are stated at the lower of cost or net realizable value, the Company considers factors such as the amount of inventory on hand; estimated time required to sell such inventory, remaining shelf life and market conditions.

#### j. Current and deferred income tax

#### i) Current Income Tax:

Current Income Tax is measured at the amount expected to be paid to the tax authorities in accordance with local laws of various jurisdiction where the Company operates.

### ii) Deferred Tax:

Deferred tax is provided using the balance sheet approach on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The tax rates and tax laws used to compute the tax are those that are enacted or substantively enacted at the reporting date. Current income tax and deferred tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

#### k. Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, other shortterm highly liquid investments with original maturities of three months or less and bank overdrafts.

#### I. Trade receivables

Trade receivables are amounts due from customers for products sold in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets. Trade receivables that do not contain a significant financing component are initially measured at transaction price and subsequently measured at amortised cost using the effective interest method, less provision for impairment. For trade receivables, the Company applies the simplified approach for recognition of impairment allowance as provided in IFRS 9, which requires expected lifetime losses to be recognised on initial recognition of the receivables.

#### m. Creditors

Short term trade creditors are measured at the transaction price. Other financial liabilities, including bank loans, are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method. Creditors are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

#### n. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. If the effect of the time value of money is material, provisions are discounted. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Contingent liabilities exist when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required or the amount cannot be reliably estimated. Contingent liabilities are appropriately disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is a possible asset arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognised till the

realisation of the income is virtually certain. However the same are disclosed in the financial statements where an inflow of economic benefit is possible.

### o. Post Retirement Obligation and Other Employee Benefits

### Post Retirement Obligations

The Company has post-retirement life insurance benefit plan for qualifying retirees which is a defined benefit plan and the charge on account of such plan is determined through independent actuarial valuation at year end and such charge recognised in the statement of profit and loss. Interest costs on employee benefit schemes have been classified within finance cost. The Scheme is unfunded. Re-measurements as a result of experience adjustments and changes in actuarial assumptions are recognised in other comprehensive income, and subsequently not reclassified to the Statement of Profit and Loss.

The Company recognises in the statement of profit and loss, gains or losses on curtailment or settlement of a defined benefit plan as and when the curtailment or settlement occurs.

### **Other Employee Benefits**

Other employee benefits are accounted for on accrual basis. Liabilities for compensated absences are determined based on independent actuarial valuation at year end and charge is recognised in the statement of profit and loss.

### p. Foreign currencies

Transactions in foreign currencies are translated at the rate of exchange prevailing at the transaction date. Monetary assets and liabilities in foreign currencies are re-translated at the rate of exchange rate ruling at the balance sheet date. All exchange differences are recognised in the income statement.

### q. Exceptional Items

Exceptional items are disclosed separately in the financial statements where it is necessary to do so to provide further understanding of the financial performance of the Company. These are material items of income or expense that have to be shown separately due to their nature or incidence.

### r. Events after the reporting period

Adjusting events are events that provide further evidence of conditions that existed at the end of the reporting period. The financial statements are adjusted for such events before authorisation for issue. Non-adjusting events are events that are indicative of conditions that arose after the end of the reporting period. Non-adjusting events after the reporting date are not accounted, but disclosed, if material.

### 3. Critical accounting judgements and key sources of estimation uncertainty

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Estimates

The company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

#### Estimated impairment of goodwill

Determining whether impairment is needed requires an estimation of the recoverable amount through value in use of the cash generating units to which the goodwill or intangible asset has been allocated. The value in use calculation requires management to estimate the future cash flows expected to arise from the cash-generating unit and use a suitable discount rate in order to calculate present value.

#### Judgements

There are no judgements that have a risk of causing a material adjustment to the carrying amounts of assets andliabilities within the next financial year.

4. Operating profit	4. (	ating prot	fit
---------------------	------	------------	-----

	2023	2022
