

## GREEN PROCUREMENT POLICY

October 03, 2023

Acting responsibly towards all our stakeholders underpins the way we do business at Tata Consumer Products Limited (TCPL). Our Environmental, Social, and Governance (ESG) strategy 'For Better Living' embodies this spirit and guides our efforts towards better living for our consumers, employees, investors, and value chain partners.

We are optimistic about accomplishing our sustainability goals by routing them through four pillars -For Better sourcing, For a Better planet, For Better communities, and For Better nutrition. For us, product sustainability is of paramount importance, and we pursue it across our business life-cycle –starting from sourcing. Our sourcing strategy emphasises adopting responsible procuring practices.

**Scope:** This policy aims to cover all TCPL procurements. While joint venture operations are not covered under this policy, we strive to encourage them to align their activities to this policy.

**Organisation:** Overall accountability for the policy and program rests with the MD & CEO. The Heads of various Functions are accountable for locations within their respective areas of supervision, implementation, and review of the policy.

TCPL shall strive to include the following considerations in procurement decisions for direct procurements. TCPL will also encourage our critical value chain partners to share the same commitment and integrate the following principles in all their decisions and processes.

- Complying with all relevant regulatory requirements.
- Institutionalizing environmental considerations in our procurement decisions.
- Reducing natural resource consumption and improving recycling ability.
- Optimising plastic consumption in the TCPL supply chain through suitable initiatives.
- Promoting environmental awareness amongst suppliers / contractors.
- Encouraging external certifications (ISO 14001, ISO 50001, BRC, Organic, etc) covering our value chain partners to improve their environmental performance.
- Transitioning towards greener modes of transportation in operations.
- Continued support to our value chain partners with respect to technology, knowledge and awareness on environment friendly practices including use of renewable sources of energy wherever possible.

**Monitoring and Review:** We expect our critical suppliers to monitor and report the initiatives undertaken by them with regard to ensuring adherence to this Policy. The suppliers should focus on continuously improving their performance with regard to compliance with this Policy.

For and on behalf of Tata Consumer Products Limited

  
Sunil D'Souza  
Managing Director & CEO
